9. **Platforms impact report**
10. **App downloads**
11. **Appendix**

Introduction

- In the Web And Mobile Services Unit, we are driven by the message of our man of God , Rev Chris Oyakhilome to produce and develop innovative solutions to move the ministry's vision to the ends of the world and win as many souls for the kingdom.

Executive summary

The Web and Mobile Services Unit aka Cyber Unit is a very important body in the LoveWorld Television and Radio Ministry of Pastor Chris. My work as the unit head has been divided into 6 main parts namely **research, innovation and platform development, database generation, server administration and security, technical support and last but not least training facilitations.**

This year of Gathering Clouds has been a remarkable year and in line with the target of the ministry to reach and disciple over 7 billion souls globally.

My work this year as the unit head of Web and Mobile Service was centred around reaching and impacting over 7 billion souls with new and existing cutting edge technologies.

My first project was to investigate the accurate reach of each of our TV and Radio online platforms. This led to the development of a cutting edge analytic system, **Symboid. Symboid is a next Gen intelligent background service I developed to run on both web and mobile platforms.** The primary responsibility of Symboid is to collate accurate records on precise location (country and city), screen time, pages visited, sessions of each user on our platform.

After analysing the Symboid report data from each TV and Radio online platform, we discovered that , we had actually covered **97% of countries of the world** but reached few cities in each country. These data helped us to re-strategise on how to narrow down our reach city by city. Another important feature of Symboid is the ability to organise these data into year, month and day for easy search.

In line with our agenda this year to reach and impact over 7 billion souls with TV and Radio platforms, I strategically **trained and coordinated 15 web and mobile administrators** to manage 13 major TV and Radio platforms I developed for the ministry. These administrators were equipped with knowledge , skills and resources to update the assigned platforms with new contents and effectively engage users via live chat and push notification systems. This resulted in **over 300% increase in platform activities** and also impacted income generation.

Executive summary

With only 20% of the world population an English speaking nations, the CeTunes platform hosting over 200 gospel radio stations in 35 major languages which I developed became the fastest medium to reach and impact souls with the gospel according to Loveworld. This year , I took it even feather by decentralising the live chat and pushing notification system. This new upgrade of the CeTunes platform made it possible for listeners to receive push notification in their respective languages and also chat with CeTunes Radio channel representatives in any language of choice. This amounted to over 200% participation and real time engagement on the platform as listeners get to be entertained and impacted spiritually.

Bio-metric Attendance Clock-in systm

Staff attendance record capturing has never been this easy. We have moved from paper to digital clock-in machine. But the issues still remains unsolved, either attendance sheet misplaced , staff members entering false time, clock-in device malfunctions or data gets corrupted on export. This years with much research I developed a finger print bio-metric attendance capturing applications and installed on an android finger print scanner device. The application works in both online and offline modes making it possible to automatically sync attendance records to cloud server stored on LTM & Radio Staff Reporting and Performance Portal which I also developed. Apart from the automation and digitalisation of attendance records, staff members now have access to view personal attendance records in real-time from the LTM & Radio Staff Reporting and Performance Portal. Attendance capture issue finally solved.

Server Management and data security

Here at LTM & Radio Ministry of Pastor Chris, our mobile app and website are powered by different servers ranging from dedicated hosting servers, live video streaming and transcoding servers to live radio streaming servers. This amounts to huge running cost yearly and periodic server malfunctioning due to increasing traffics. As the personal in skill and knowledgeable in maintaining, managing and administrating this servers, I did a thorough review and was able to save unto \$ 7,000 off annual server bills while ensuring smooth and excellent operation of all our TV and Radio platforms. I also migrated our LTM Networks Live TV channels to a scalable pay-as-you go server. I also migrated our 200 live radio channels to Centova Cast server for better performance.

This has resulted to over 400% increase in listen and watch time on our TV and Radio platforms due smooth and buffer free streams. I also developed an encryption system to secure all our digital asserts and admin login credentials.

Executive summary

LTM website / 25 years celebration of Pastor Chris on TV.

The Television Ministry of Pastor Chris is was the first ministry department and this year marks the 25th year of Tele-evangelism and global impact. In light of th 25th Anniversary , I resigned the LTM official website with extra new features such as active blog, testimonials, impact reports etc. I also designed the 25th Anniversary celebration page featuring impact report of the Television Ministry over the years and striking testimonials. The site also featured testimony submission form where 100s of viewers all over the world sent in their testimony of salvation , miracles , healing , finance etc. The road to 25 years Anniversary and the main celebration were all streamed live on the LTM Website. This attracted move visitors and site activities grew over 700%.

GoLive Meetings

In line with the ministry agenda to develop new technologies and provide solutions for churches and members to aid work, I developed GoLive Meetings platform, an online video conferencing and streaming platform. Over the years, GoLive Meetings has served thousands of users including cells , churches and individuals with clear video and audio conferencing call. This year I introduced GoLive Meetings 4.5 with major upgrades. This upgrade introduces a more clearer video and video call with reduced data consumption. GoLive Meetings 4.5 has a capacity increased from 100 to 250-300 users on a single call. I also integrated a live streaming feature called GoLive Streams which can host over 100,000 in a single meeting.

Live Streaming / Feed distribution

As TV and Radio ministry, we ensure the broadcast of ministry programs on several TV and Radio online platforms, terrestrial and satellite stations. I was vitally involved in the live stream and feed distribution of all epodes of Your Loveworld with Pastor Chris, Global Day of Prayer Pastor Chris, Monthly Global Service Pastor Chris, Healing Streams , etc which lead to reaching over 5.8 billion viewers and listeners globally.

Executive summary

I.T and technical support.

I provided round the clock I.T support both virtually and onsite on behalf of the department to users and managers of TV , Radio and Virtual church platforms.

I provided round the clock I.T support both virtually and onsite on behalf of the department to users and managers of TV , Radio and Virtual church platforms.

I ensures swift resolution of issues and provides smart and intelligent solutions.

I also succcesfully developed SuperFM Global App housing the 3 ministry SuperFM radios stations which made it possible to listen from any part of the world.

I also also developed and launched KingsView iOS app for iOS users.

He developed and periodically upgrade the following platforms cLoveworld, CeTunes, Staff Reporting Portal. Virtual Church, LTM Prayer Portal, SuperFM Global, KingsView, GoLive Meetings, Loveworld Radio web & mobile, LTM website.

As the unit head , I was responsible for servicing and providing technical support to the eight major TV and Radio platforms for the ministry namely , **cLoveWorld , CeTunes, GoLive Meetings, LoveWorld Radio App, Virtual Church, KingsView, SuperFM Global, LTM Website**. I updated the platforms constantly both web and mobile and ensured that they all worked perfectly.

From this platforms , I was able to generate over **9 million** usable data from app downloads, views, live chat, song downloads , comments, news letter subscription etc.

Executive summary

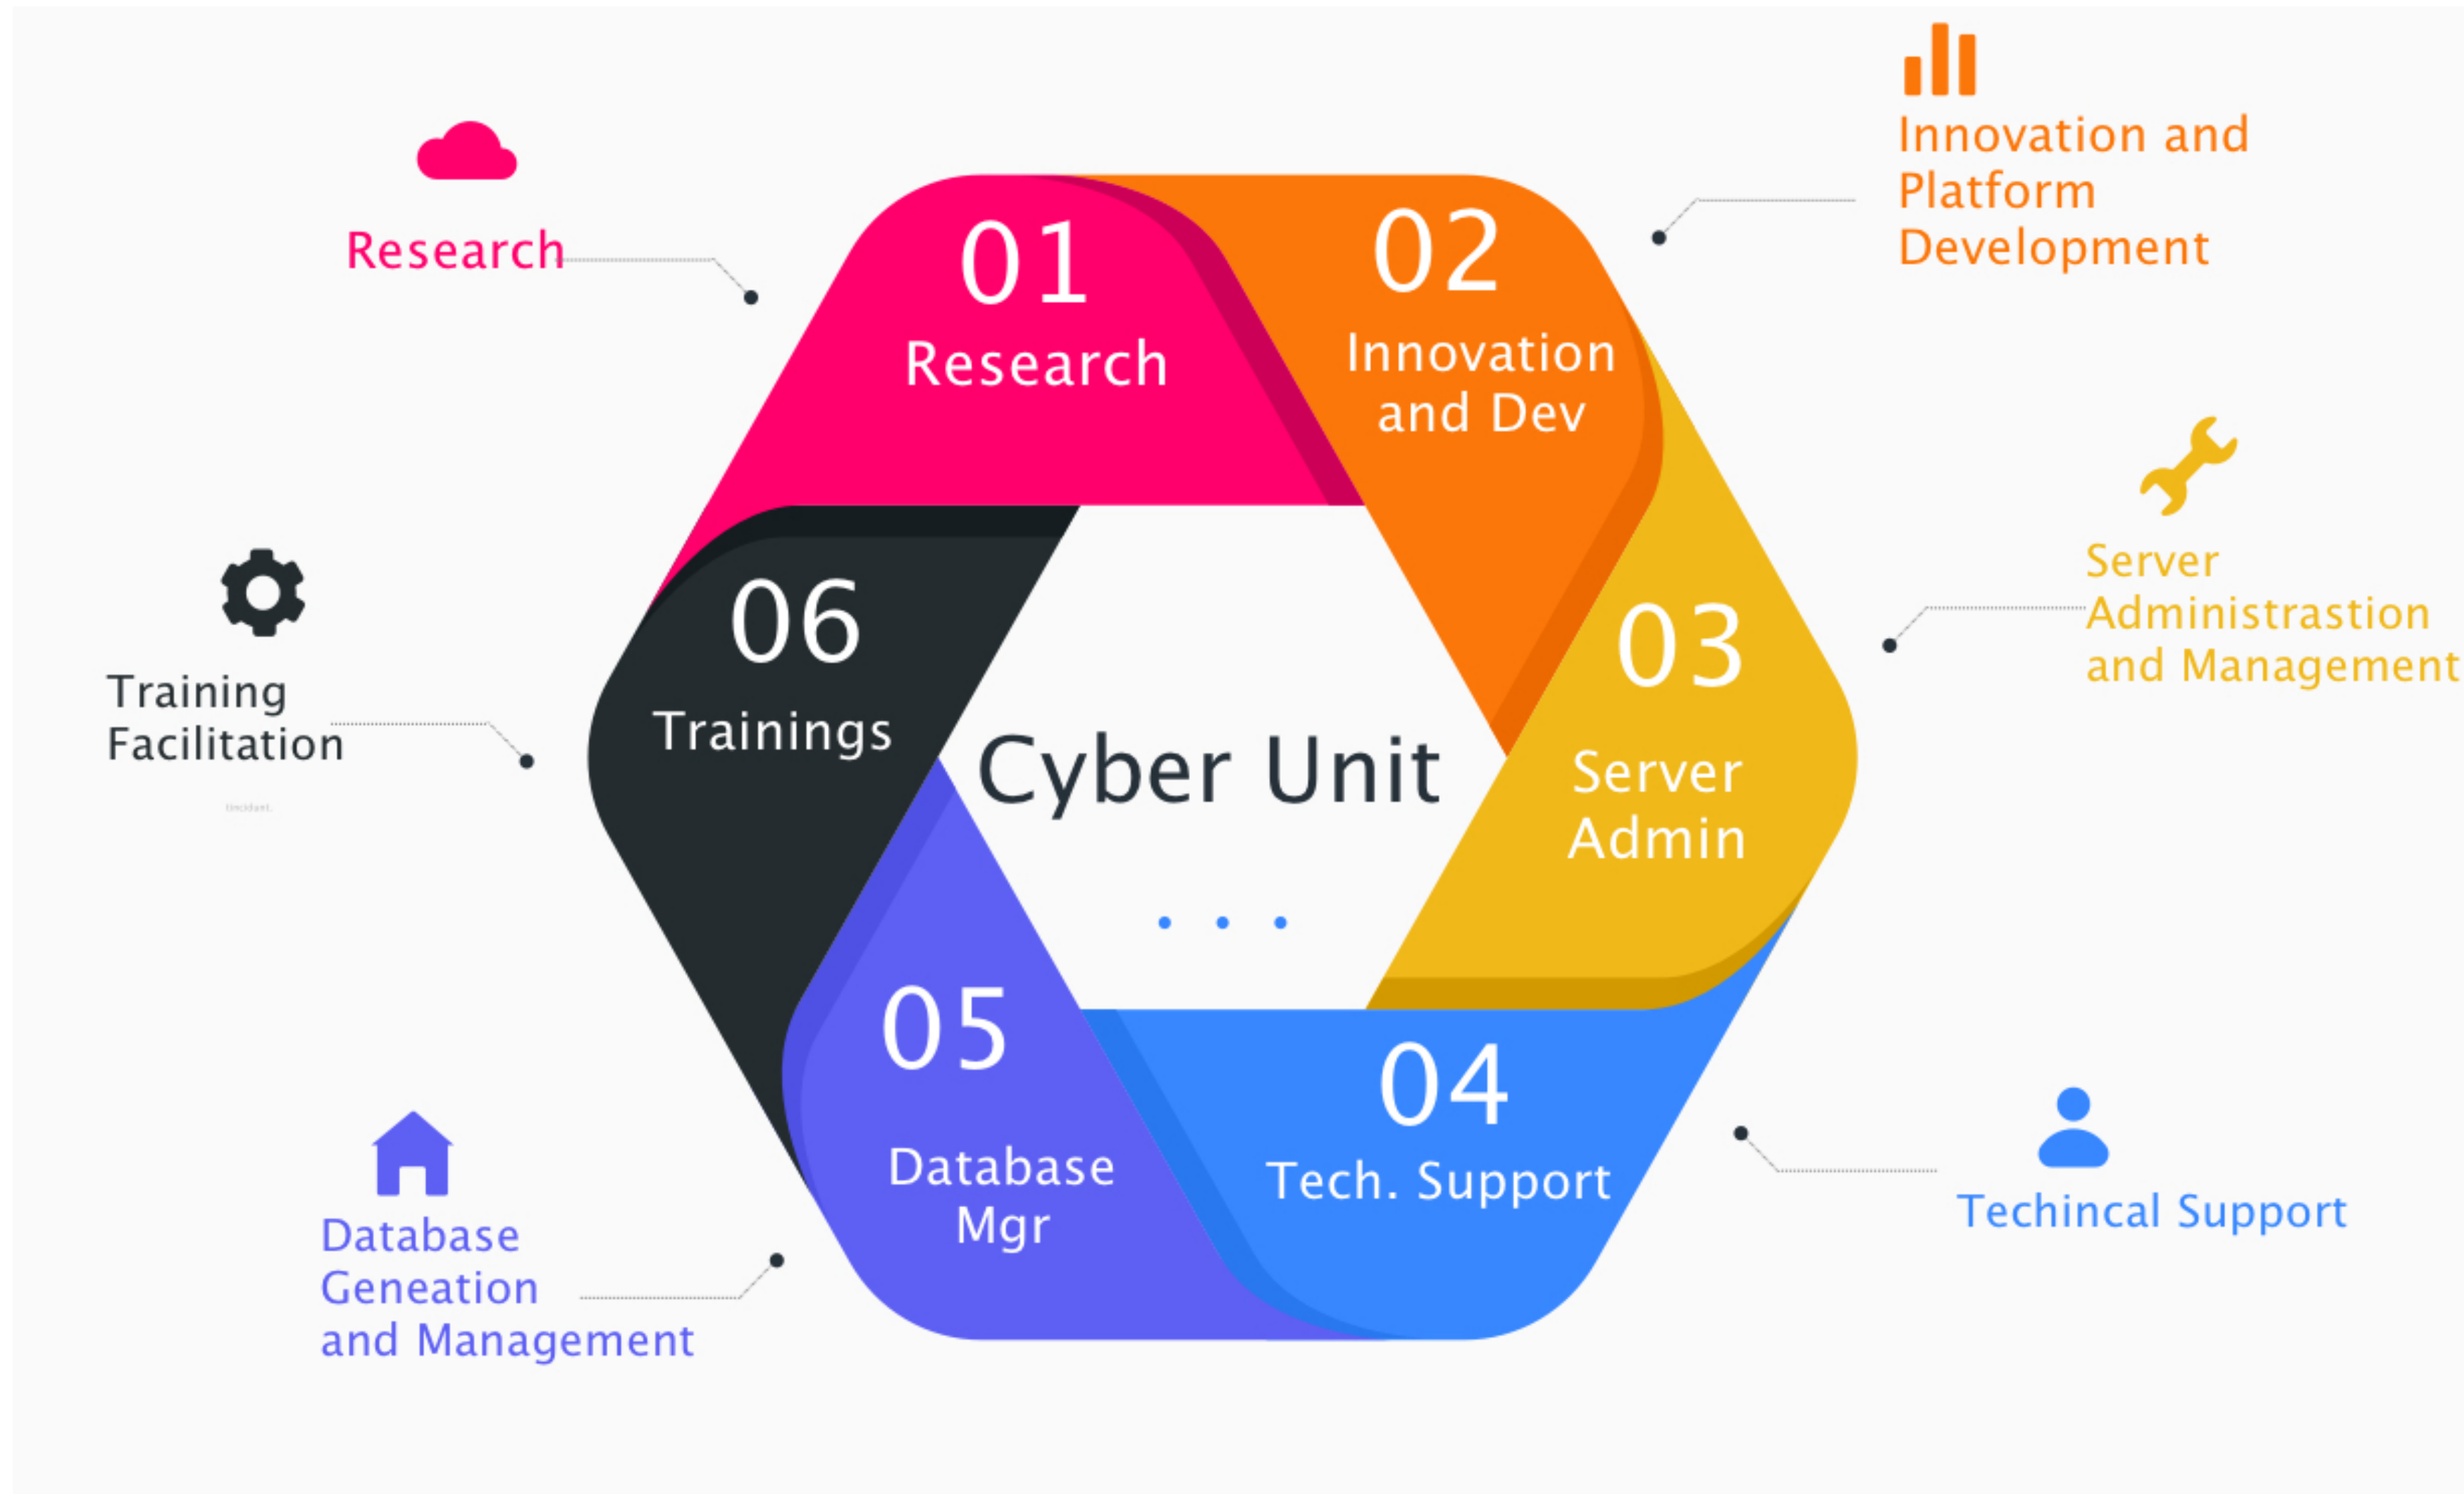

In this year of The Gathering Clouds , I conceived and developed **3 new innovative ideas** namely **SRPP Bio-metric attendance Check-in software, GoLive Streams and SuperFM Global App..**

I also personally achieved total of **2,868** downloads of **cLoveWorld , CeTunes, LoveWorld Radio and GoLive Meetings** mobile Apps thereby bring 2,868 **new** users to our platforms in this year of The Gathering Clouds.

I successfully developed a total of 49 sub sites including sponsorship links, registration links, customise avatar link etc.

He also trained a total of 11 translators for the live translations of ministry programs and 6 virtual church managers.

Core Responsibilities

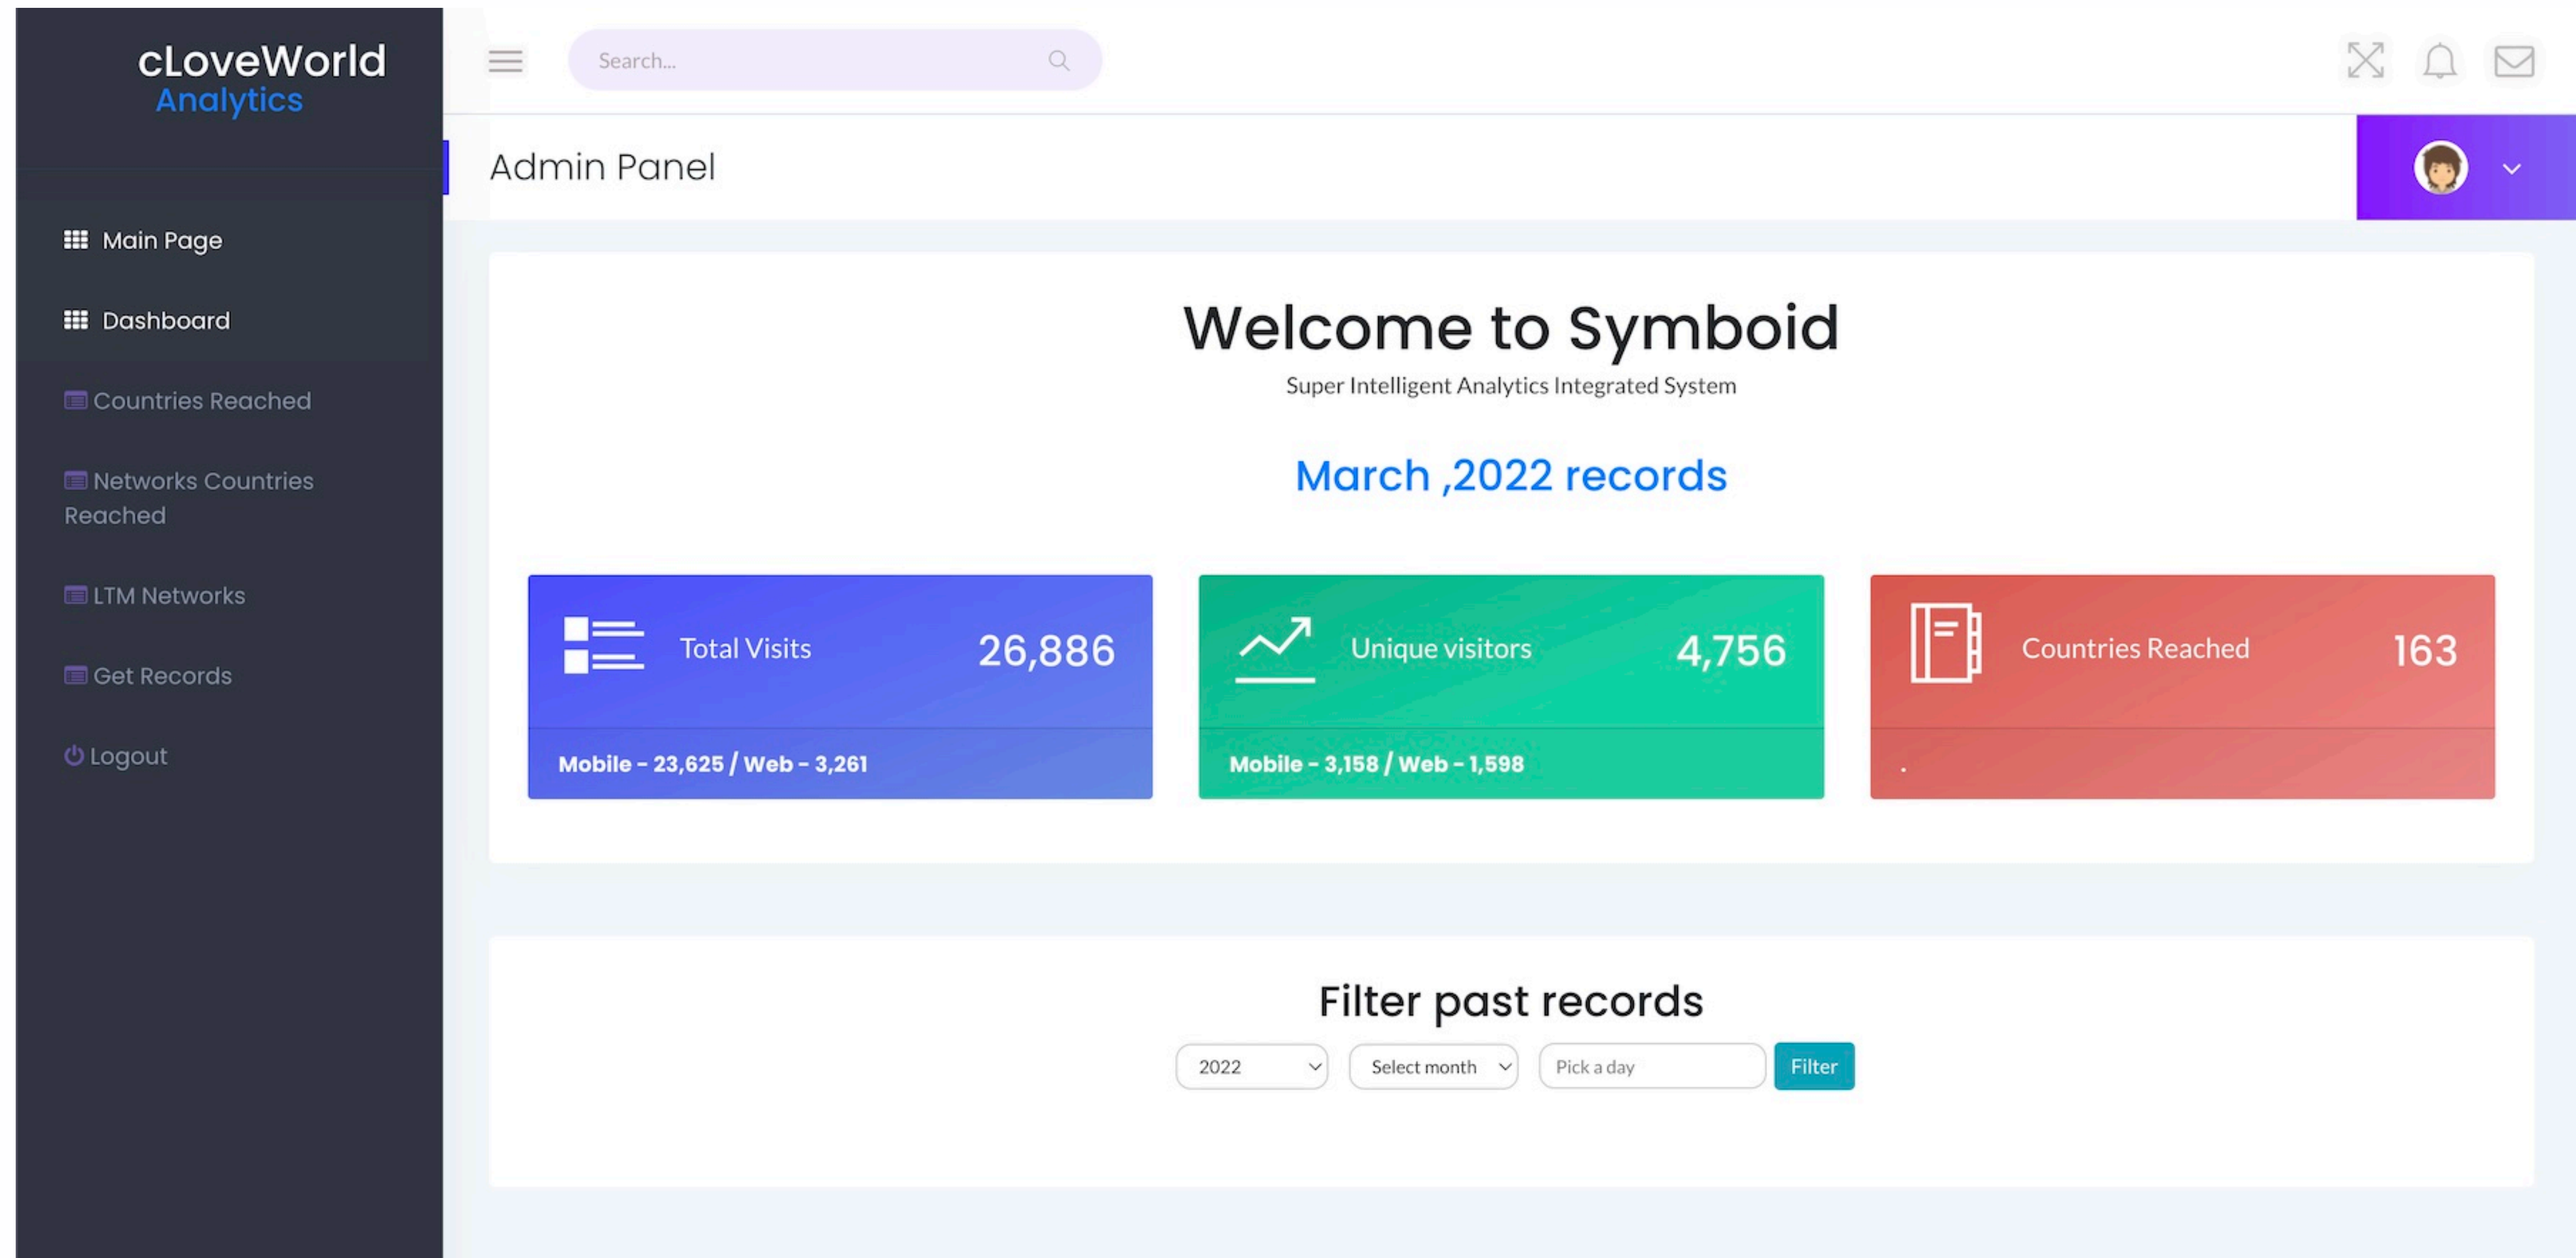

Symboid Analytic System

Symboid system is an intelligent analytic system designed to report detailed records on activities on platforms.

The system has the following features

- Daily listening and recording of all activities on app or website.
- Compatible with Android , iOS and web
- Records structured in hits, Unique visitors , Countries , Device used (Mobile / web)
- Has a front-end interface for viewing current data and filtering past data.
- Real-time statistics update

PICTURE : SYMBOID ANALYSIC SYSTEM

LTM Website redesign

In line with the ministry mandate this year to take over the cyber space, I redesigned the LTM website

The site has the following features

- Share testimony
- Video gallery
- Video testimonials
- Blog
- Events

TESTIMONIALS

EXERCISE MY FAITH THROUGH TV! My name is Musa from Switzerland, Europe. Today, I can raise my hands up and do all my da activities because of Pastor Chris, who I encountered on TV. Since last year November, I had problems with my right arm. I couldn't do much and it was challenging for me. One day, I stumbled on a message talking about faith by Pastor Chris. This stirred my faith. I immediately raised my hand, and I began to move it like I was worshipping. After a while, I couldn't feel pain and I was completely healed. Thank you, Pastor Chris, for making me realize how possible it is for me to exercise my faith.....

Mr Mus

4.2 Bio-metric Check-in System

4.2 SRPP BIO-METRIC CHECK-IN SYSTEM

In the month of June 2022, I developed a **bio-metric check-in software** for attendance taking.

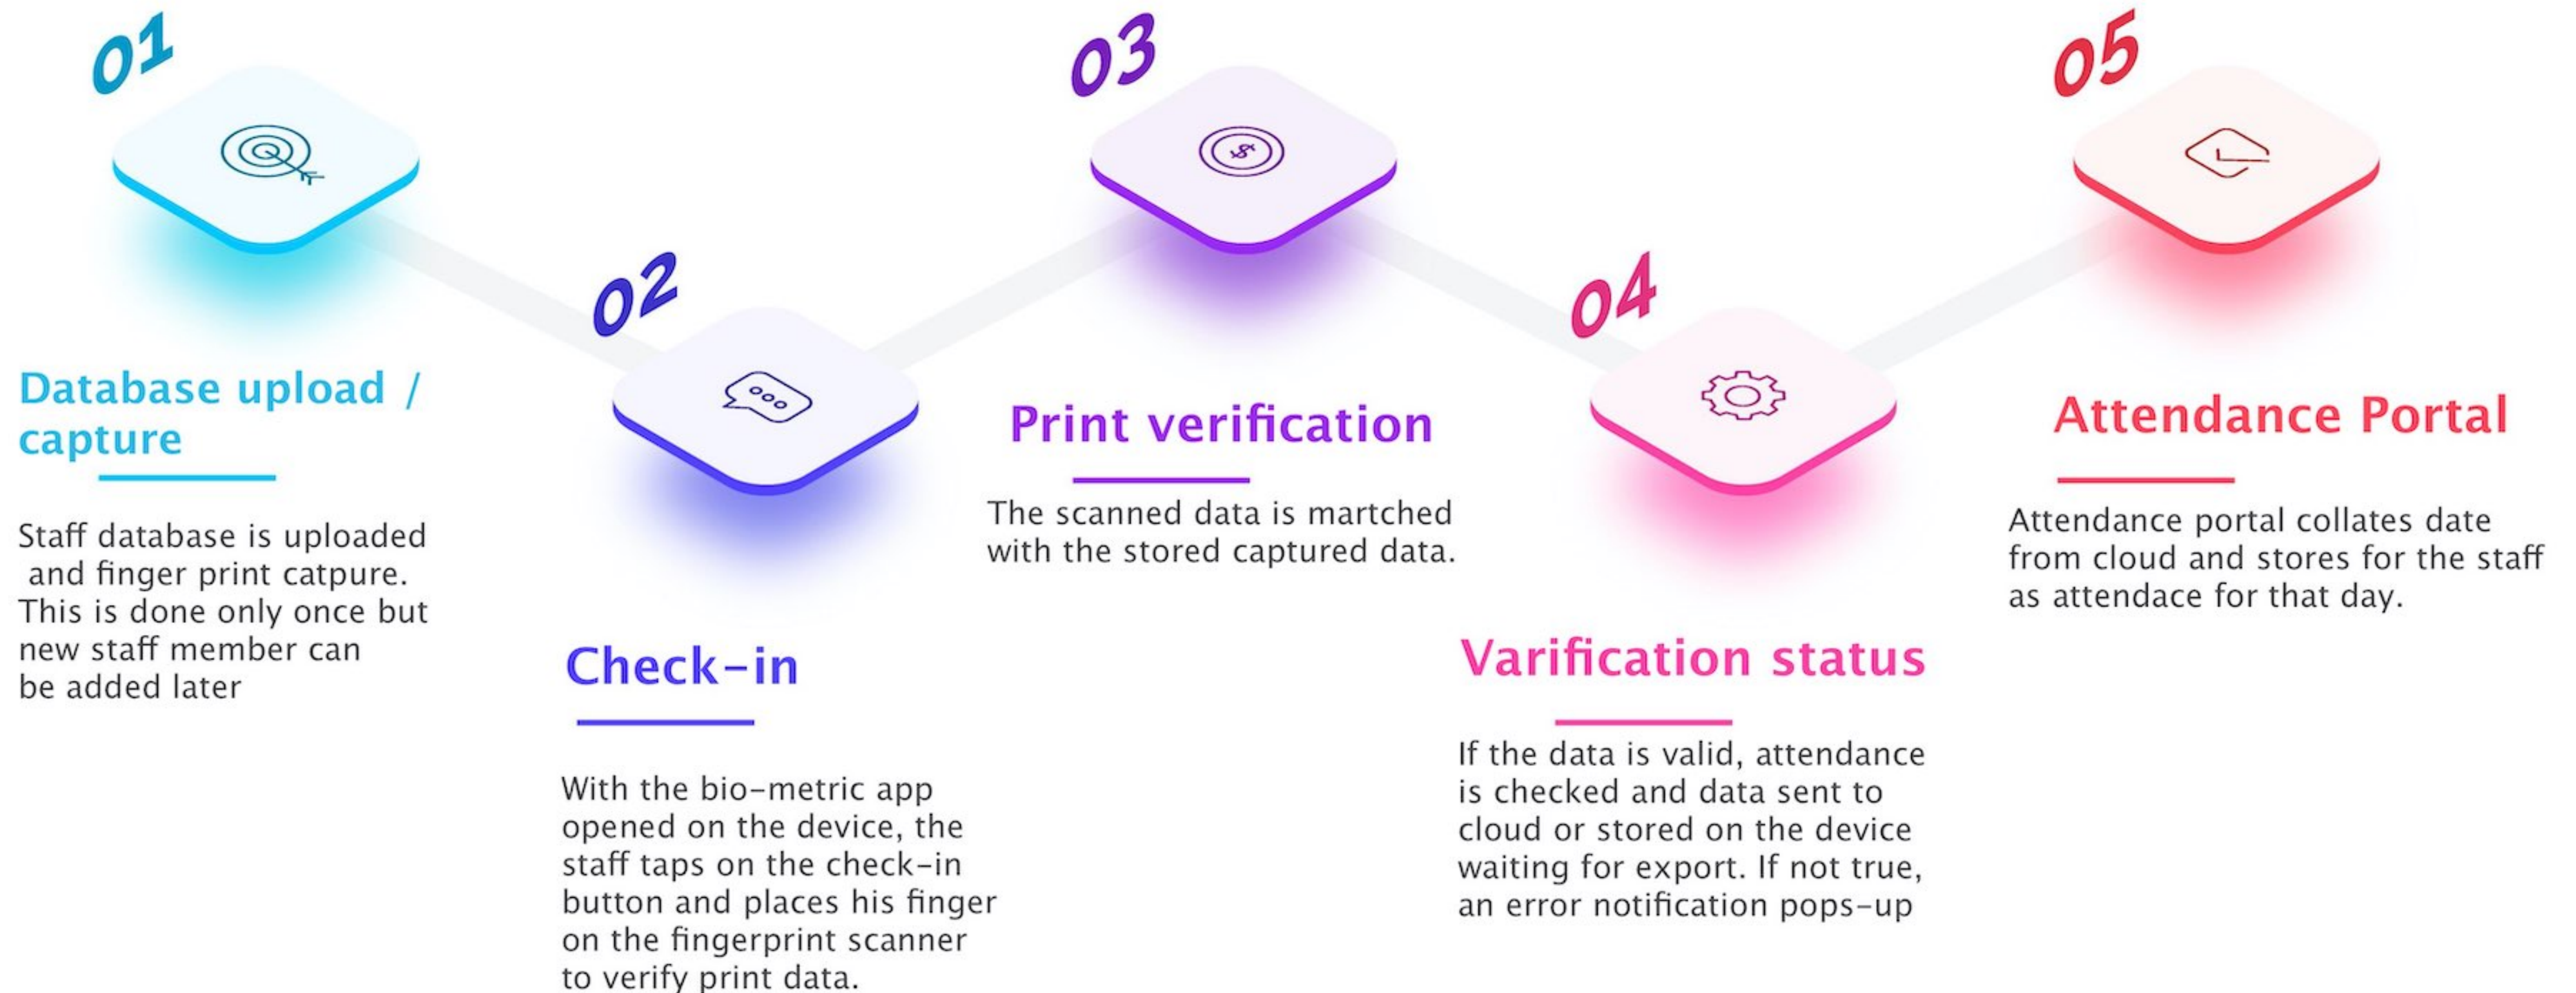

SRPP Bio-metric check-in software in an Android based application installed on an Android bio-metric device. The device has all the functionality of an android smart with a built-in finger print and bar code reader. The SRPP Bio-metric software is designed to interface with this hardwares in the device for reading and validating finger print on scan. **The Bio-metric software is linked to the departmental attendance portal for auto check-in.**

On fingerprint scan , the verified data is compared with the stored data, and if matched the attendance of the staff is check-in and sent directly to the reporting.

All processes are automated with no human interface with the data.

The next slide showcases the working of the software.

MECHANISM OF SRPP BIO-METRIC CHECK-IN DEVICE

SRPP BIO-METRIC CHECK-IN SYSTEM - FEATURES

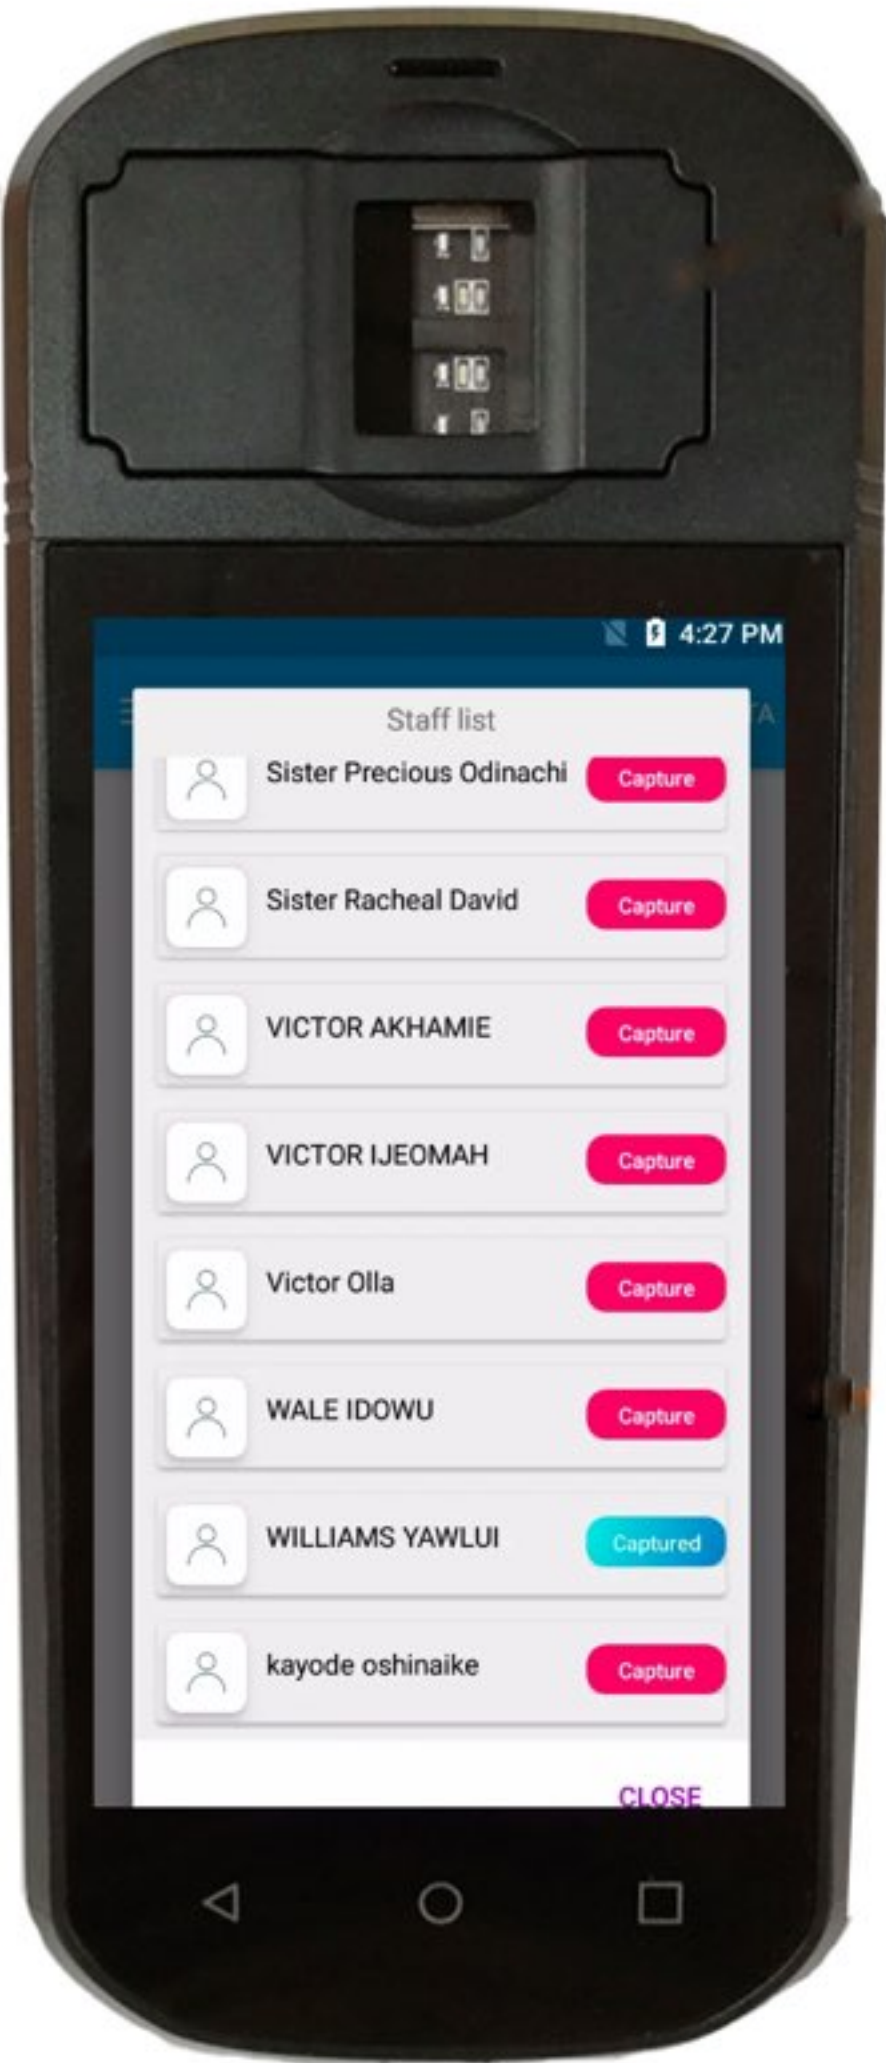

Below are the features of the system.

1. **Online and offline functionalities** - When device is offline , the app stores all attendance records on the device memory and uploads to cloud when device goes online.
2. **Military grade fingerprint data encryption** - Data is heavily encrypted to avoid faking or hacking.
3. **Database upload and capture** - There is an inbuilt admin panel in the app for signing up in staff members. Bulk upload is also supported.
4. **One-tap to check-in** - Checking in is just a tap making it very easy to capture an attendance in a second.
5. **Auto reset** - The app resets automatically to allow new check-in.
6. **Full automation** - There is no human interaction with the data. Data captured are moved to cloud and checked-in automatically.

The next slide contains pictures of the device in action.

SuperFM Global Android Update

This month of the August , I updated the SuperFM Global Android Mobile App with the following features.

- Live chat for instant live chat with users
- Login : In this new update , a registration view was added for data capture
- New UI : The new UI update includes Live Chat button on the main view and also a call icon to initiate call to the station.
- Direct phone call / Save : This updates includes an option for listeners to save station number to get news update.
- Live Stream : The Live stream has been expanded to support external streaming platform such as Twitch.

SuperFM Android Update

Revised and Improved Platforms 2022

5.3 GoLive Meetings

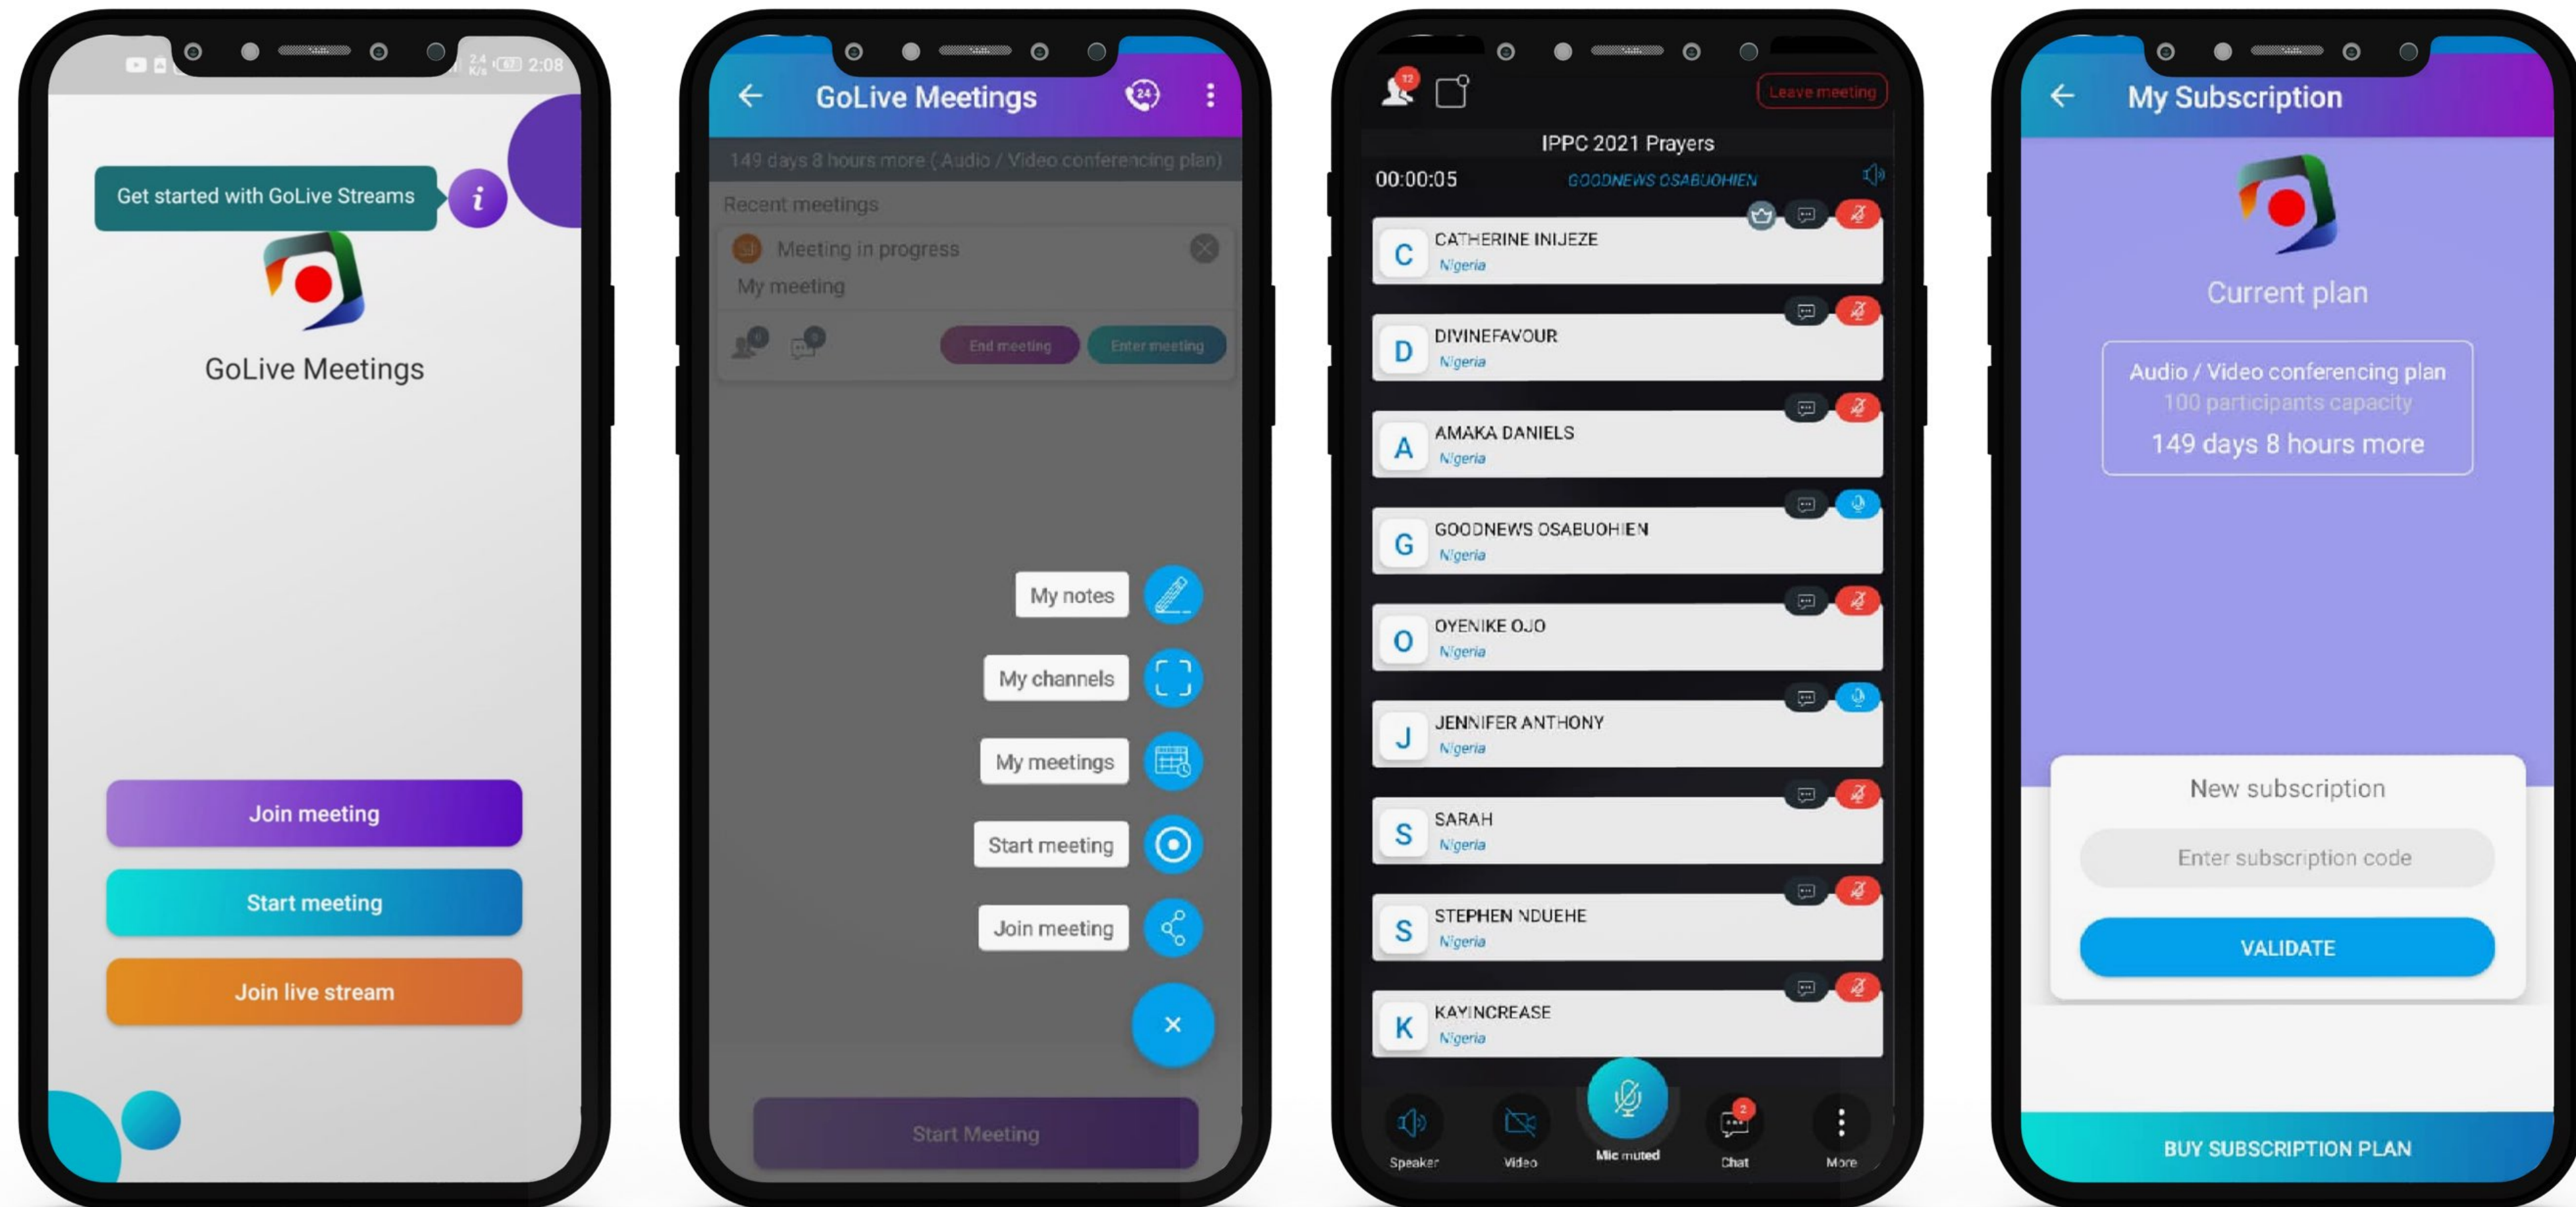

GoLive Meetings is one of a kind online meeting and live stream platform.

In this year of The Gathering Clouds, I updated the platform with the following features

GoLive Streams - In this year I integrated live streaming into GoLive meetings. This makes it easy to stream live event.

The pictures in the next slide.

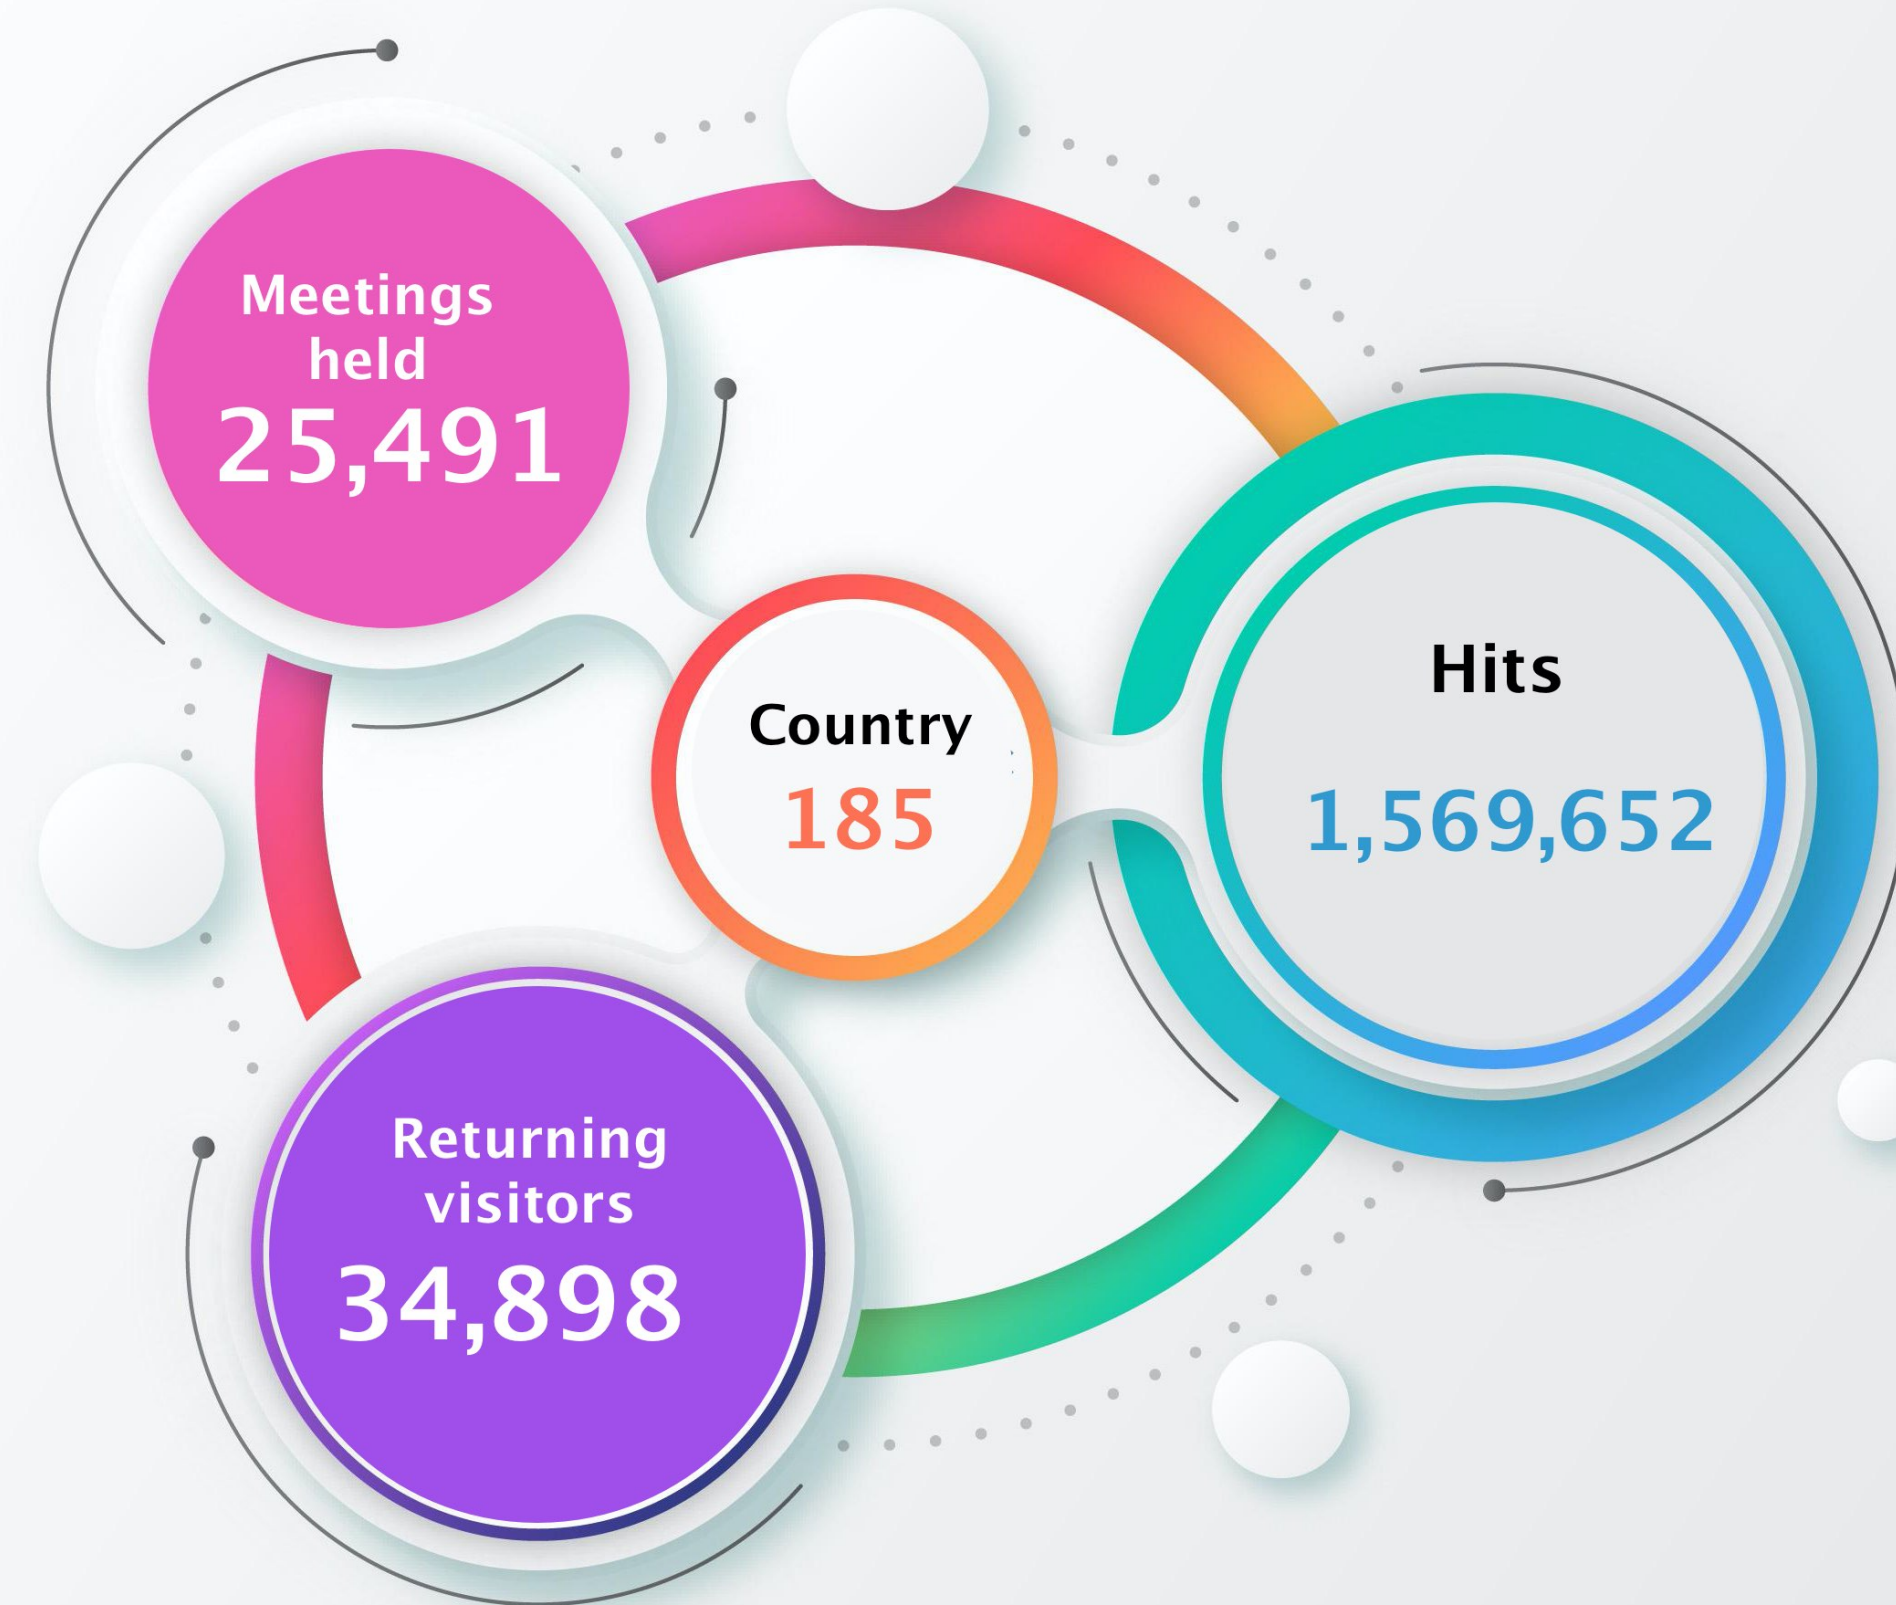

PICTURES : GOLIVE MEETINGS APP

GoLive Meetings statistics on the next slide

5.2 GoLive Meetings Statistics

GoLive Meetings has successfully reached **1,569,652 people** in **185 countries** with a total of **34,898** constant returning users and **total meetings held of 25,491**.

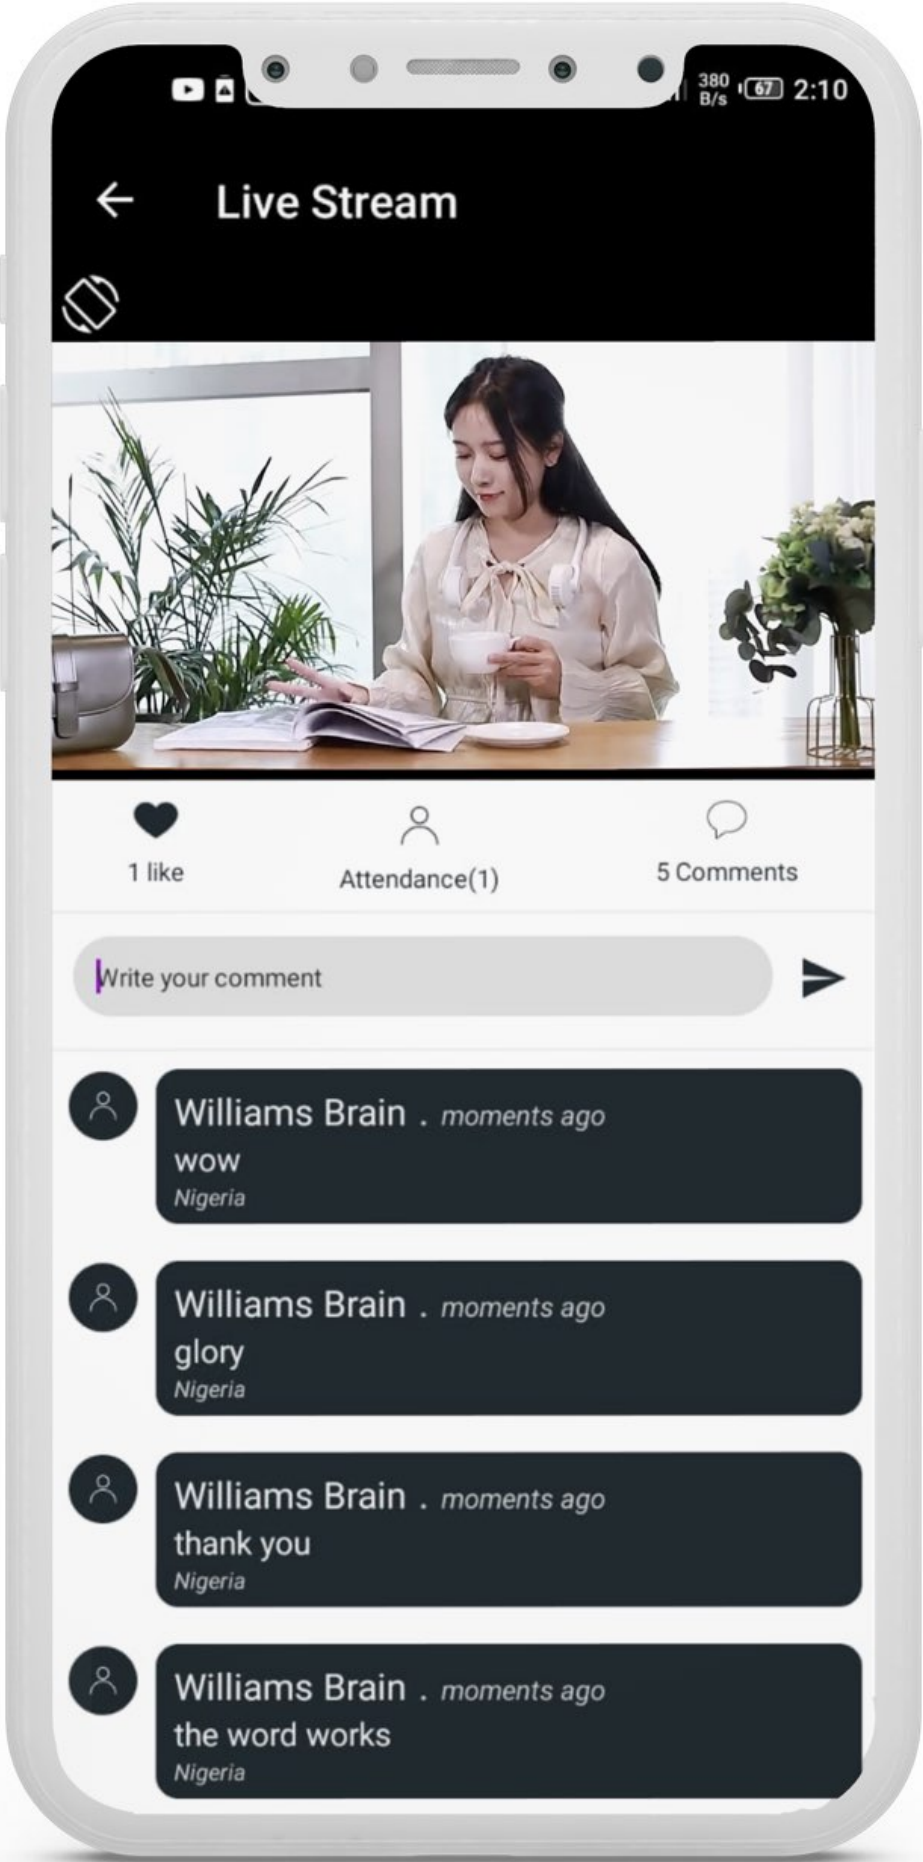

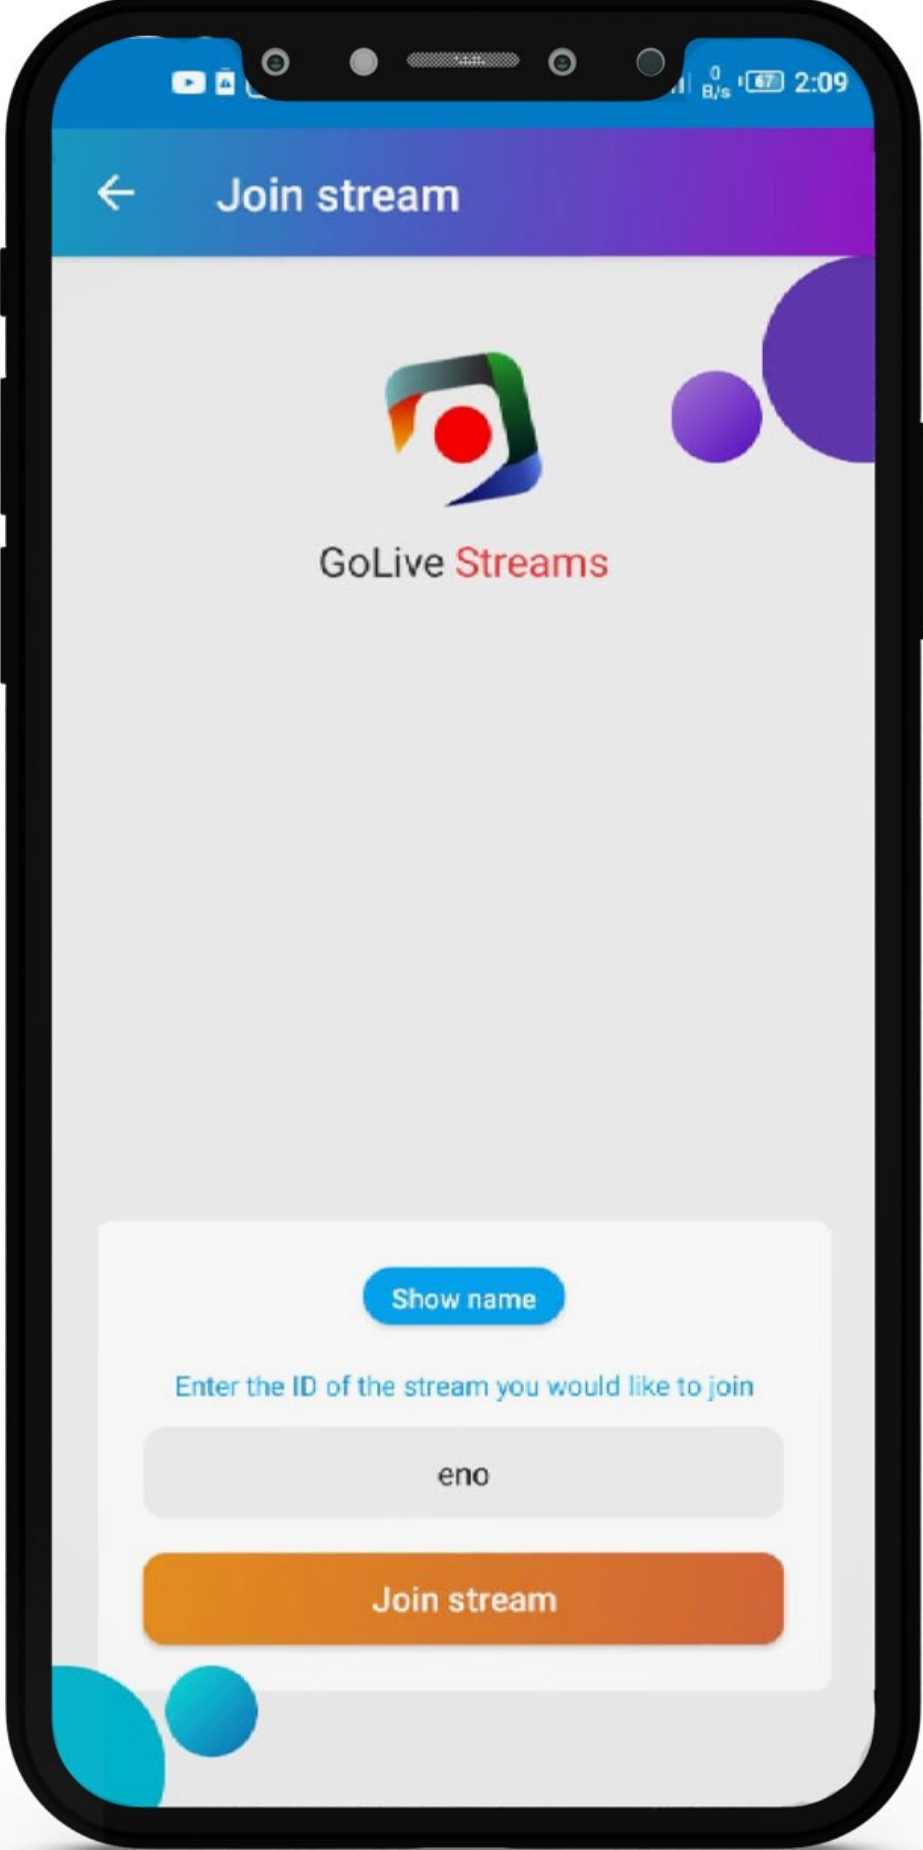

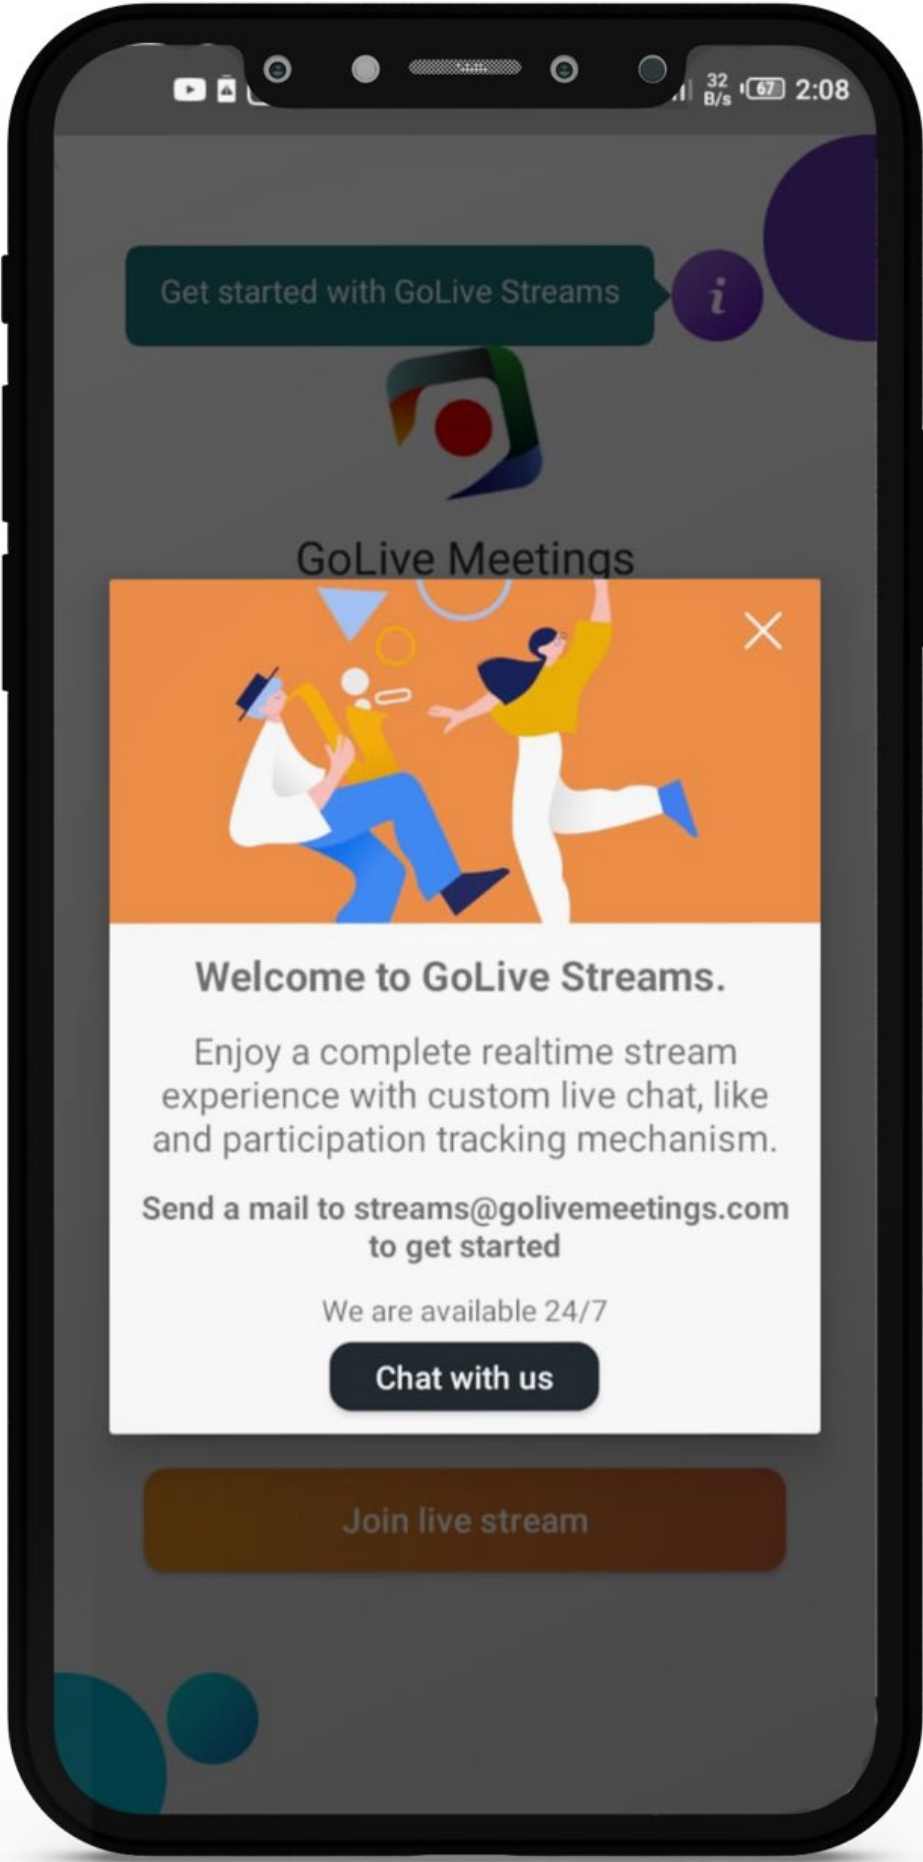

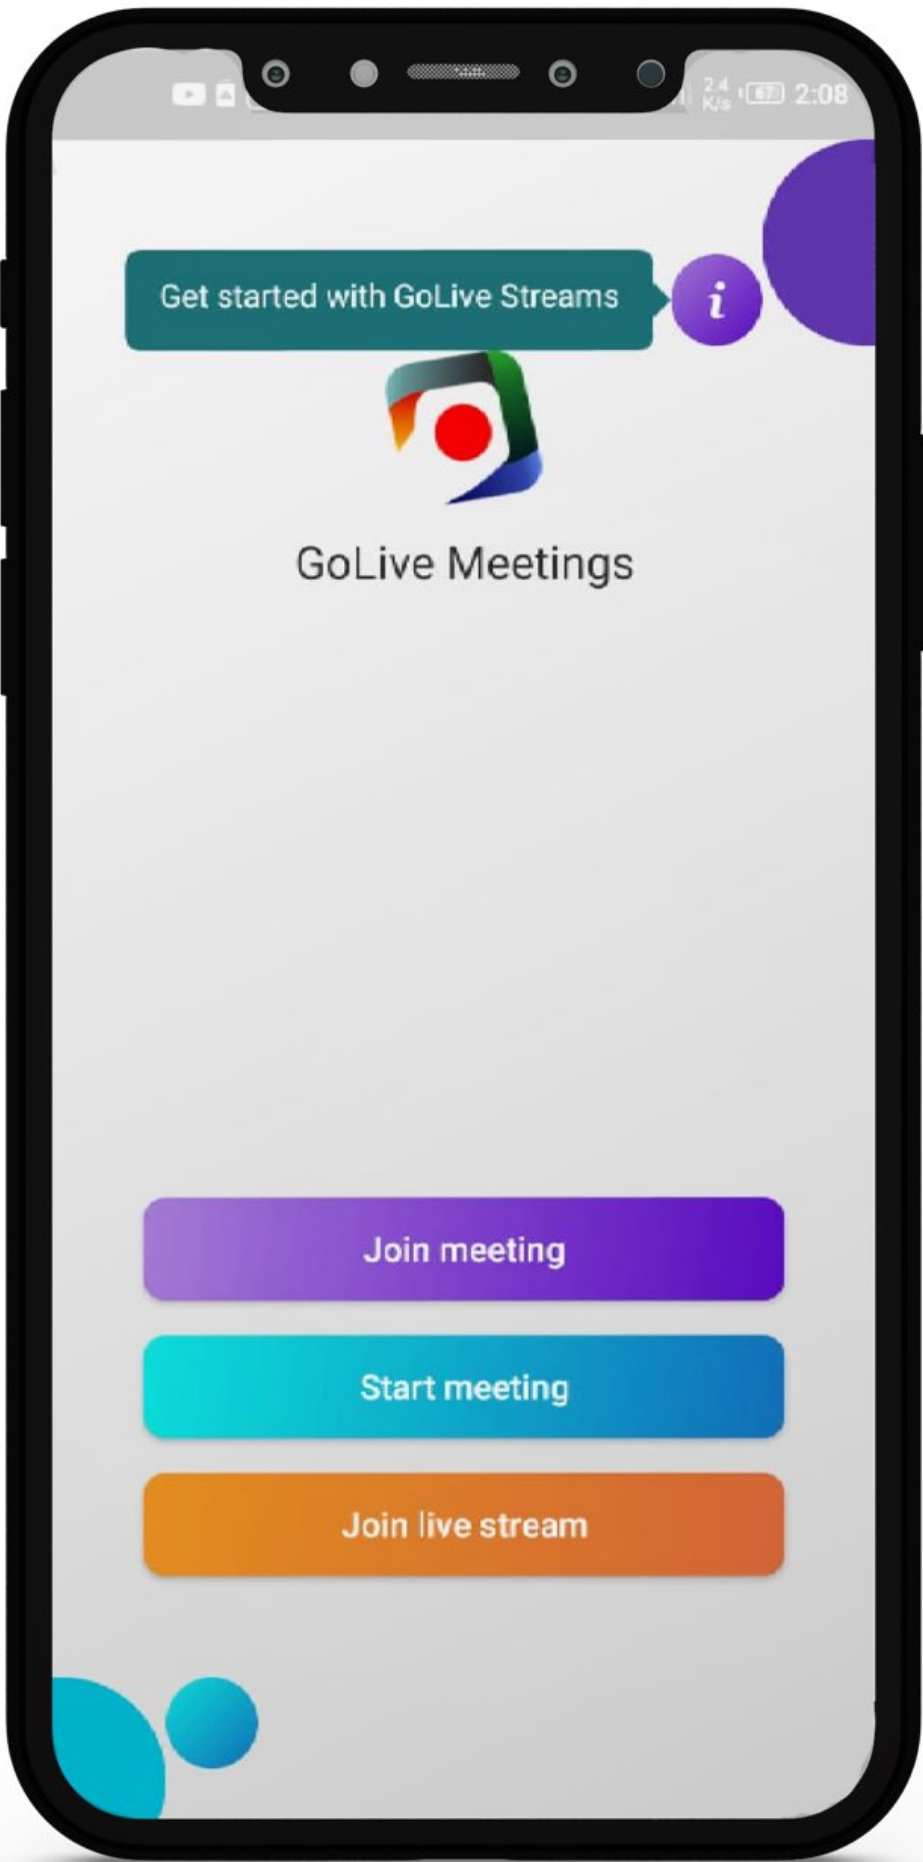

4.5 GoLive Streams

GoLive Streams a new feature in GoLive Meetings App. This enables a live stream from and RTMP server in to GoLive. The Live stream enables large simultaneous connections.

The platform has the following features

1. **Large user connections** : GoLive Streams supports large capacity participation.
2. **Live Chat** : The in-app live chat enables participants to keep up with all comments during live stream.
3. **Attendance tracking**: Attendance is automatically stored and accessible during and after live stream.
4. **Stream History**: A complete history of live stream is stored for during and after live streaming. Records includes , Likes, Total attendance , Comments.

PICTURES : GOLIVE STREAMS

5 REVISED AND IMPROVED PLATFORMS 2022

In this year of The Gathering Clouds, our existing platforms were reviewed and redesigned for a better performance and engagement. Below are the platforms that we reengineered this year.

1. cLoveWorld mobile and web - Live TV and VOD platform.
2. CeTunes mobile and web - Live Radio , music and podcast platform
3. GoLive Meetings web and mobile - Meeting and live streaming platform
4. SRPP - Staff Reporting and Performance Portal
5. LoveWorld Radio App - Live Radio and content platform
6. Virtual church platform - Live church and church management platform

The next slides discusses in detailed the listed platforms

5.1 cLoveWorld

cLoveWorld is a live tv and a video on-demand platform. Over the years till now cLoveWorld has being very instrument is airing live all ministry events such as Your LoveWorld , month global service with Pastor Chris, global day of prayer with pastor Chris etc.

cLoveWolrd also host lot of entertainment, life style and educational on-demand contents. Not forgetting the language channels such as LoveWorld EURO TV, LoveWorld CASA TV etc.

Several report and testimonies have being records as a result of the rich contents and programming of the TV channels on the platform.

This year the platform was tasked to deliver the best of the best in content and improved users engagement. Expectations were exceeded.

New features were added to the platform and a lot of improvement done to both the Android app and website to make this possible.

The next slides discusses in detailed the features added to the android app.

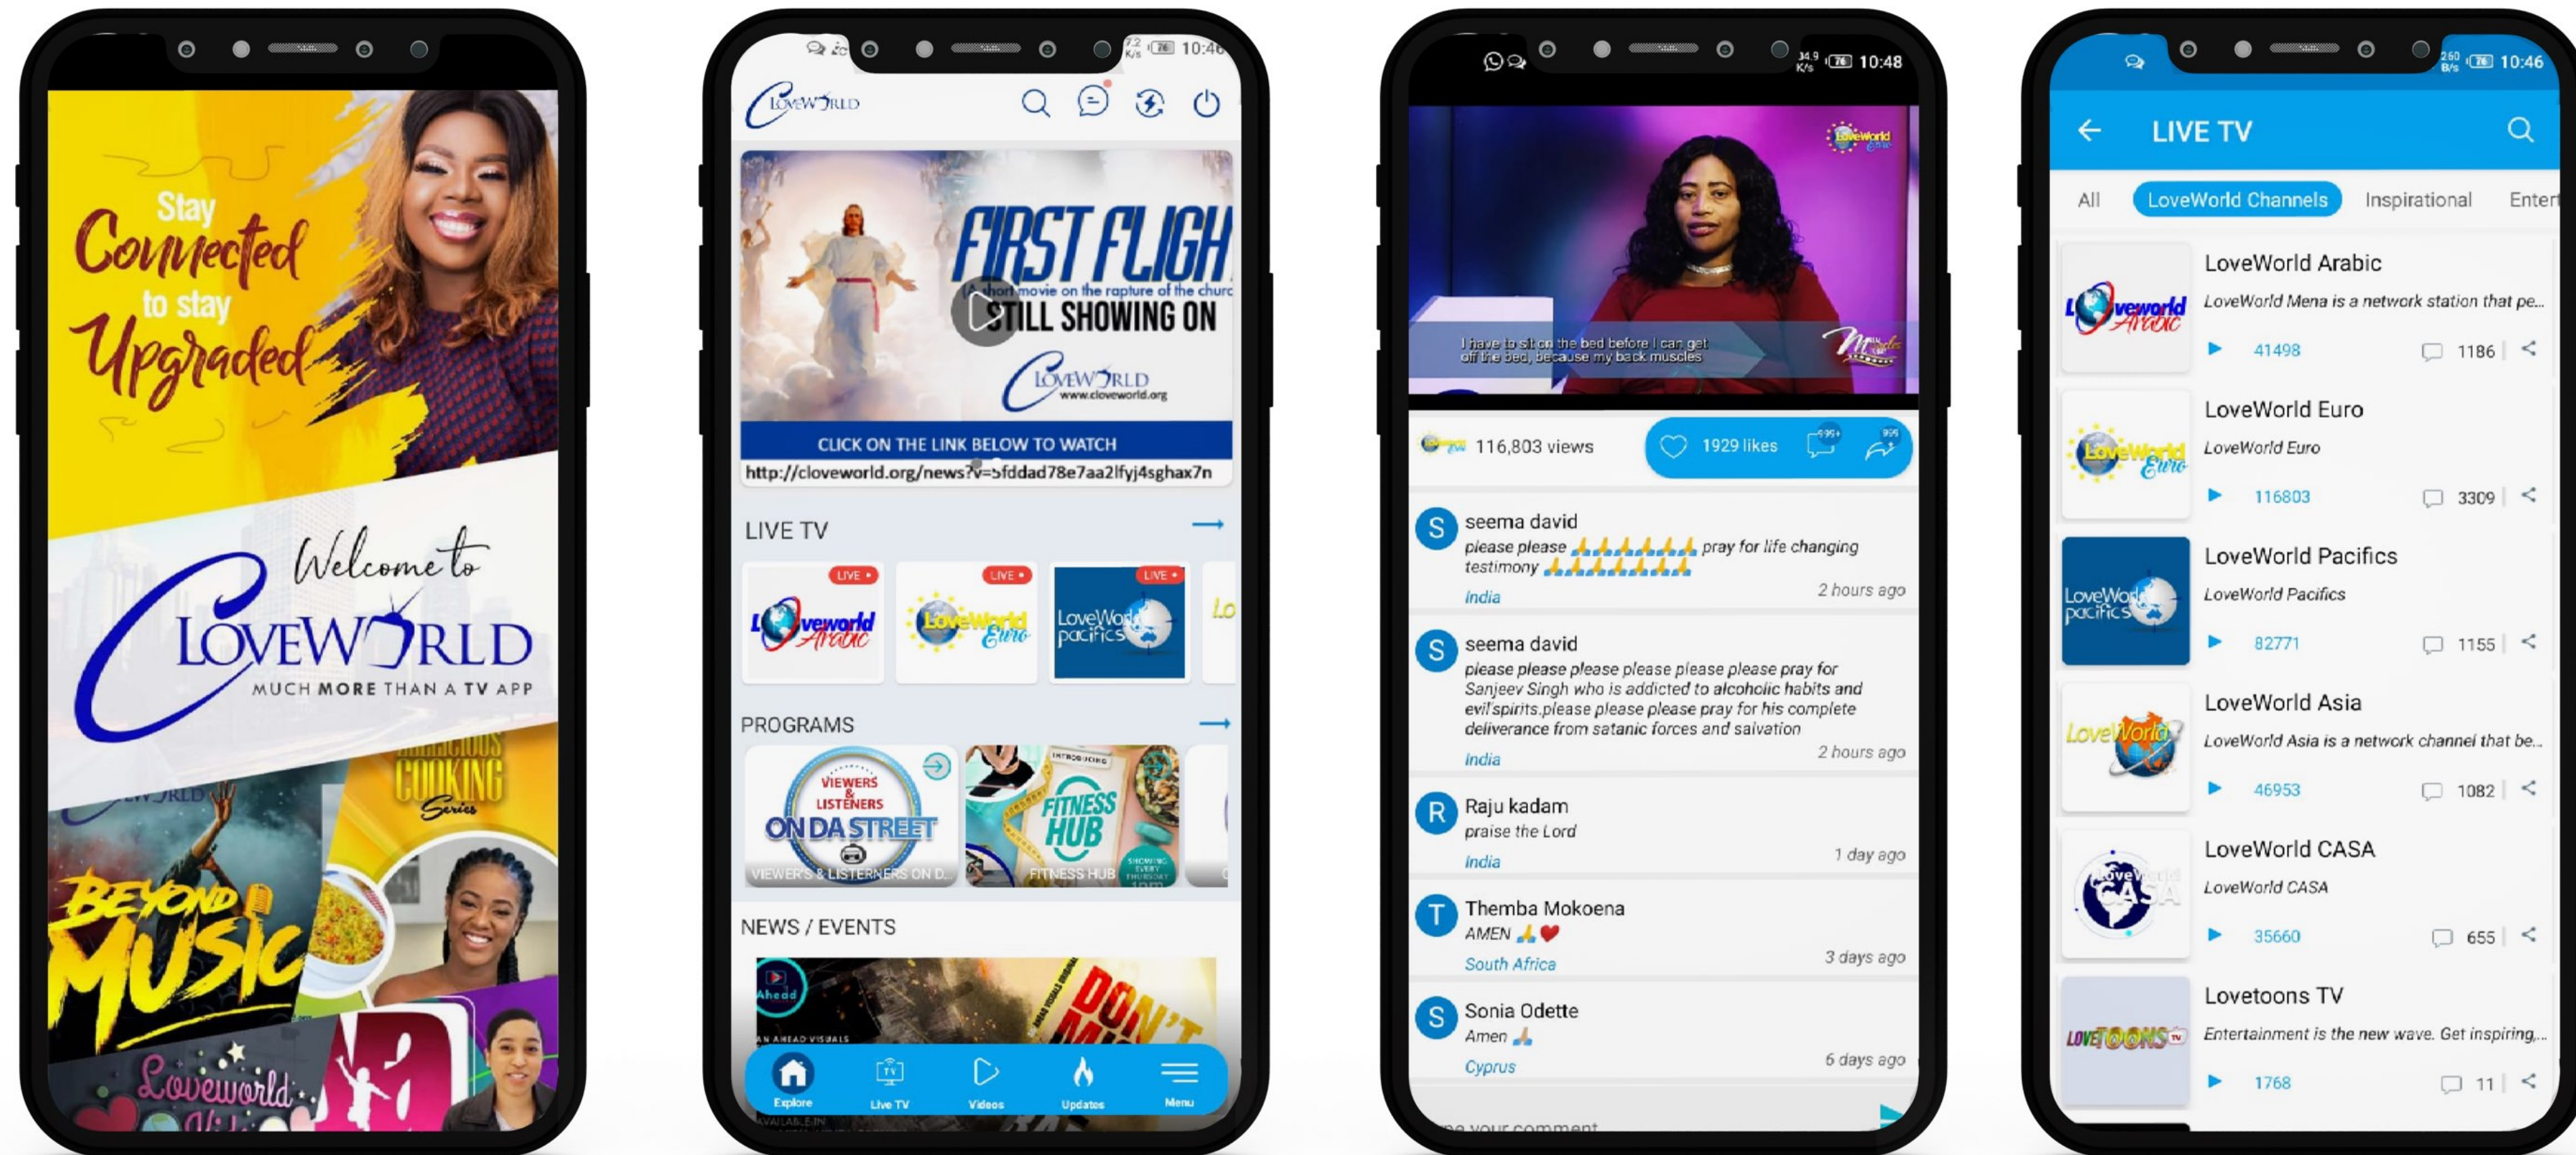

5.1.1 cLoveWorld Android App

cLoveWorld Android is compatible with about 98% of existing android apps and tablet. Below are some features added to the new app.

1. Redesigned interface - Aside the classic and elegant look of the new UI, I also ensured new videos, trending news and Live channels are accessible without scrolling on the home view. A lot of users expressed their satisfaction in this new look of the mobile app.
2. Migration to cloud server - The VOD's and news feeds were formally hosting on a streaming server. On a high traffic day, the playout buffers a lot. This year, we migrated all VOD's and news feeds to a cloud server. With the high capacity of the server, videos plays smoothly even on a high traffic day.
3. Introduction of Live database server - The introduction of Live database server as resolved the delay in news feeds showing when published. Now a news published appears almost immediately without the user refreshing .
4. Pop-up for live events - This feature prompt users of live events. So no need searching for where the event is happening.
5. Pop-up for missed VOD's - The intelligent nature of this new app monitors videos you have watched. If you missed any new upload , it prompt you to watch when next you visit the app.
6. Improved push notification system - The new push notification system integrated into this new update ensures delivery of notification even is the app is in background mode
7. Picture-in-Picture mode - This P-in-P feature ensure you continue watching you video when the app is minimised.
8. Richer video player - The video player has also being improved to intelligently resume playback when the same video is clicked on.

The screenshots in the next slide.

PICTURES : CLOVEWORLD ANDROID APP

cLoveWorld statistics on the next slide

5.1 cLoveWorld Statistics

cLoveWorld has successfully reached **6,639,616 people** in **206 countries** with a total of **402,288** constant returning users and **total comment of 63, 982.**

5.2 CeTunes

CeTunes is a live radio and audio content platform. Over the years till now CeTunes has being in the forefront of promoting LoveWorld musics and also very instrument is airing live all ministry events such as Your LoveWorld , month global service with Pastor Chris, global day of prayer with pastor Chris etc.

CeTunes hosts over 270 live 100% gospel radio station world wide. Its also know for it's wide catalog of ministry songs.

This year the platform was tasked to deliver the best of the best in content and improved users engagement. Expectations were exceeded.

New features were added to the platform and a lot of improvement done to both the Android app and website to make this possible.

The next slides discusses in detailed the features added to the web.

5.2.1 CeTunes Web

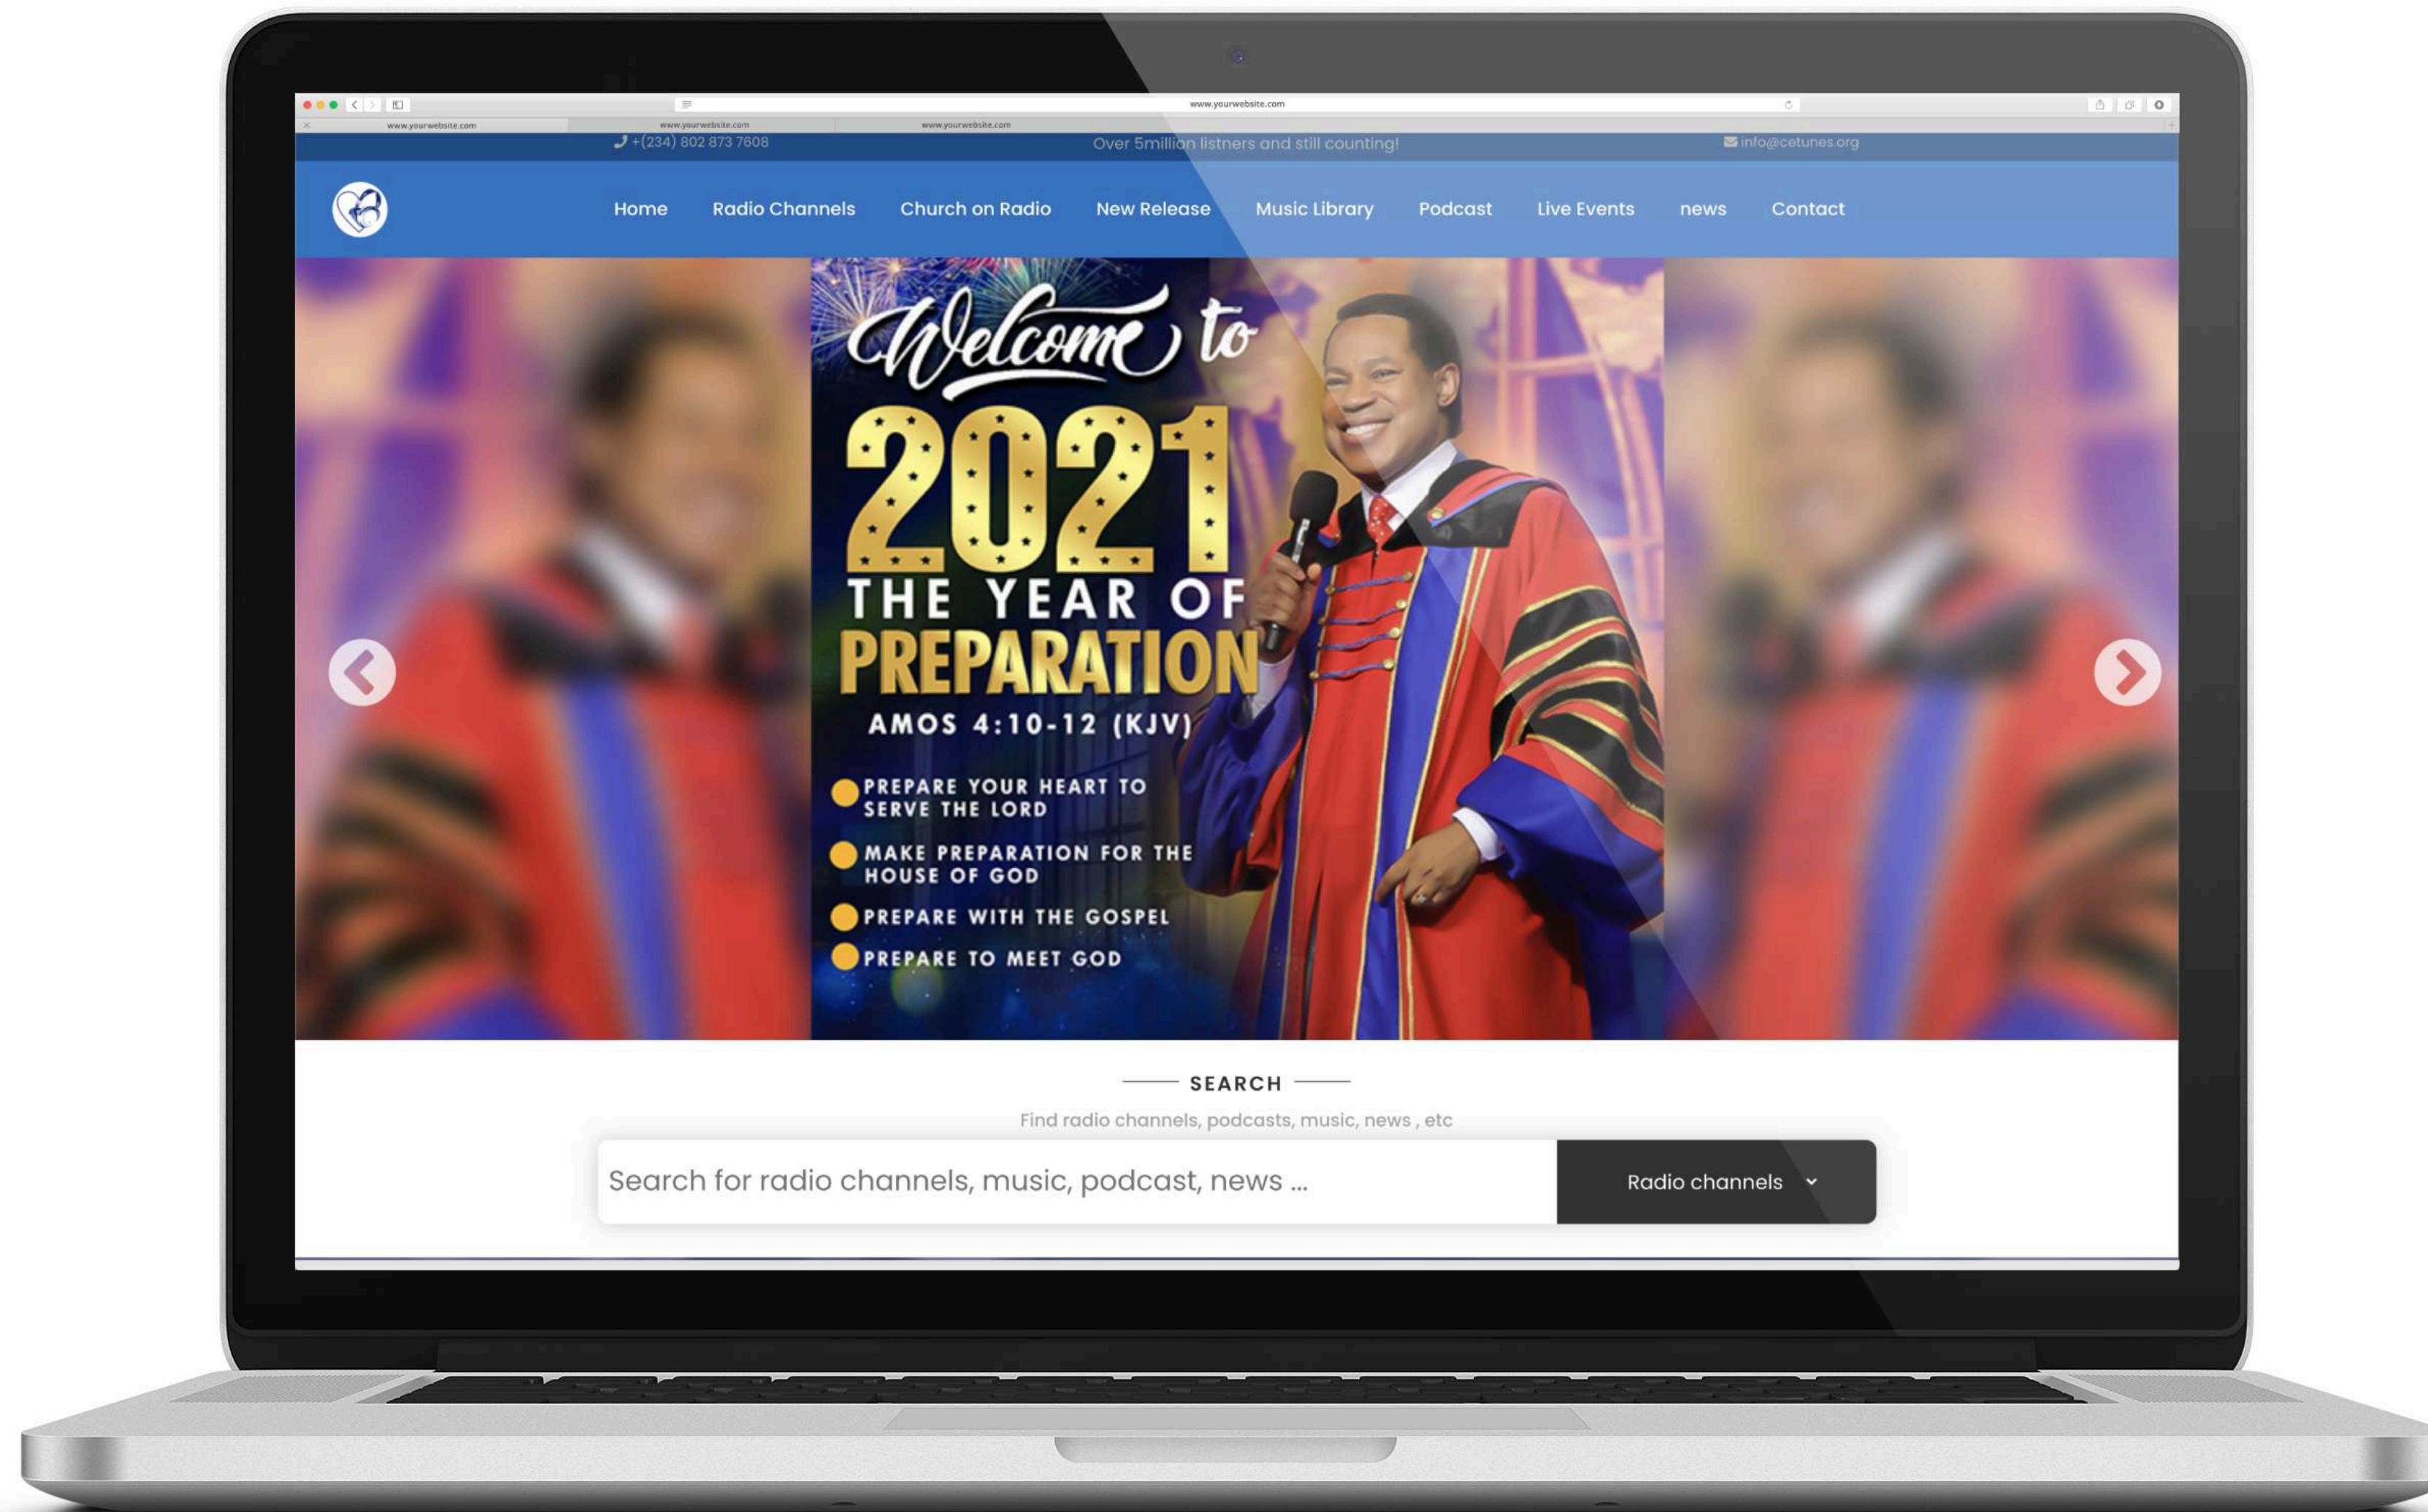

CeTunes web is a responsive website with platform compatible on all web and mobile browsers. Below are some updates on the website

1. Redesigned interface - The rich and sleek feel of the new CeTunes web has made it very easy to navigate the site and find a station, music, podcast and new events.
2. Podcast - The podcast session is loaded with hundreds of episodes of hot trending topics.
3. Music library - The new music channel host lots of LoveWorld music and other amazing gospel musics.
4. Event channel - Never miss out on Your LoveWorld , Global Service with Pastor Chris etc in audio only. CeTunes presents the audio format of all events to you live.
5. Church channel - This channels archives church radio channels. This channels are owed by churches are used for daily and weekly church services.
6. Pop-up for live events - This feature prompt users of live events. So no need searching for where the event is happening.

The screenshots in the next slide.

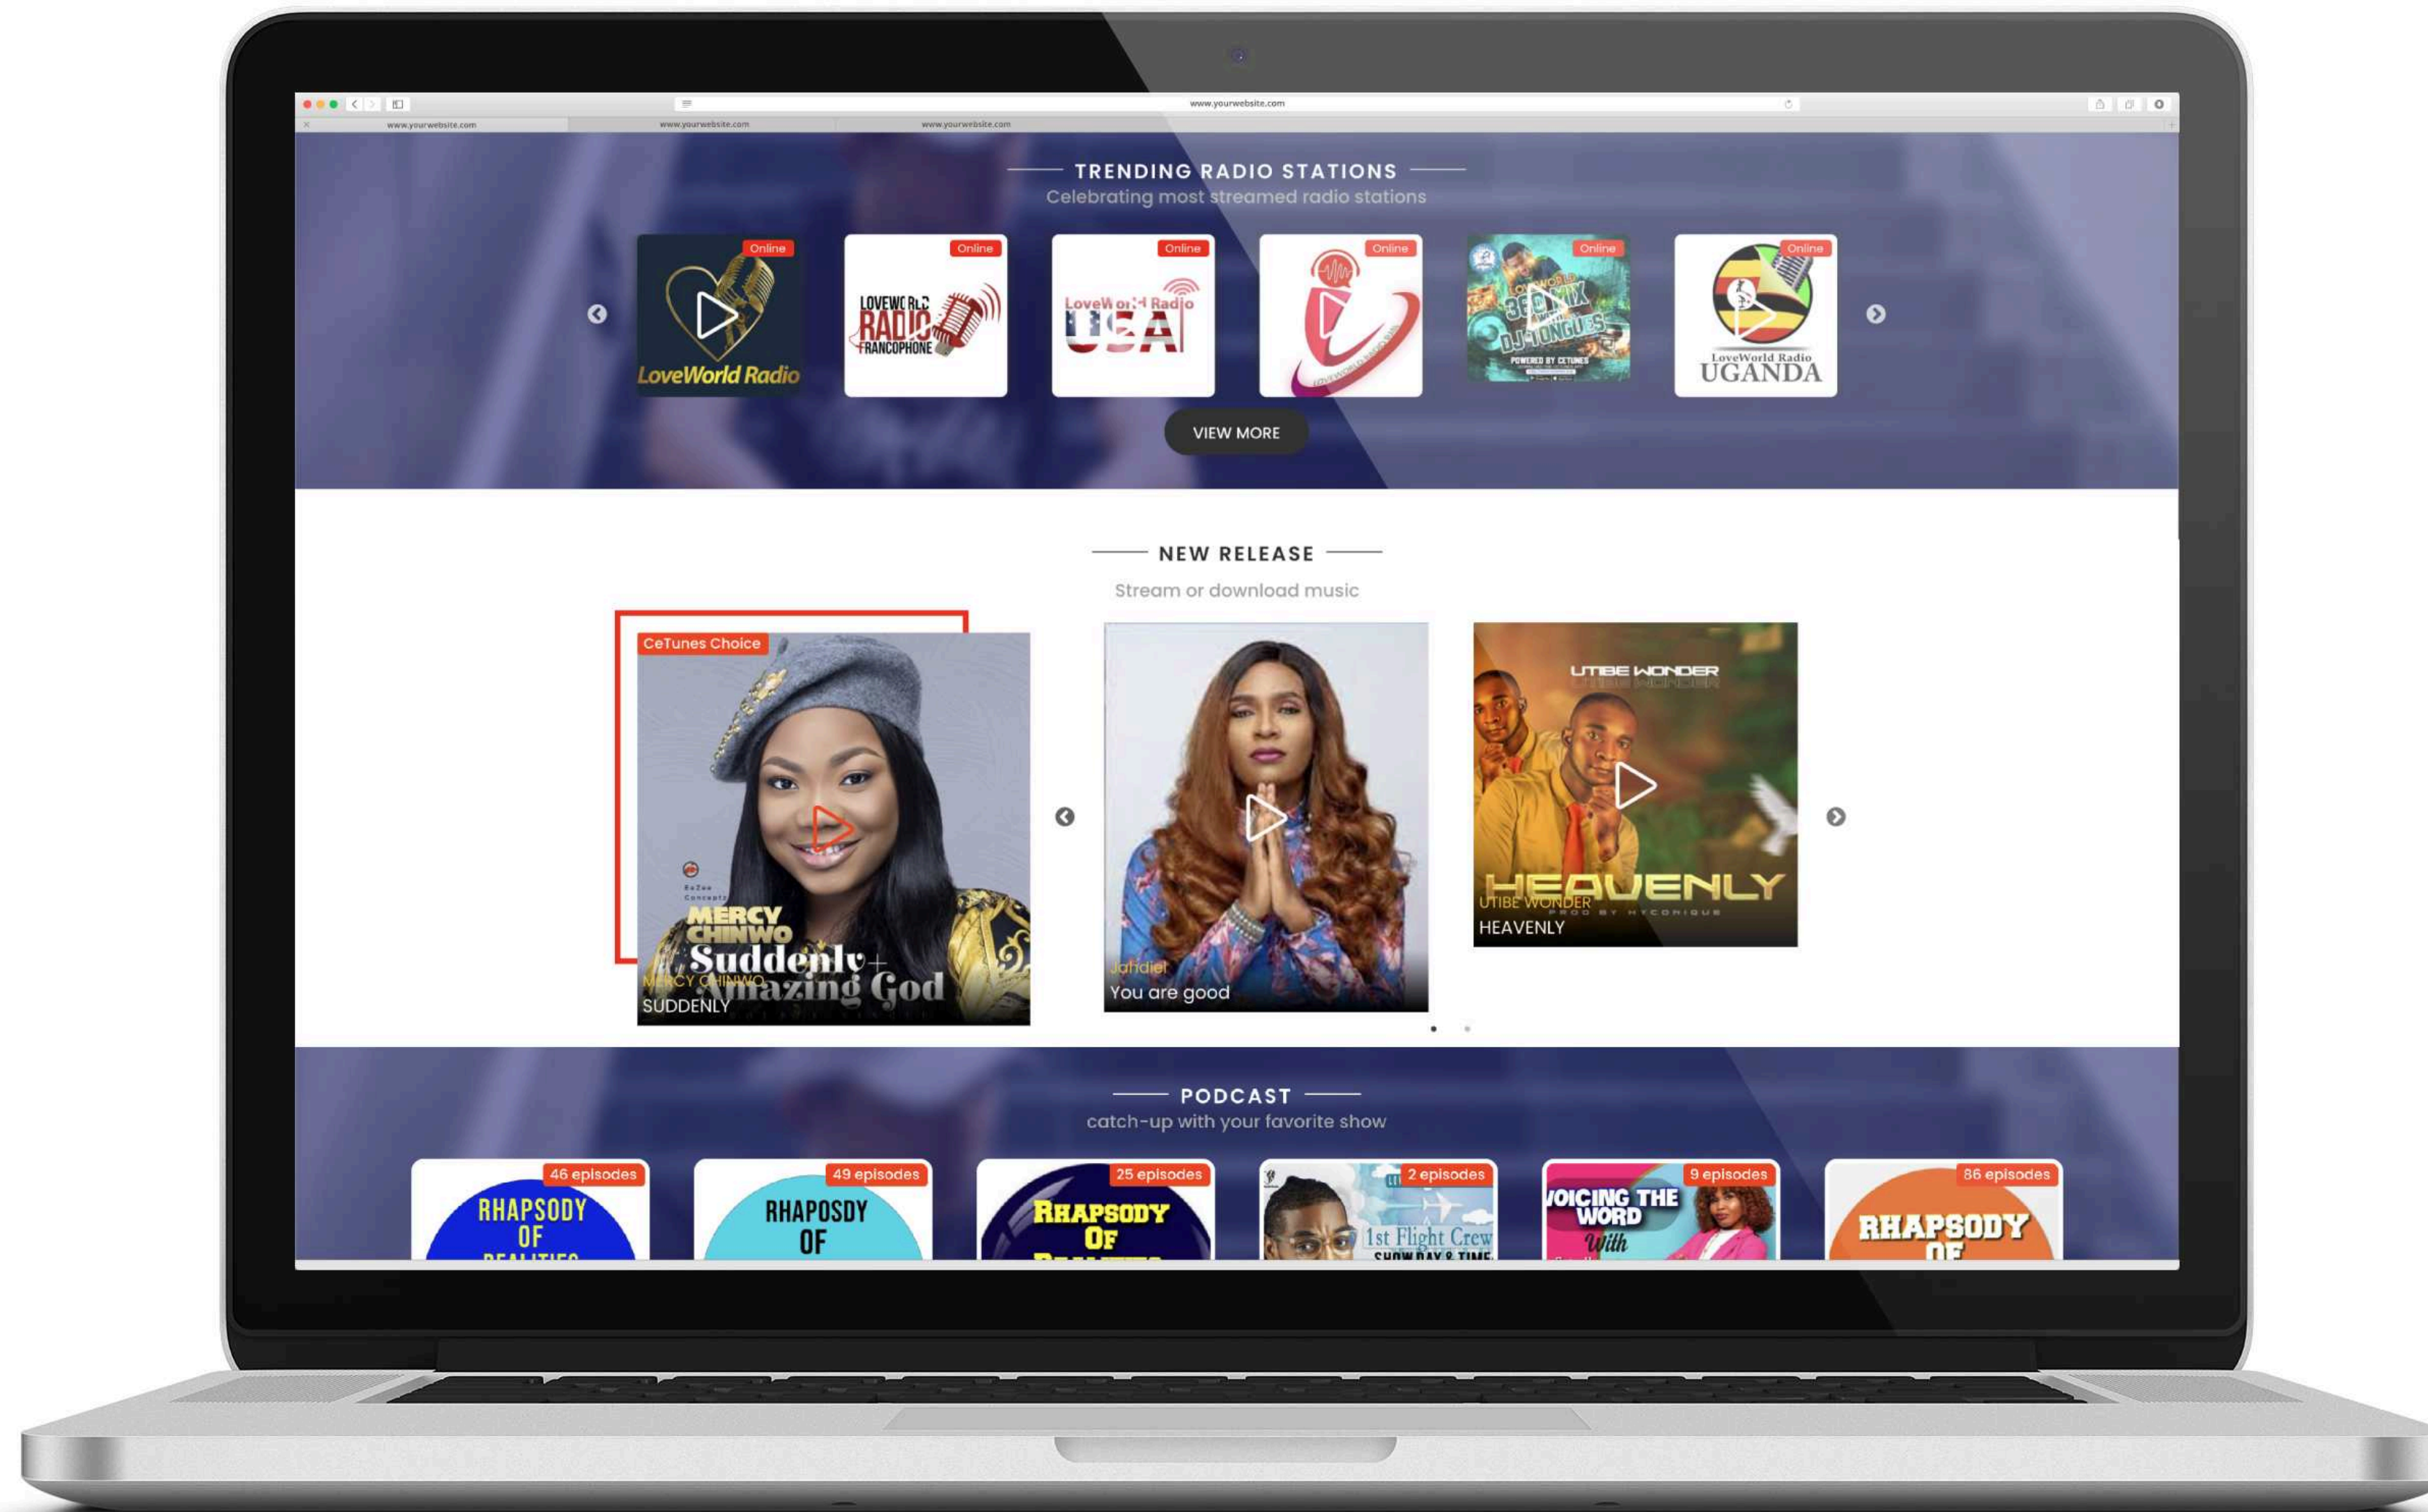

5.2 CETUNES WEB

CeTunes Web Landing page

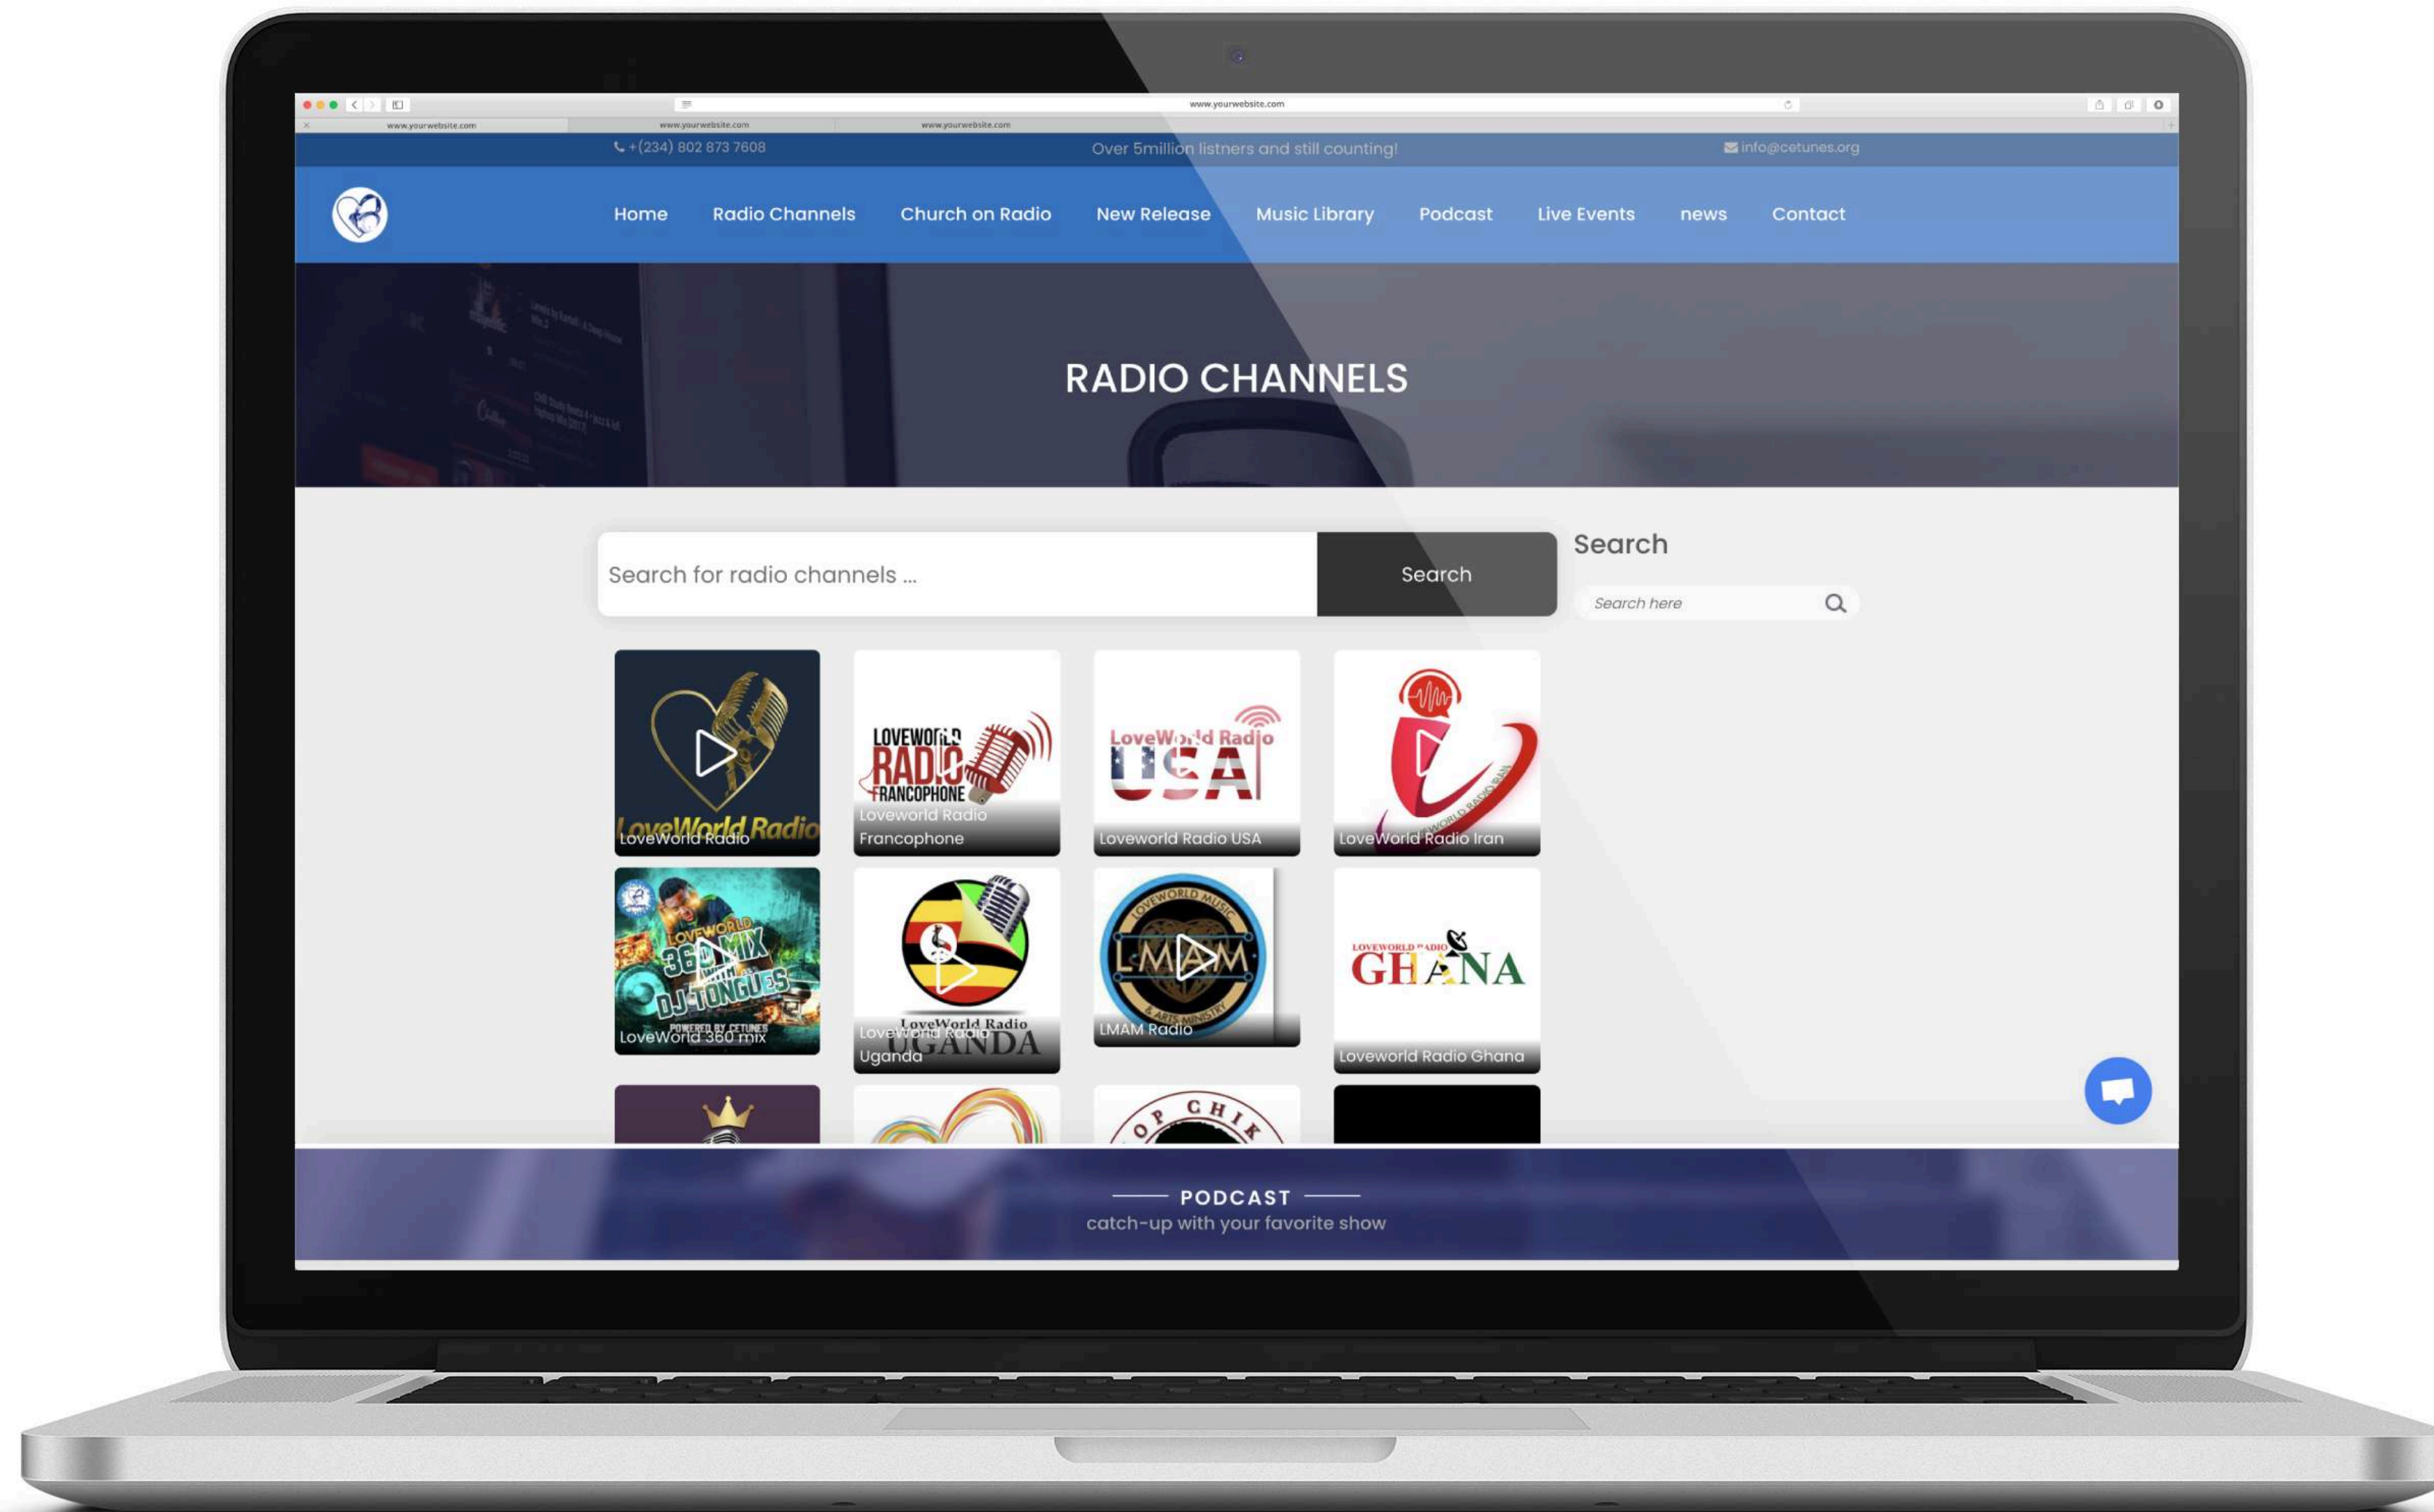

5.2 CETUNES WEB

CeTunes Web landing page

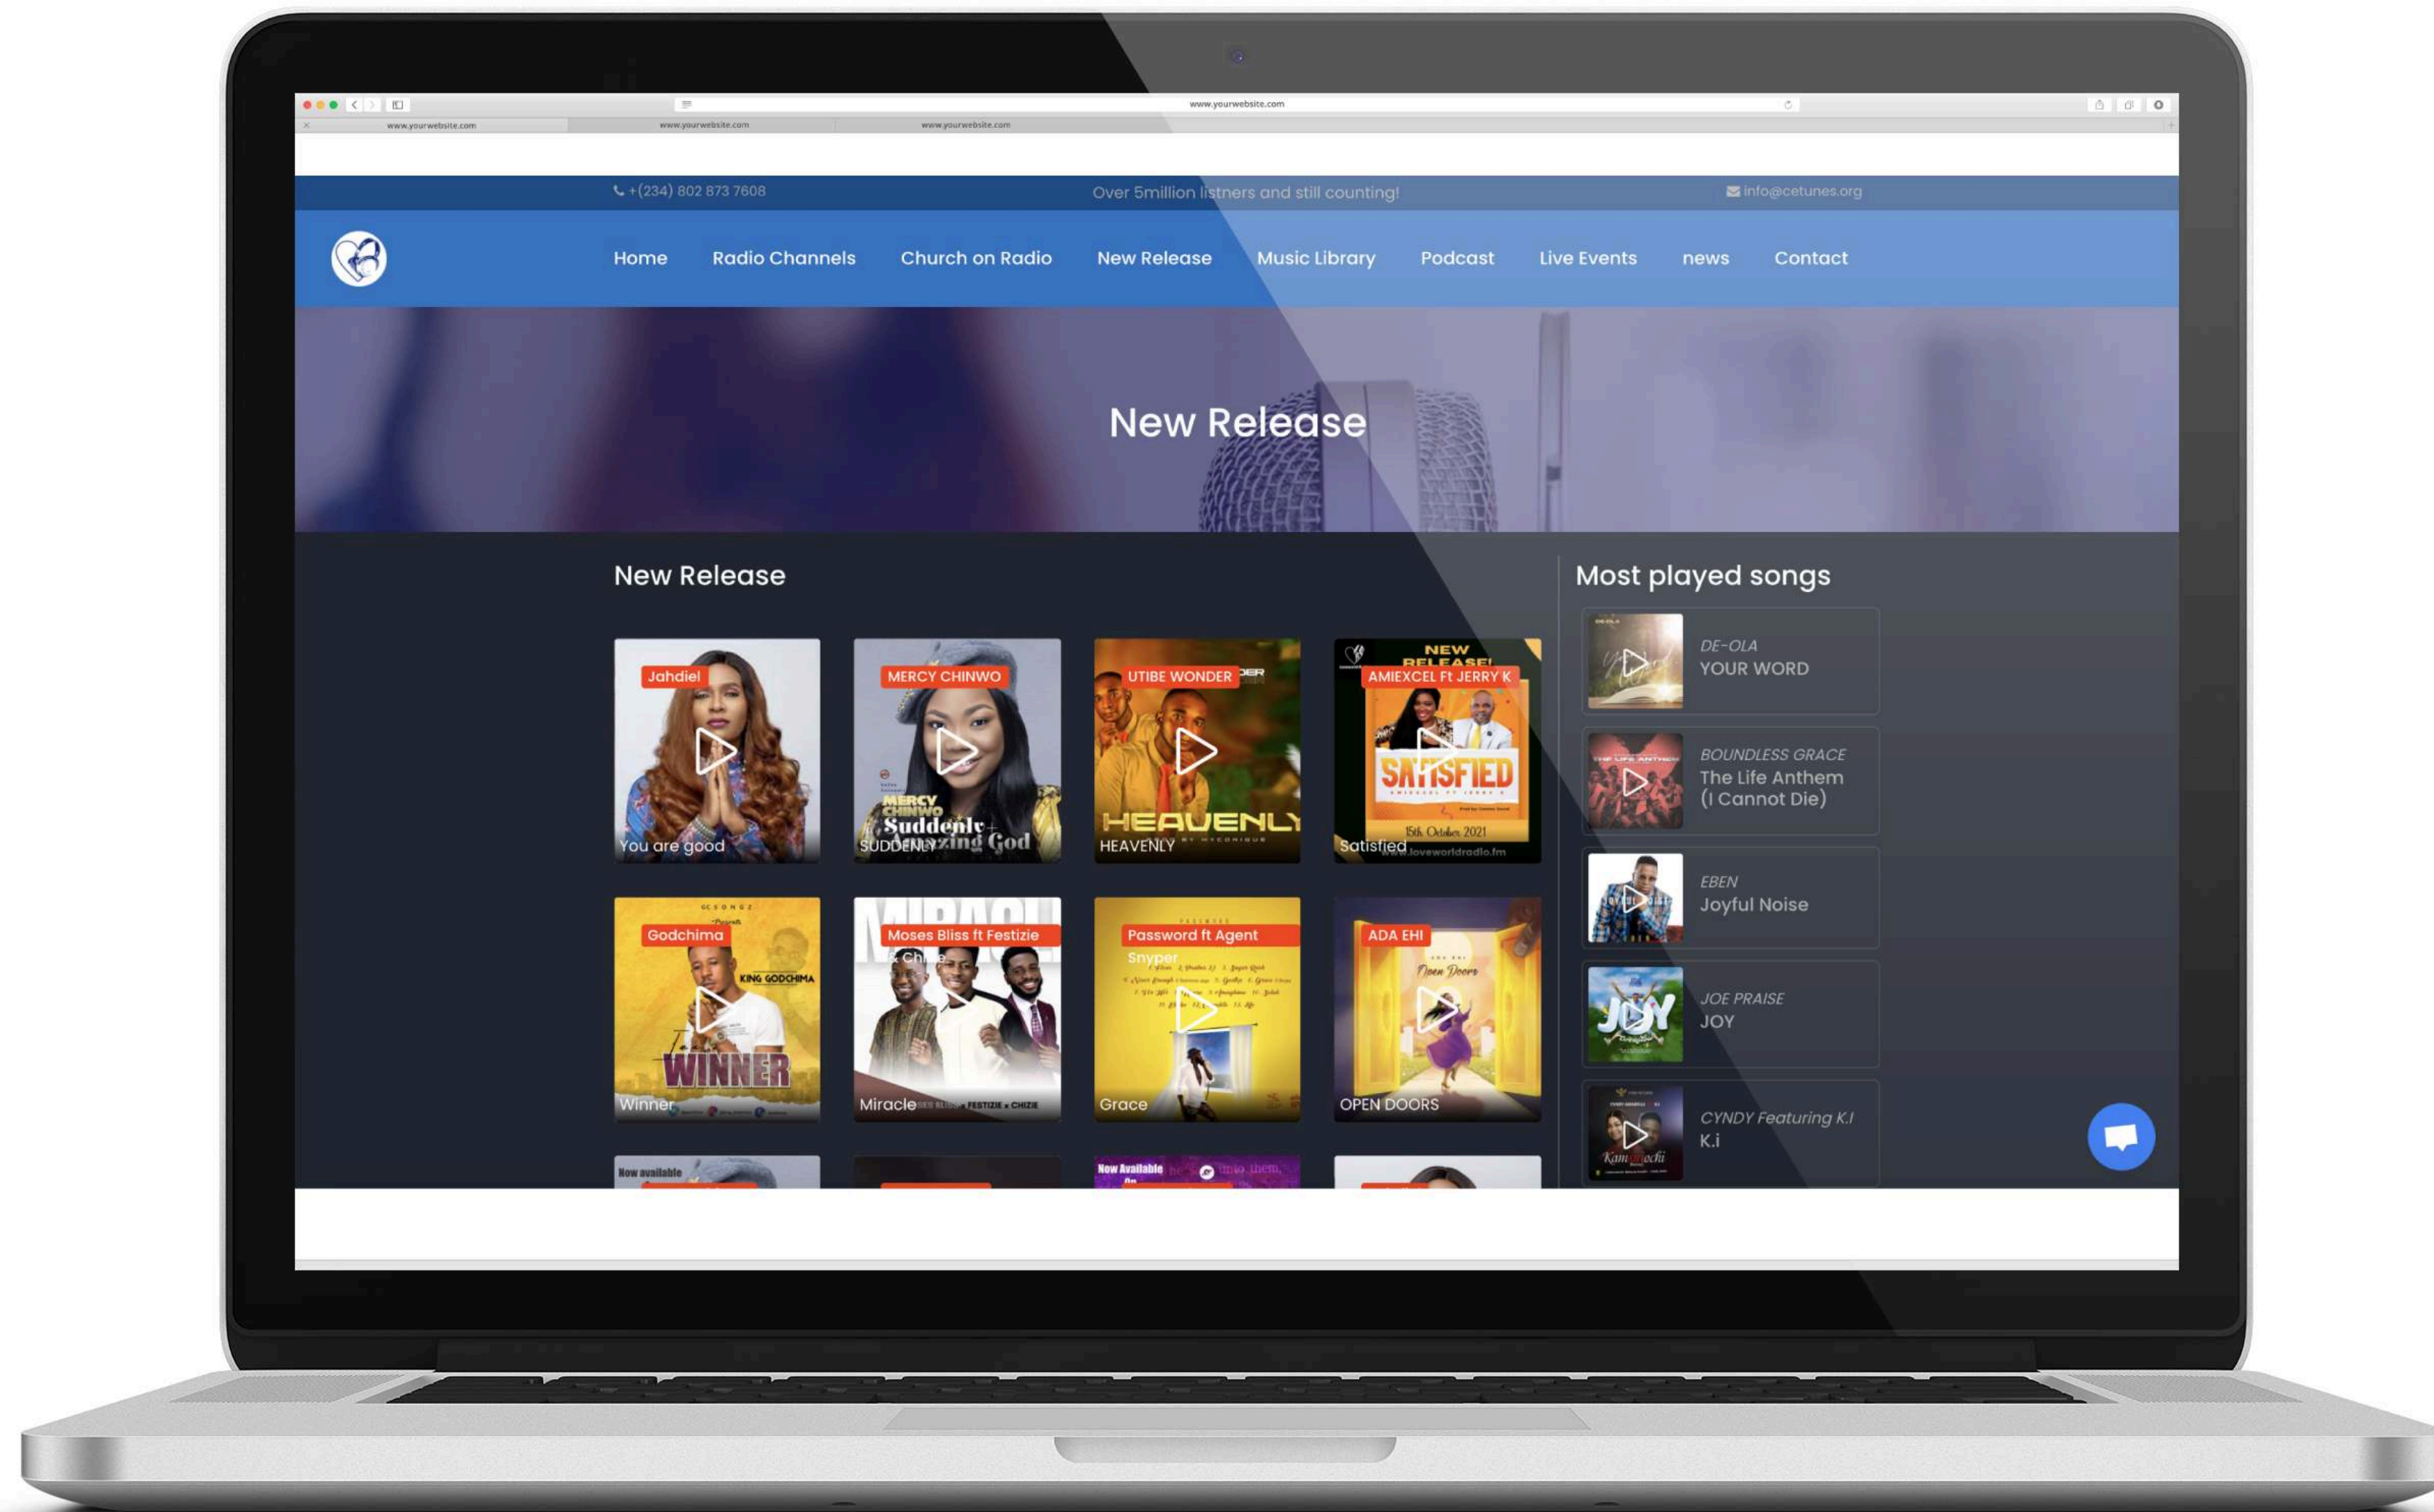

5.2 CETUNES WEB

CeTunes Radio channels

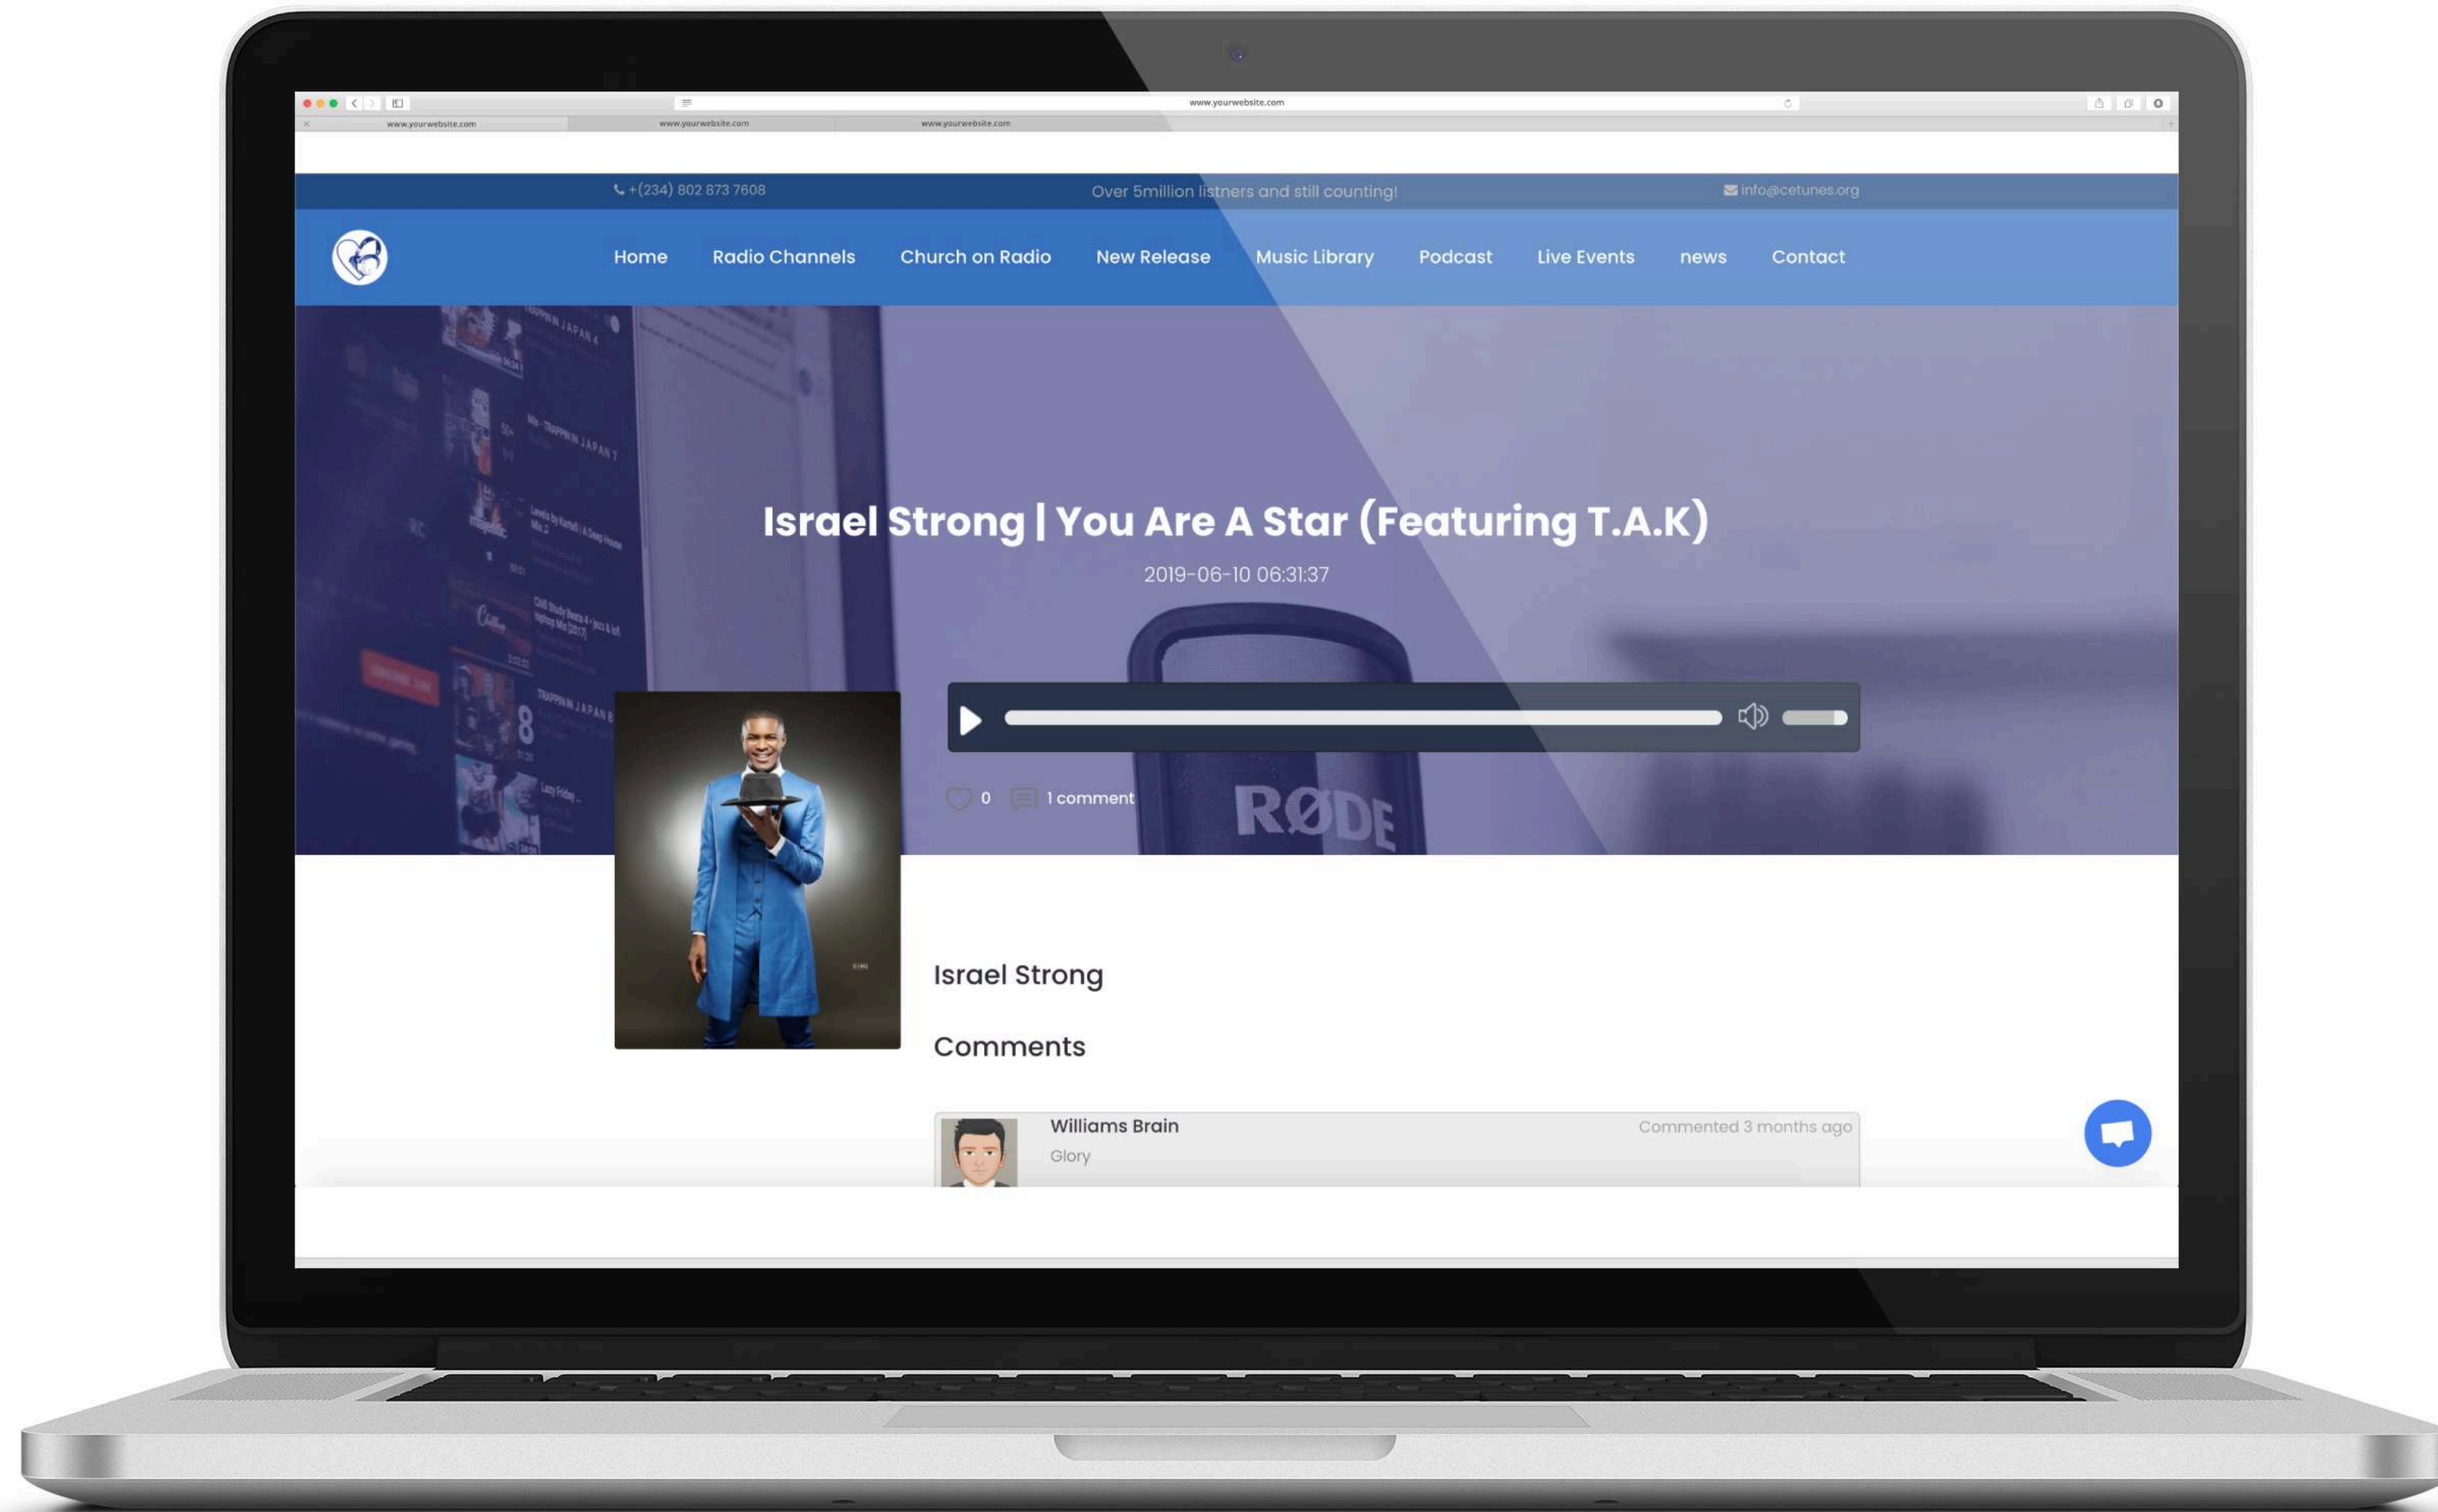

5.2 CETUNES WEB

CeTunes New Releases

5.2 CETUNES WEB

CeTunes Music Player

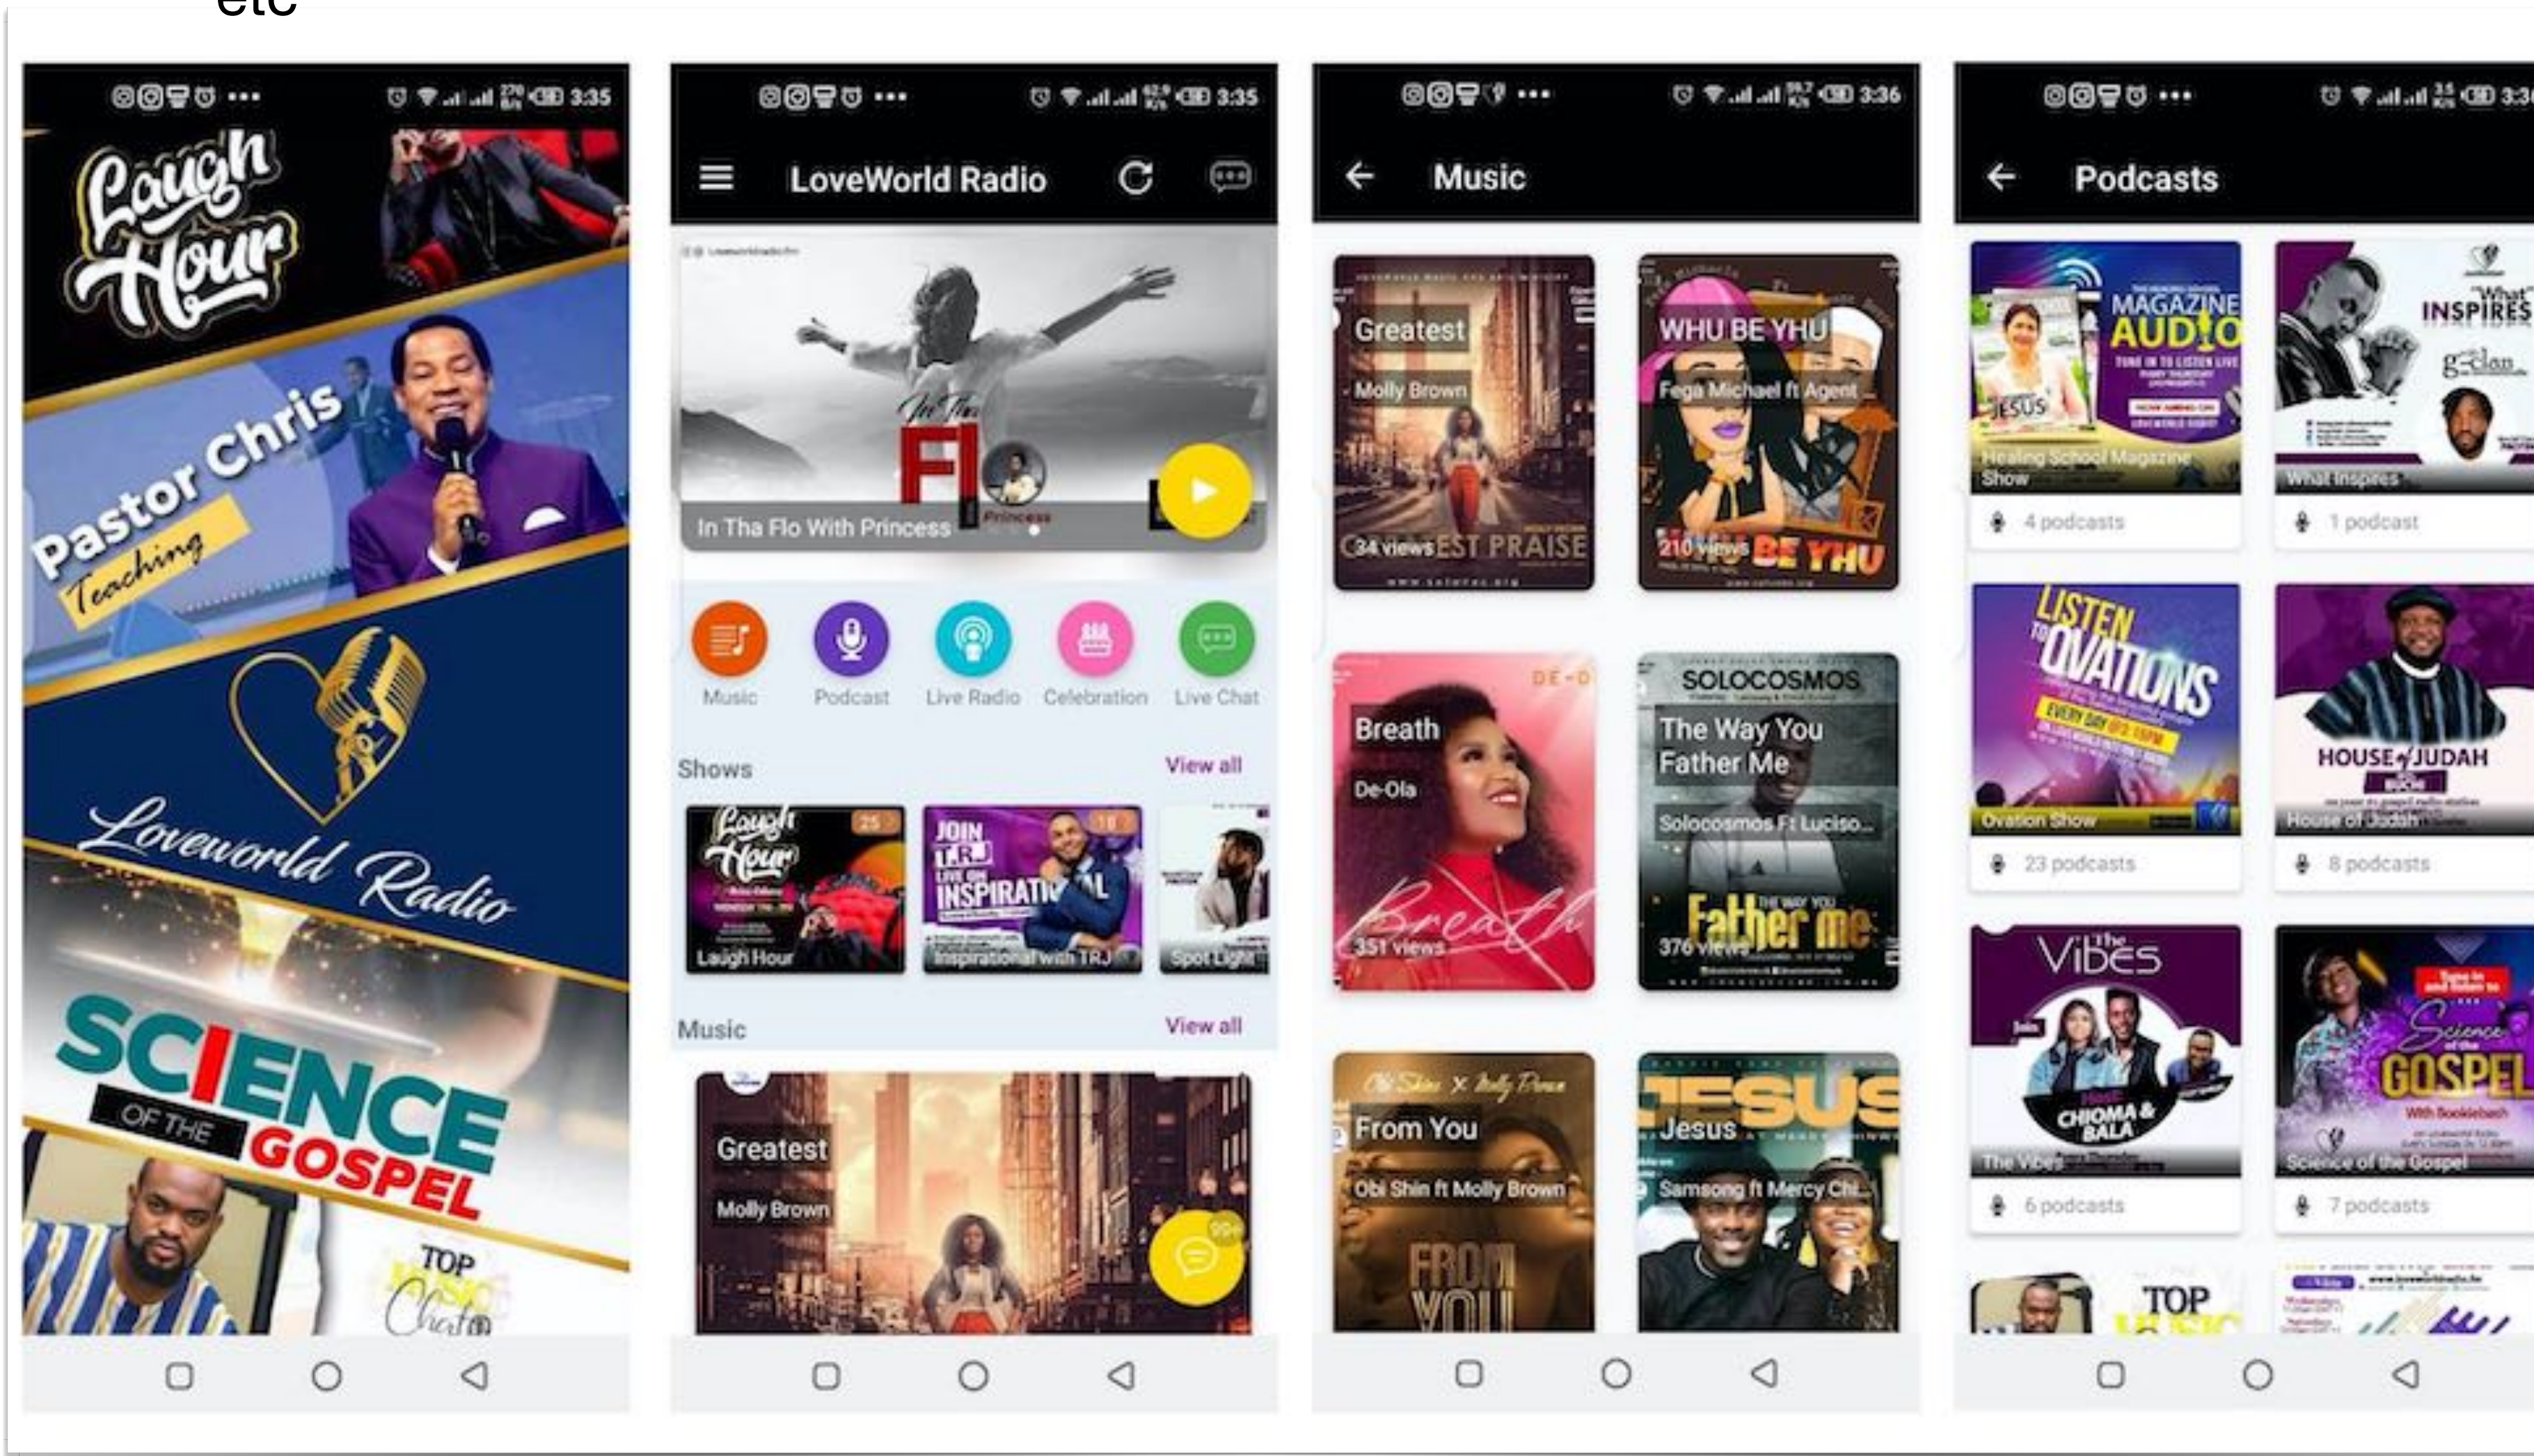

5.2 CeTunes Statistics

CeTunes has successfully reached **2,963,049 people** in **215 countries** with a total of **127,821** constant returning users and **total comment of 25,491**.

LoveWorld Radio Mobile App 2022 Update

In this year of The Gathering Clouds, the LoveWorld Radio Mobile App has been updated with new features such as , New release , Podcast, Celebration etc

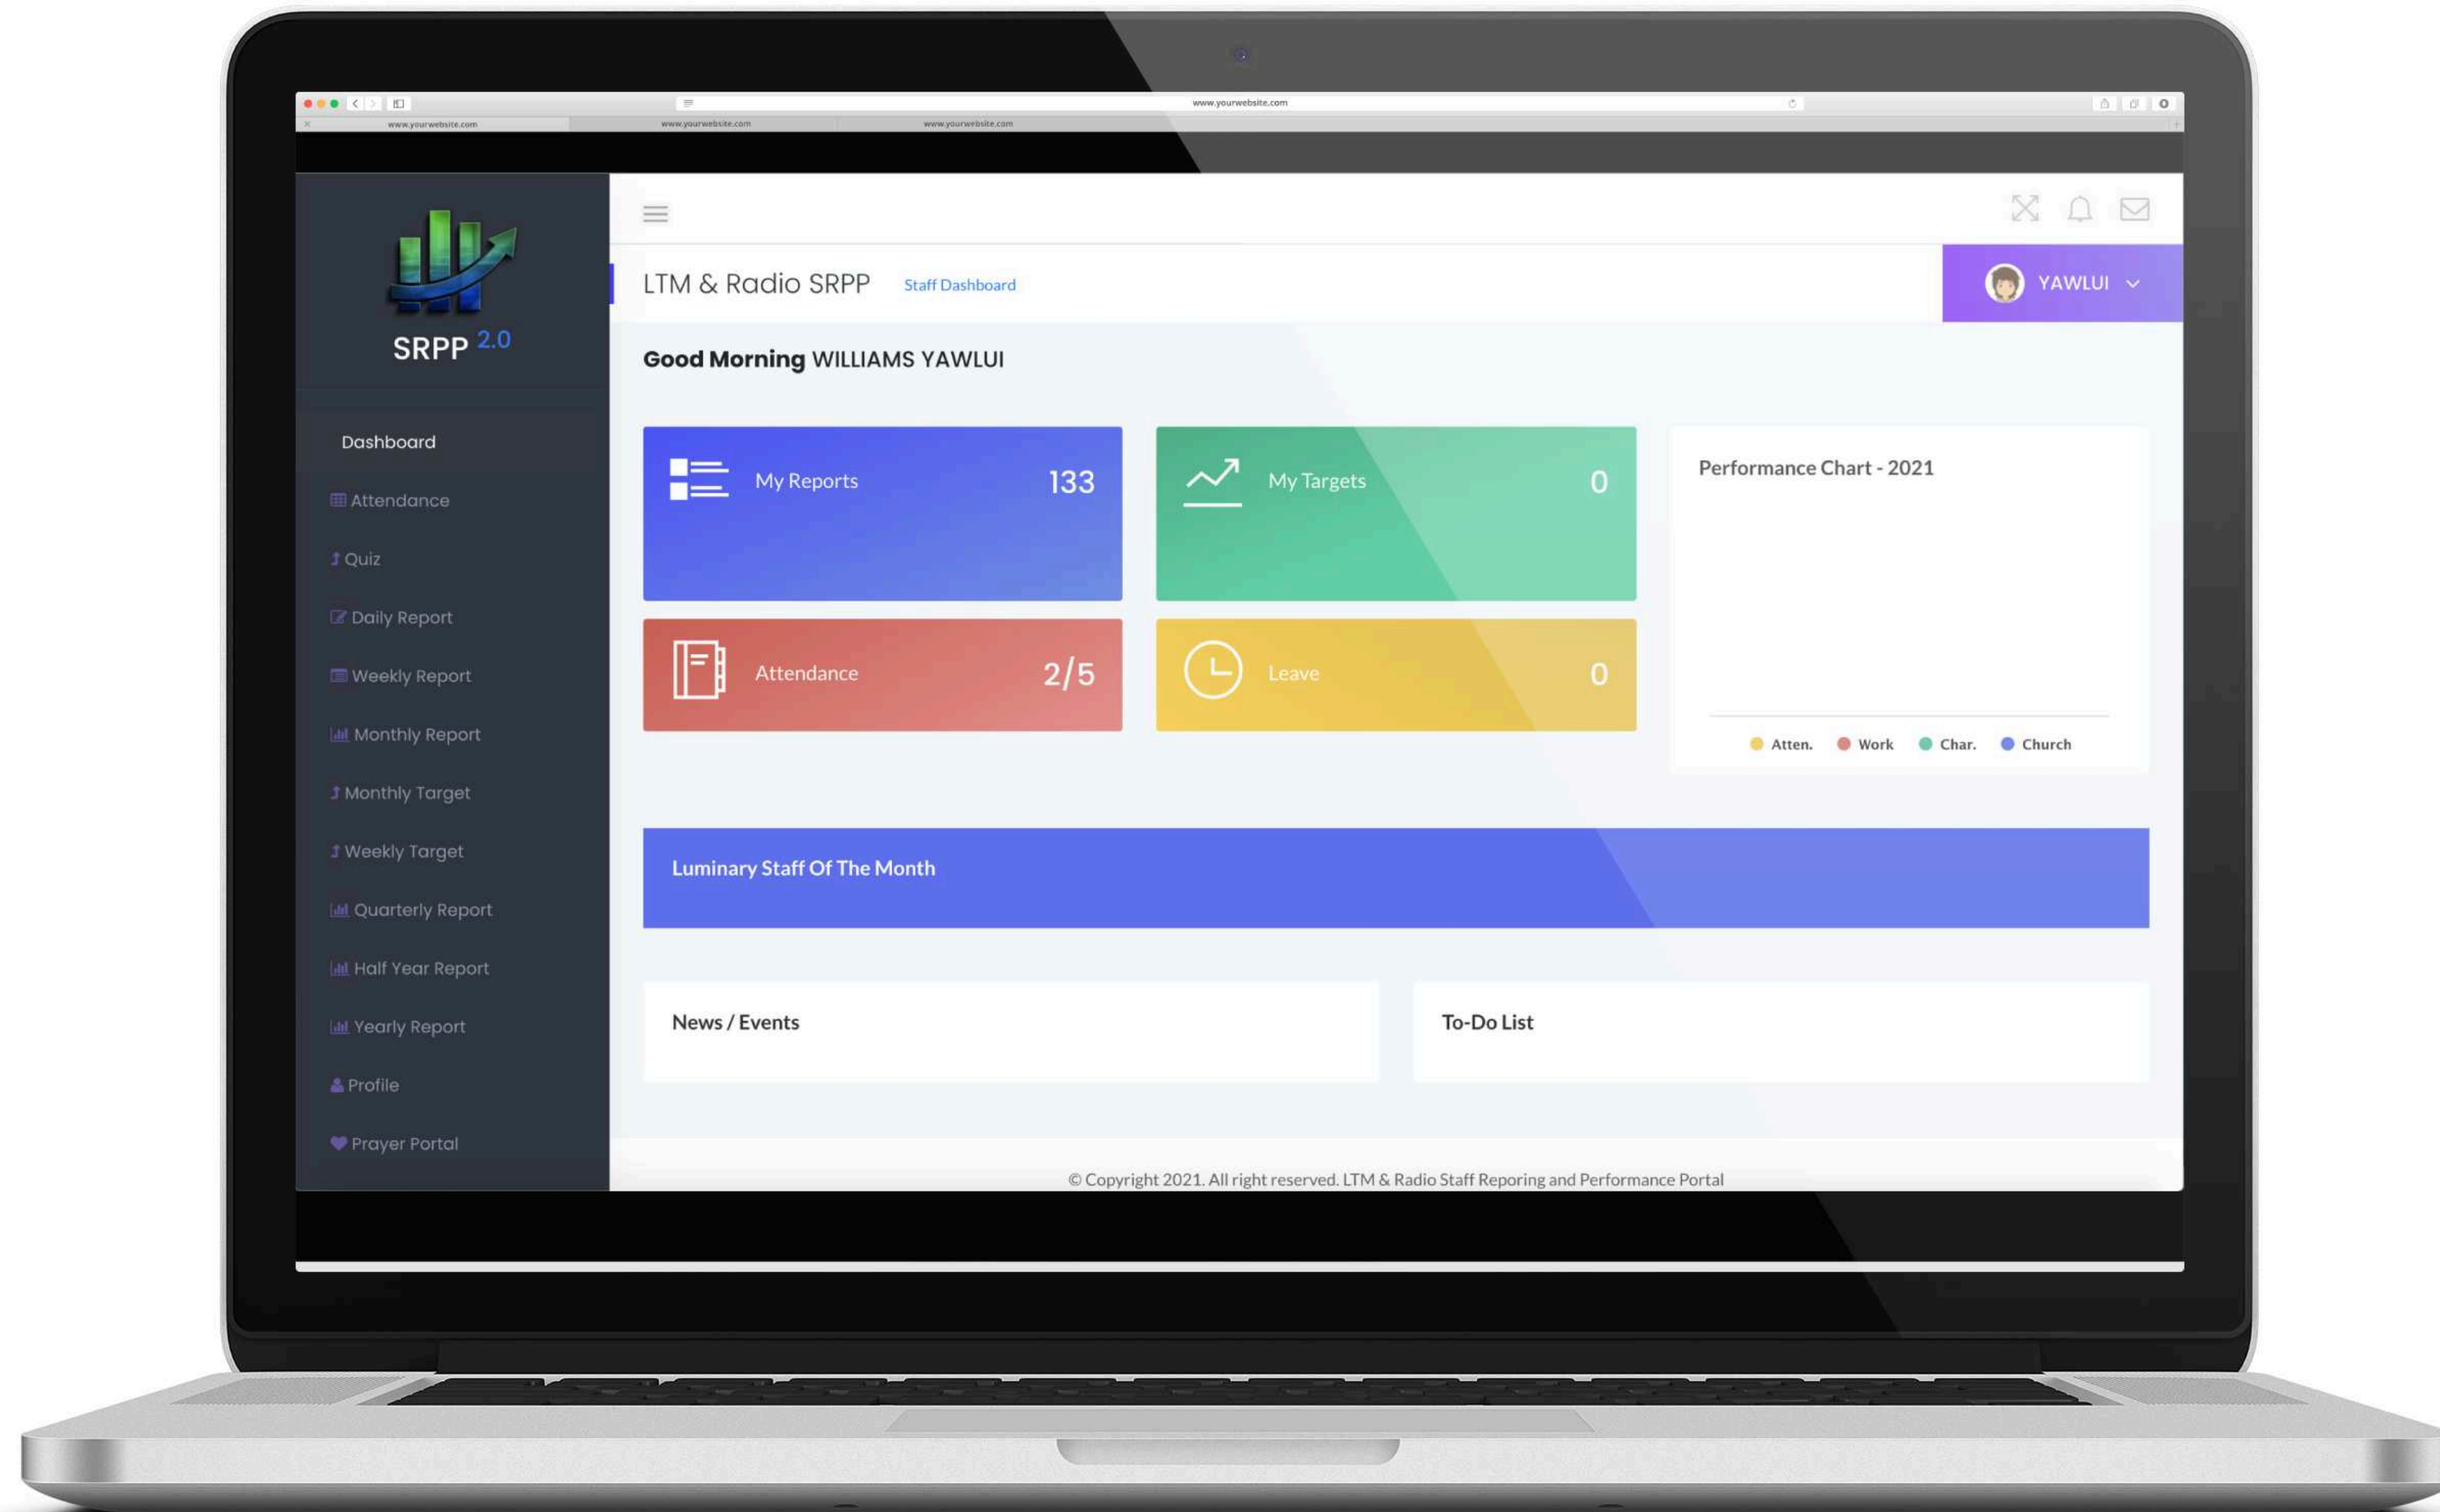

5.5 Staff Reporting and Performance Portal (SRPP)

LTM & Radio Staff Reporting and Performance Portal (SRPP) is a multi-functional portal housing daily, weekly, monthly ,quarterly, half year and yearly report.The portal also has attendance manager, quiz manager and leave manager.

The pictures of the portal is in the next slide.

4. New Platforms 2022

KINGSVIEW

KingsView Platforms

4.1 KINGSVIEW.TV

KingsView started as an idea in 2020, to develop a world class and competitive morally centric movie platform.

The design started in 2022 and was broken into phases.

In March 2022 the Android version was completed and available for testing. Following was the website , iOS and lastly Smart TV version.

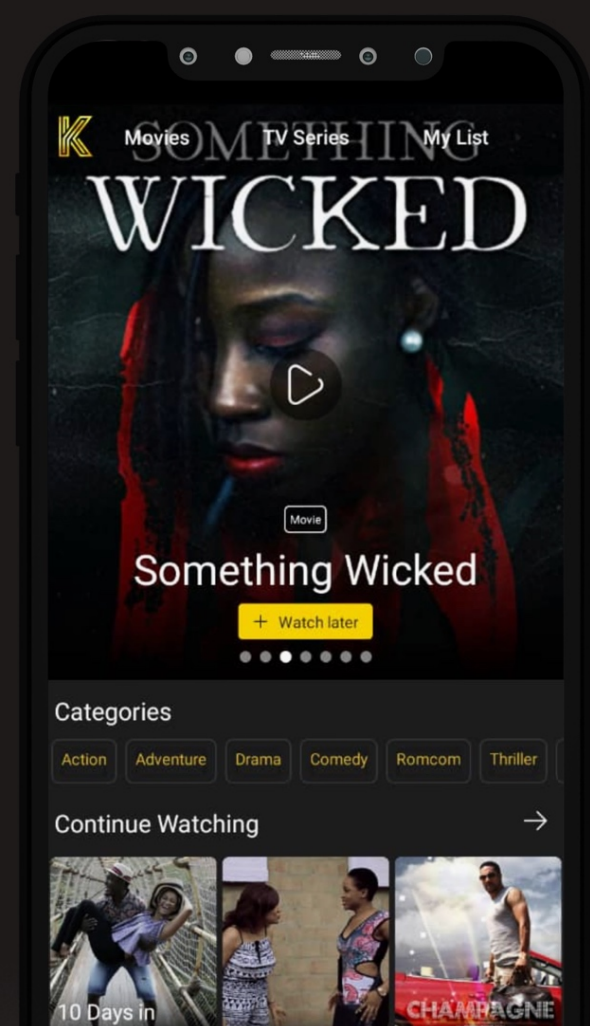

In total KingsView is accessible on 4 different platforms (Android phone & table, iPhone & iPad, Web, and Smart TV).

The contents on KingsView are thoroughly screened and verified to be morally centric suitable for the entire family.

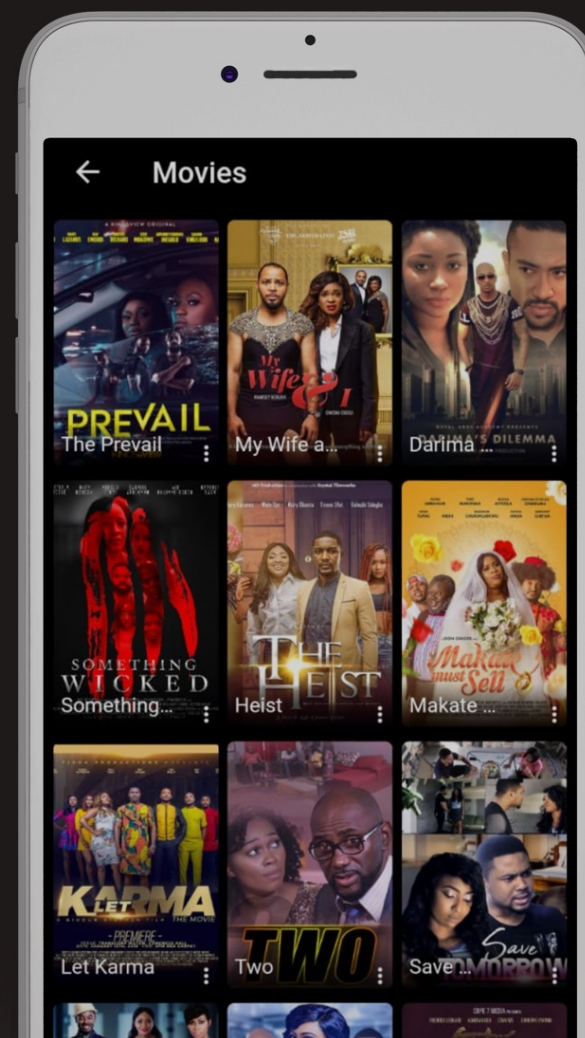

The entire development phases took 5 months to complete.

The next slide discusses in detailed the striking features in KingsView.

4.1 KINGSVIEW.TV - FEATURES

Below are some features of the KingsView Platform.

1. **Movie categories** - Movies on KingsView are structured into action, adventure, romcom, comedy, drama, thriller and children. This makes it easy to locate movies of your taste. The large movie catalogue keeps you clued.
2. **Intelligent search engine** - All KingsView platforms are integrated with an intelligent search engine to find a movie with even **complex search words**.
3. **Unparalleled subscription plan** - KingsView is free for 7 days for new users and has the lowest payment plan as low as **700 Naira** for a month and **7,000 Naira a year**.
4. **Variety payment options** - Payment on KingsView is available on both mobile and web. A variety of credit cards including **VISA, VERVE, Master Card** are acceptable world wide. Also available is an **Express payment option** for web for fast subscription renewal. Express payment option can also be used to renew subscription for a friend.
5. **Movie token (Voucher)** - With KingsView there is just so many ways to renew your subscription. **The voucher is a scratch to reveal card** which can be purchased from any KingsView vendor. The voucher cards can also be used as gift cards for friends.
6. **Continue watching** - KingsView remembers all the movies you are watching or completed watching. This information is **synced across all the devices your account is linked to**. This makes it easy to continue your movie anytime from any device.
7. **Scalable video qualities** - No need to worry about data consumption when watching movies on KingsView. **Variety of resolutions are available (1080p, 720p, 480p, 144p)** to select from no matter the device you are watching with.

4.1 KINGSVIEW.TV - FEATURES

Continuation...

8. **Multiple device per account** - With KingsView, one subscription grants you access to watch from **three different devices at a time**. You can link your phone, laptop and smart TV.

9. **Intelligent movie player** - The video player in KingsView identifies when the orientation of your device changes and **adjust your video for a more suitable view**. It also remembers when last you stoped watching and resumes when you try watching the same movie.

10. **Comment and Like** - Express yourself freely when watching a movie on KingsView with the **comment and like** features.

11. **Picture In Picture mode** - KingsView keeps your movie playing even if the view is minimised. This is only available on KingsView Mobile.

12. **Notifications** - KingsView keeps you updated with new movie releases, subscription notice through in-app and email notifications.

13. **KingsView highlights** - With KingsView, we don't only serve you movies, We also provide daily red carpet footages, movie reviews , behind the scene etc.

The next slide discusses in detailed statistics

4.1 KINGSVIEW.TV - STATISTICS

The influence of this newly launched platform is already remarkable with a total of 1,169 subscribers in 123 countries and still counting.

Due to the platform's easy accessibility, flexible subscription plan and rich contents, the platform is projected to reach over 100,000 subscribers in early 2022.

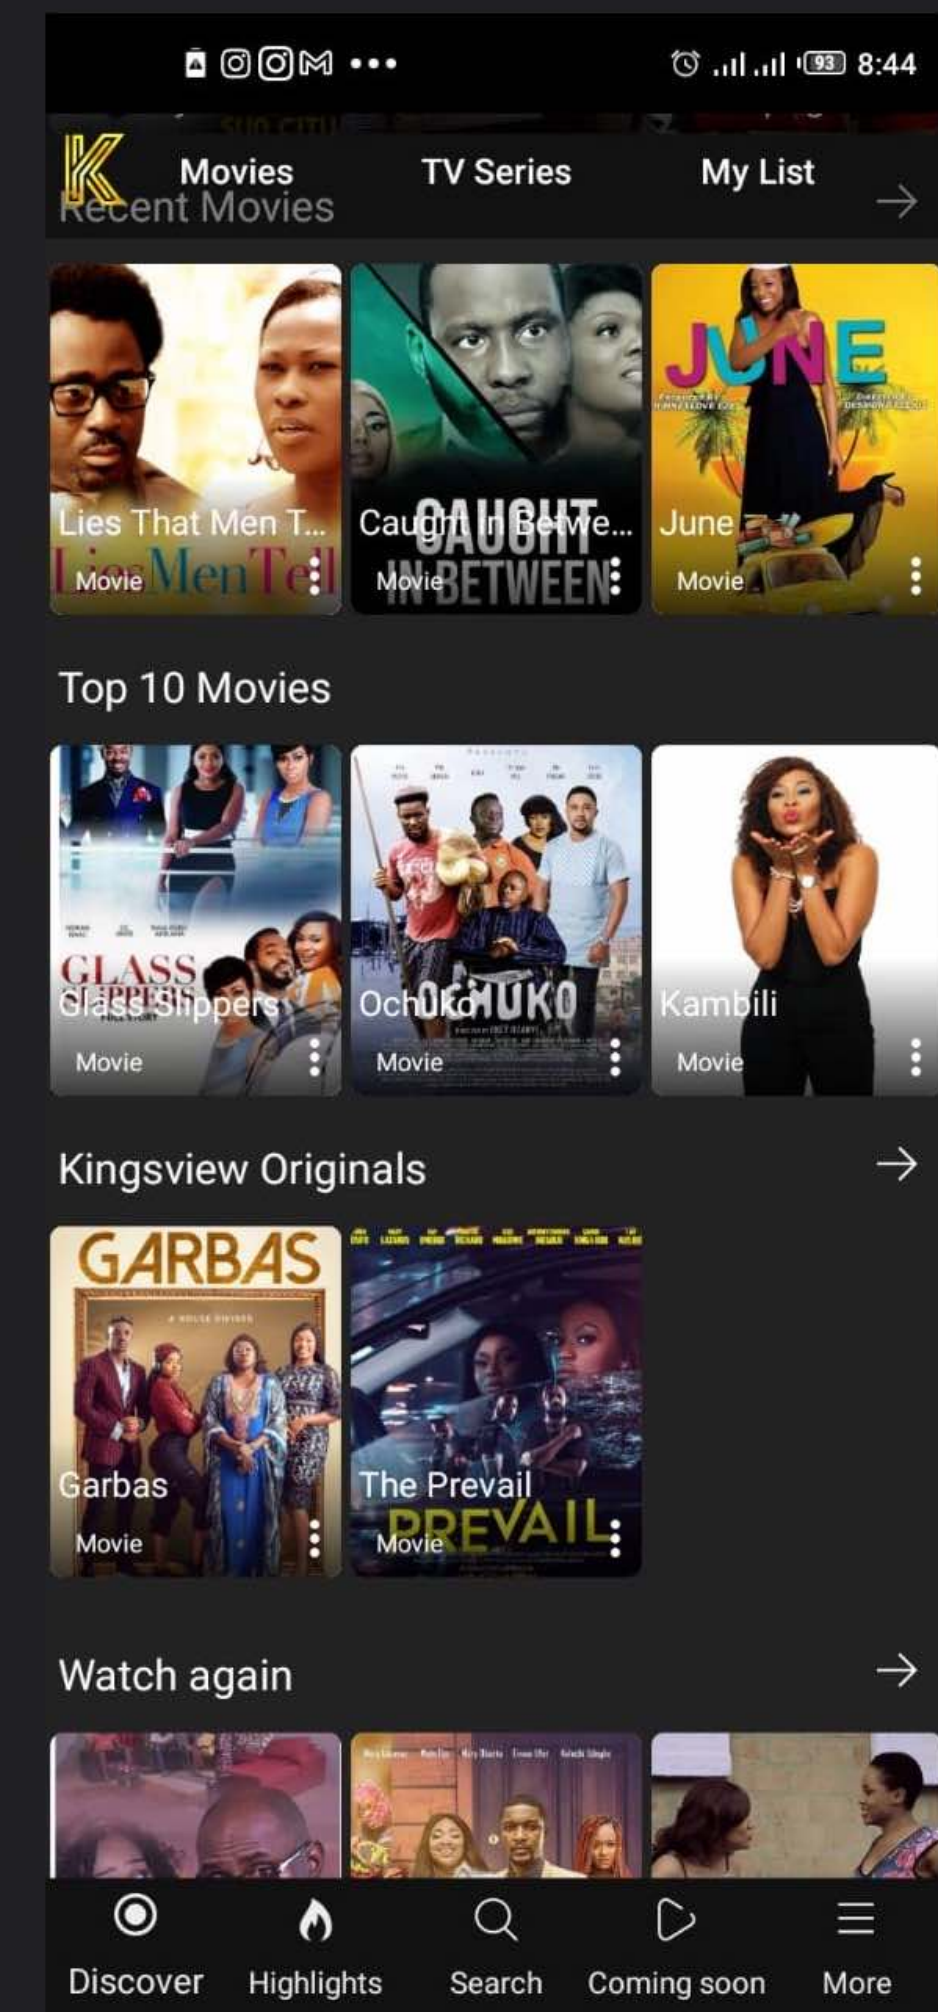

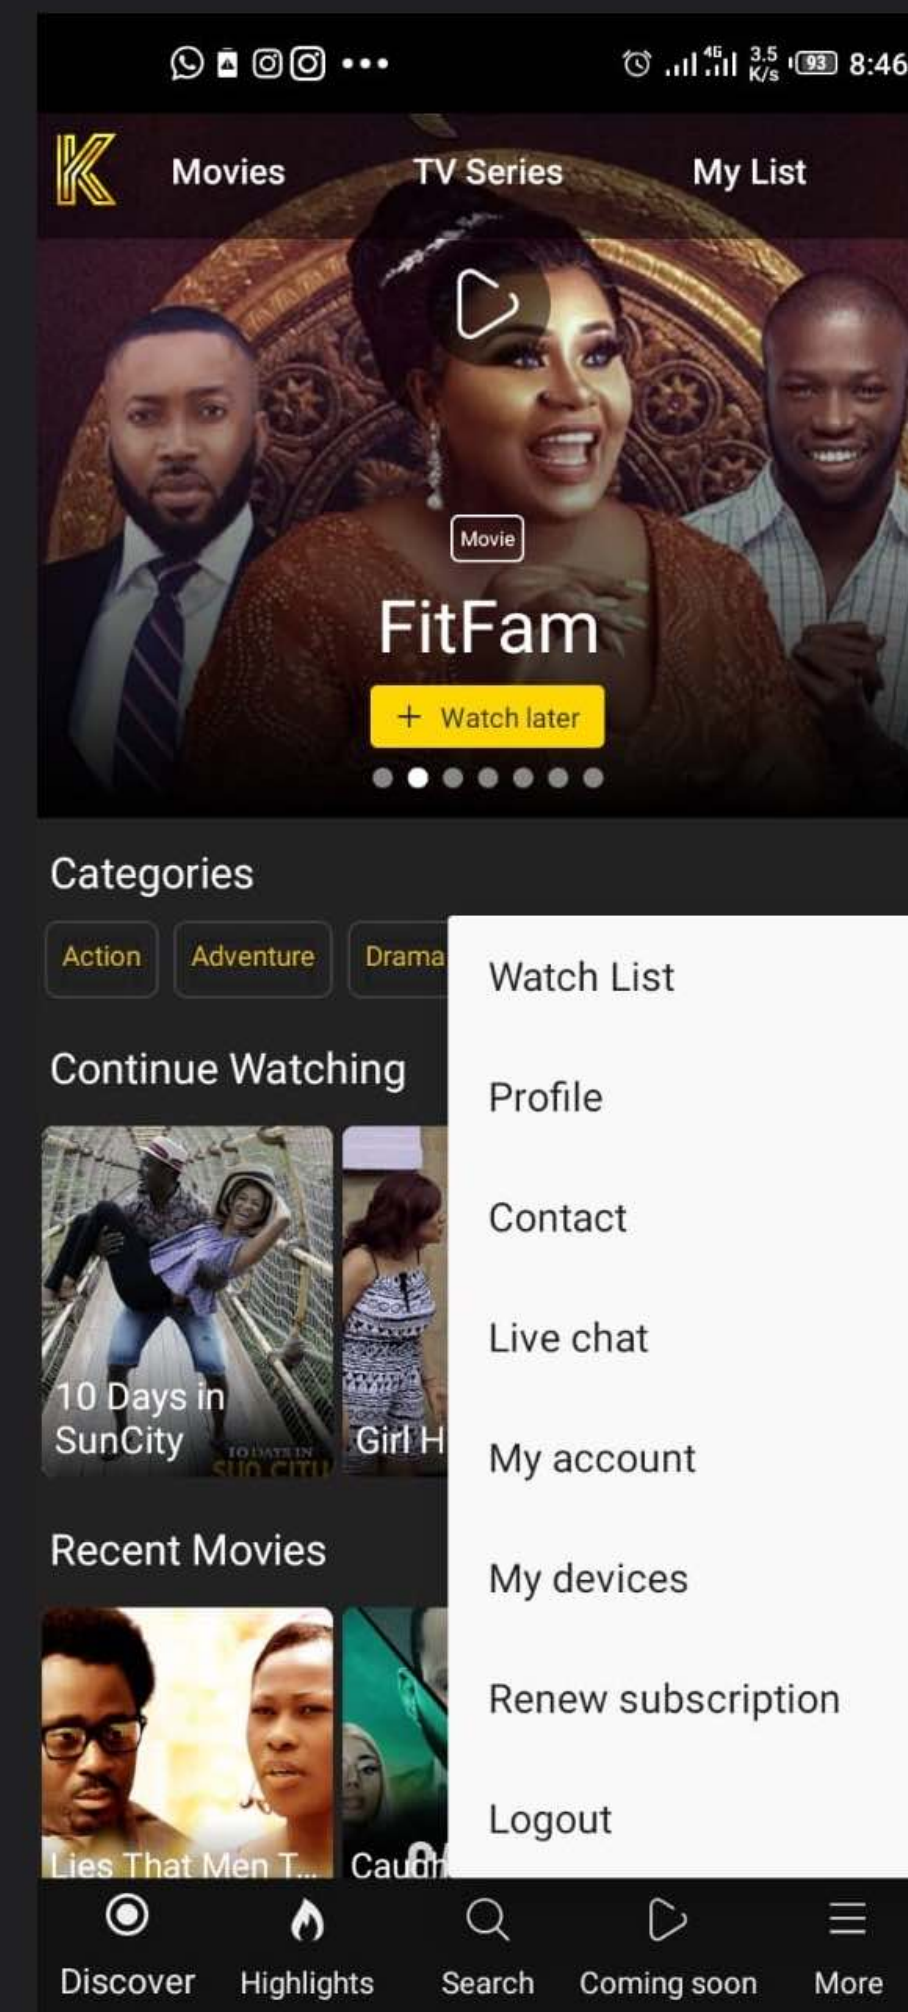

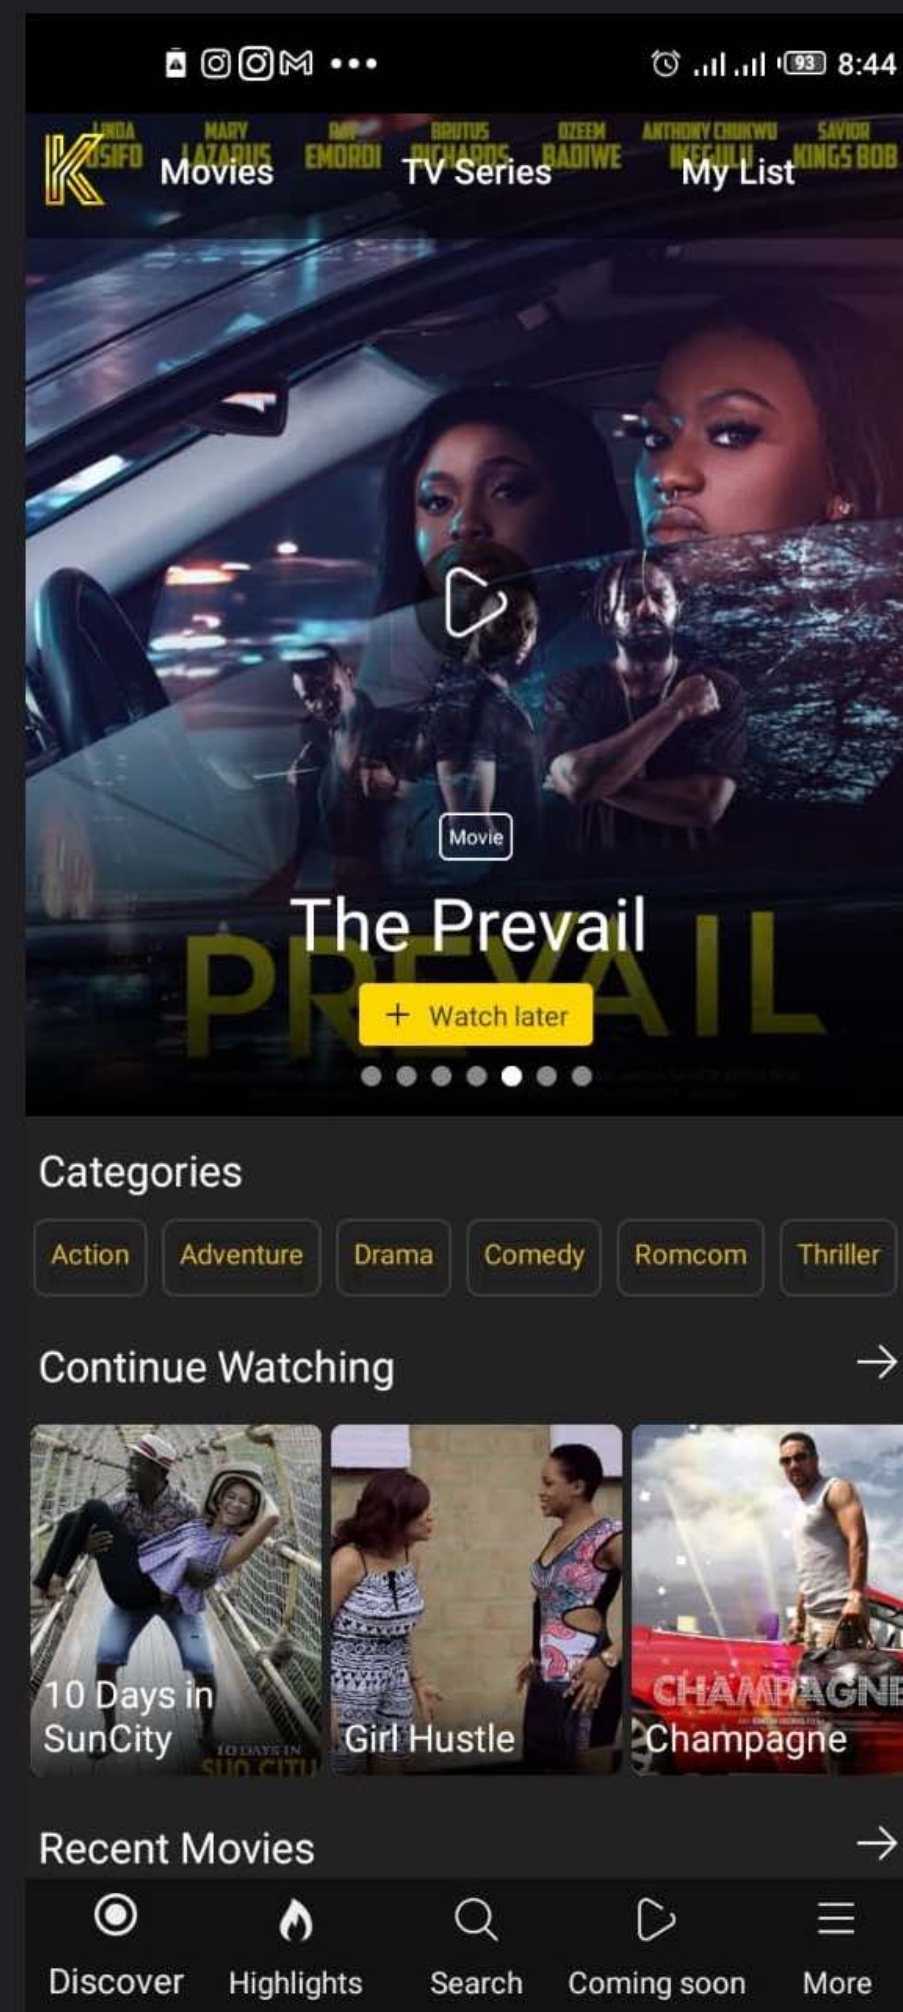

KINGSVIEW ANDROID APP

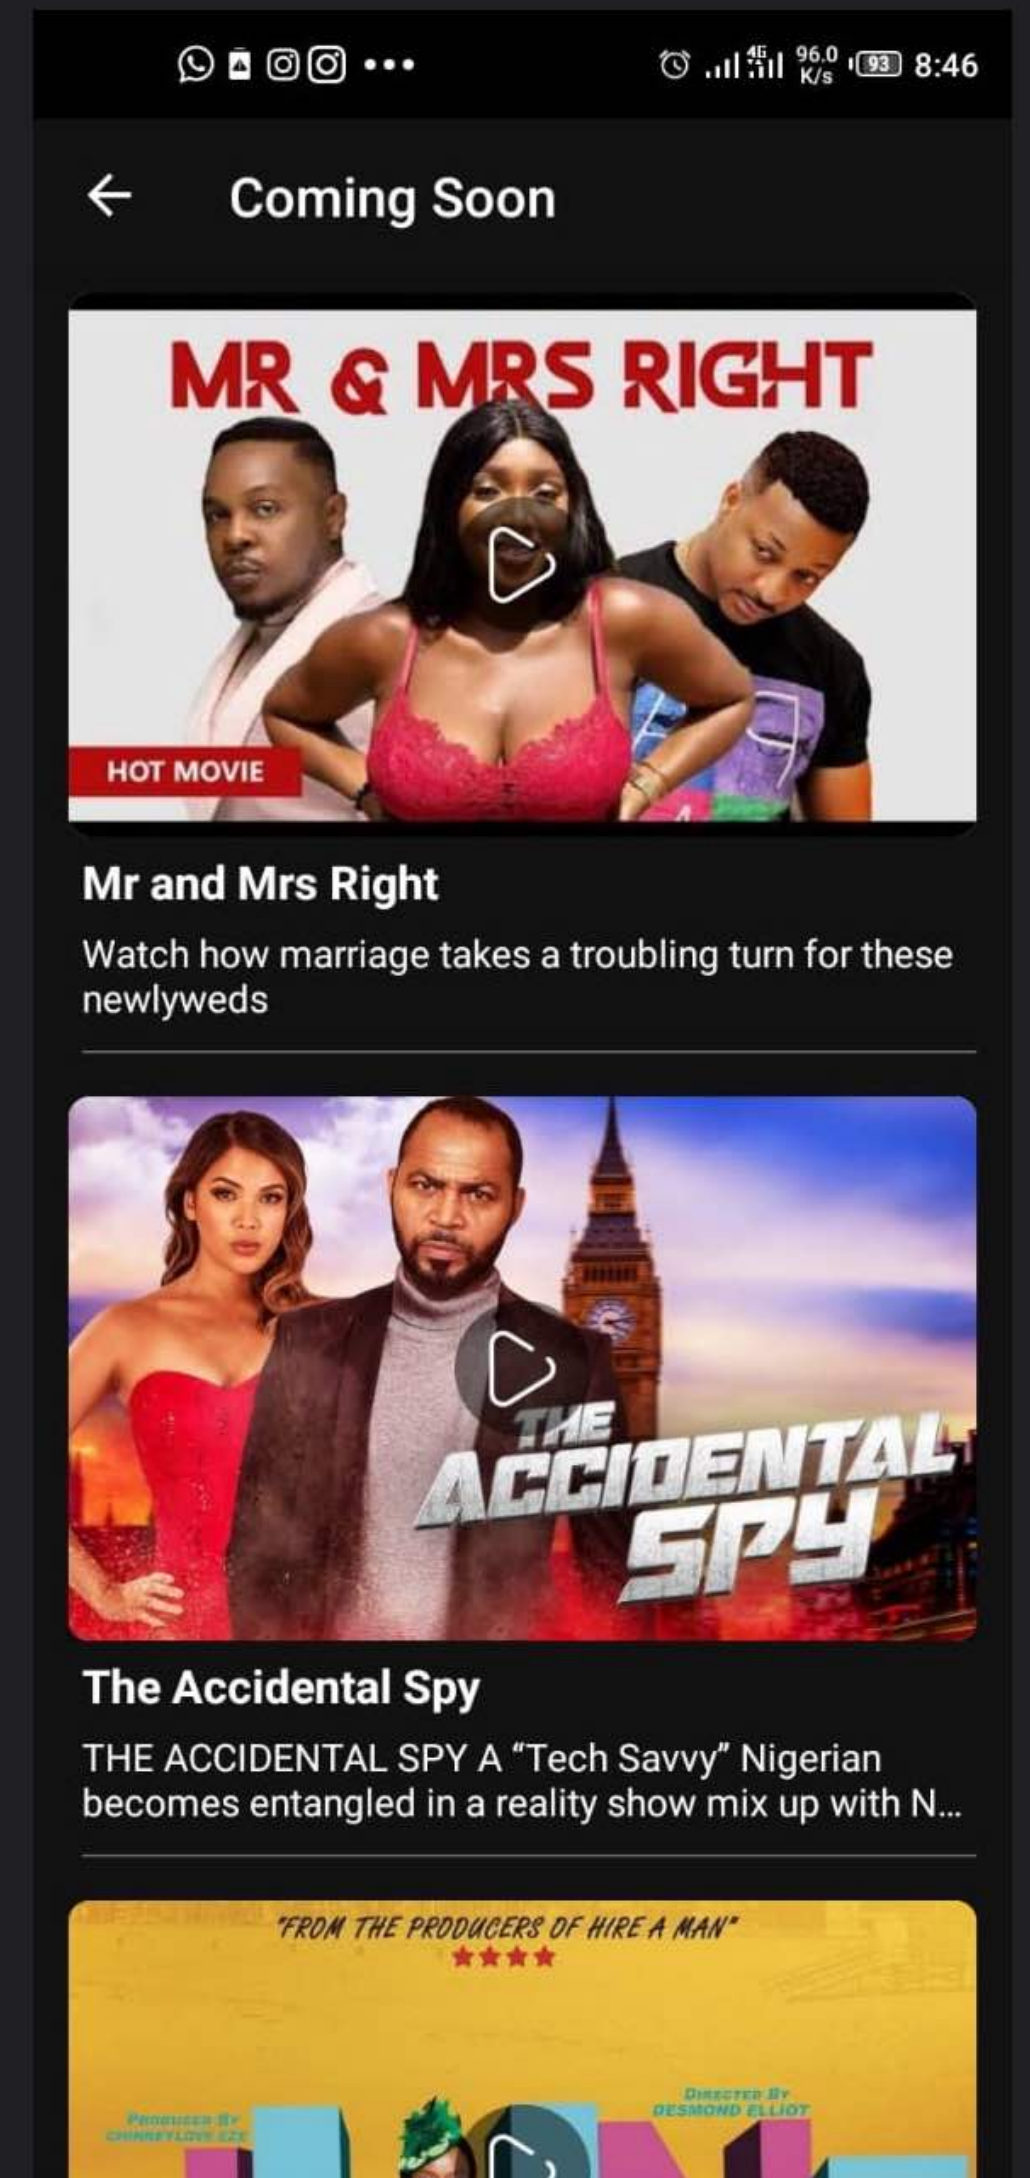

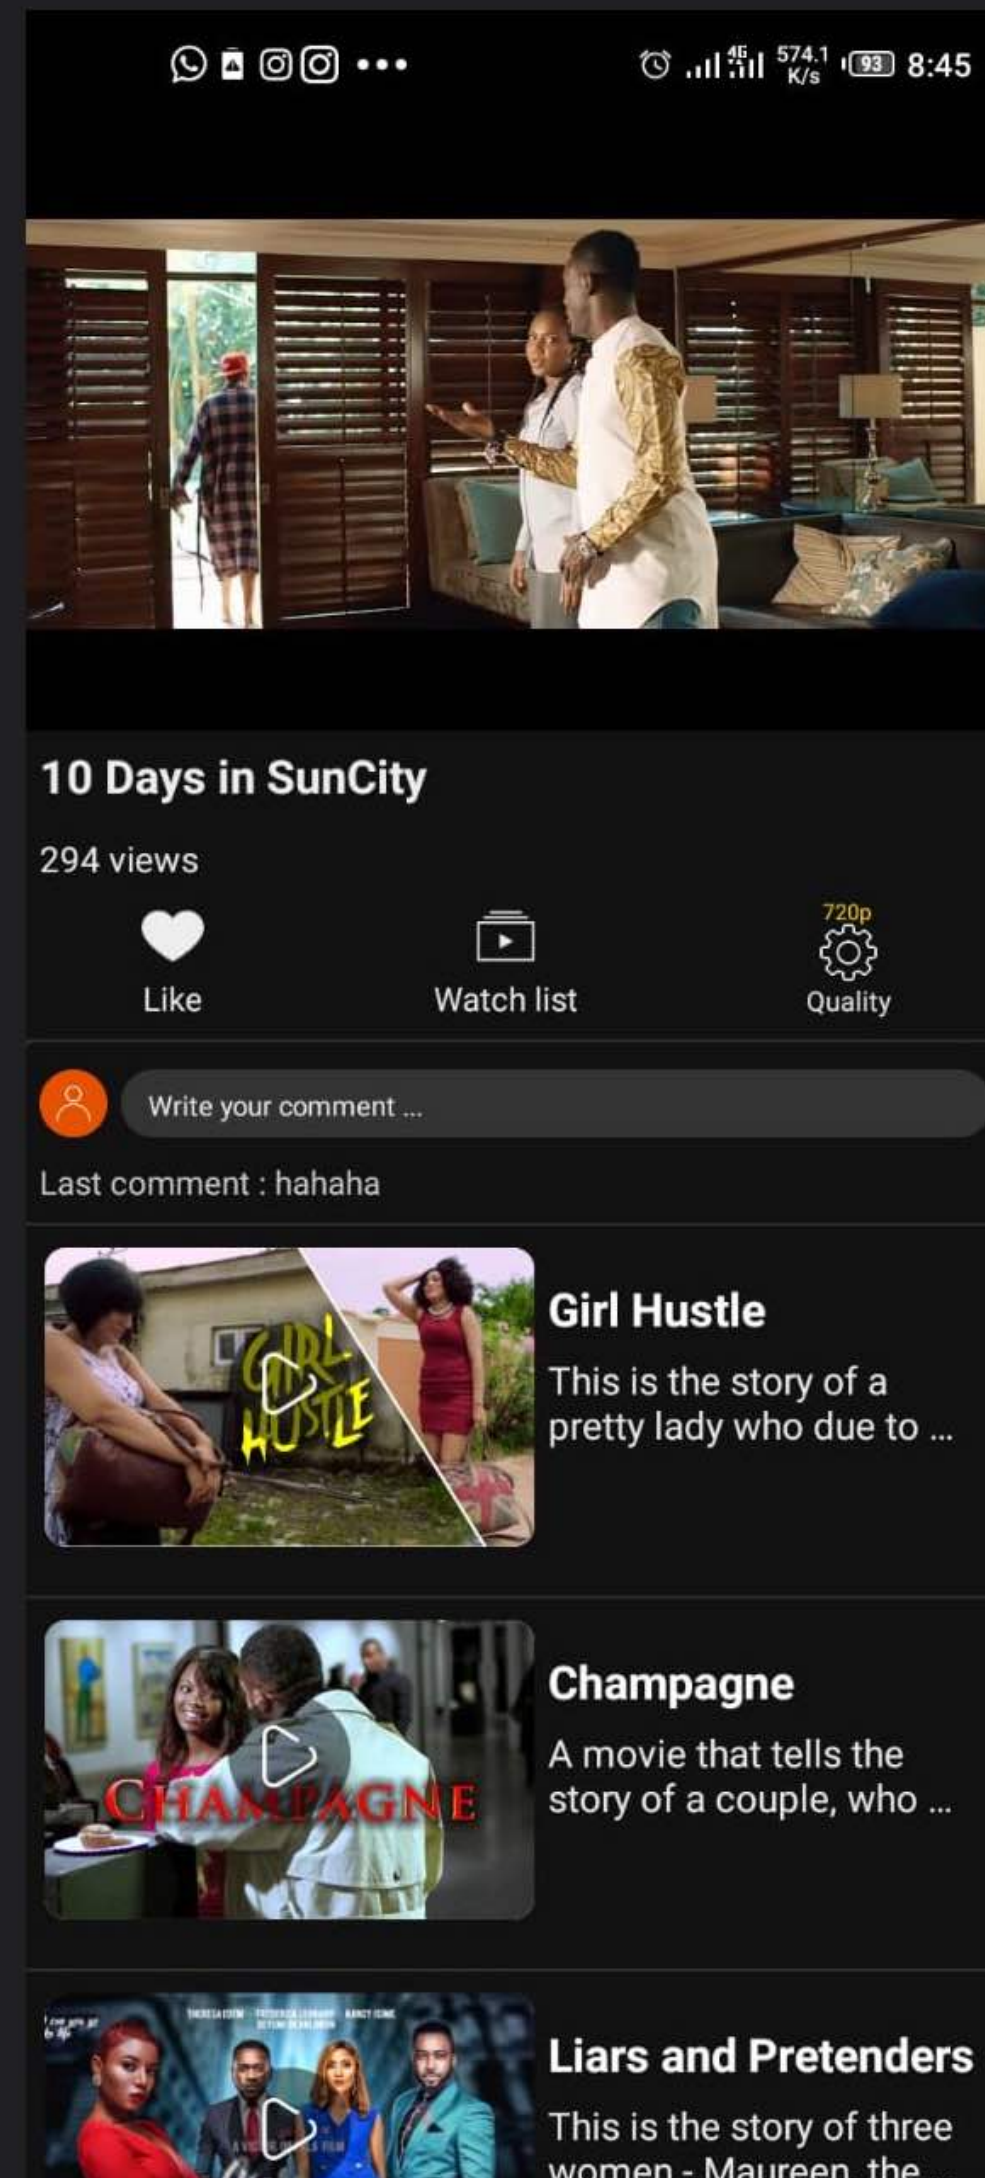

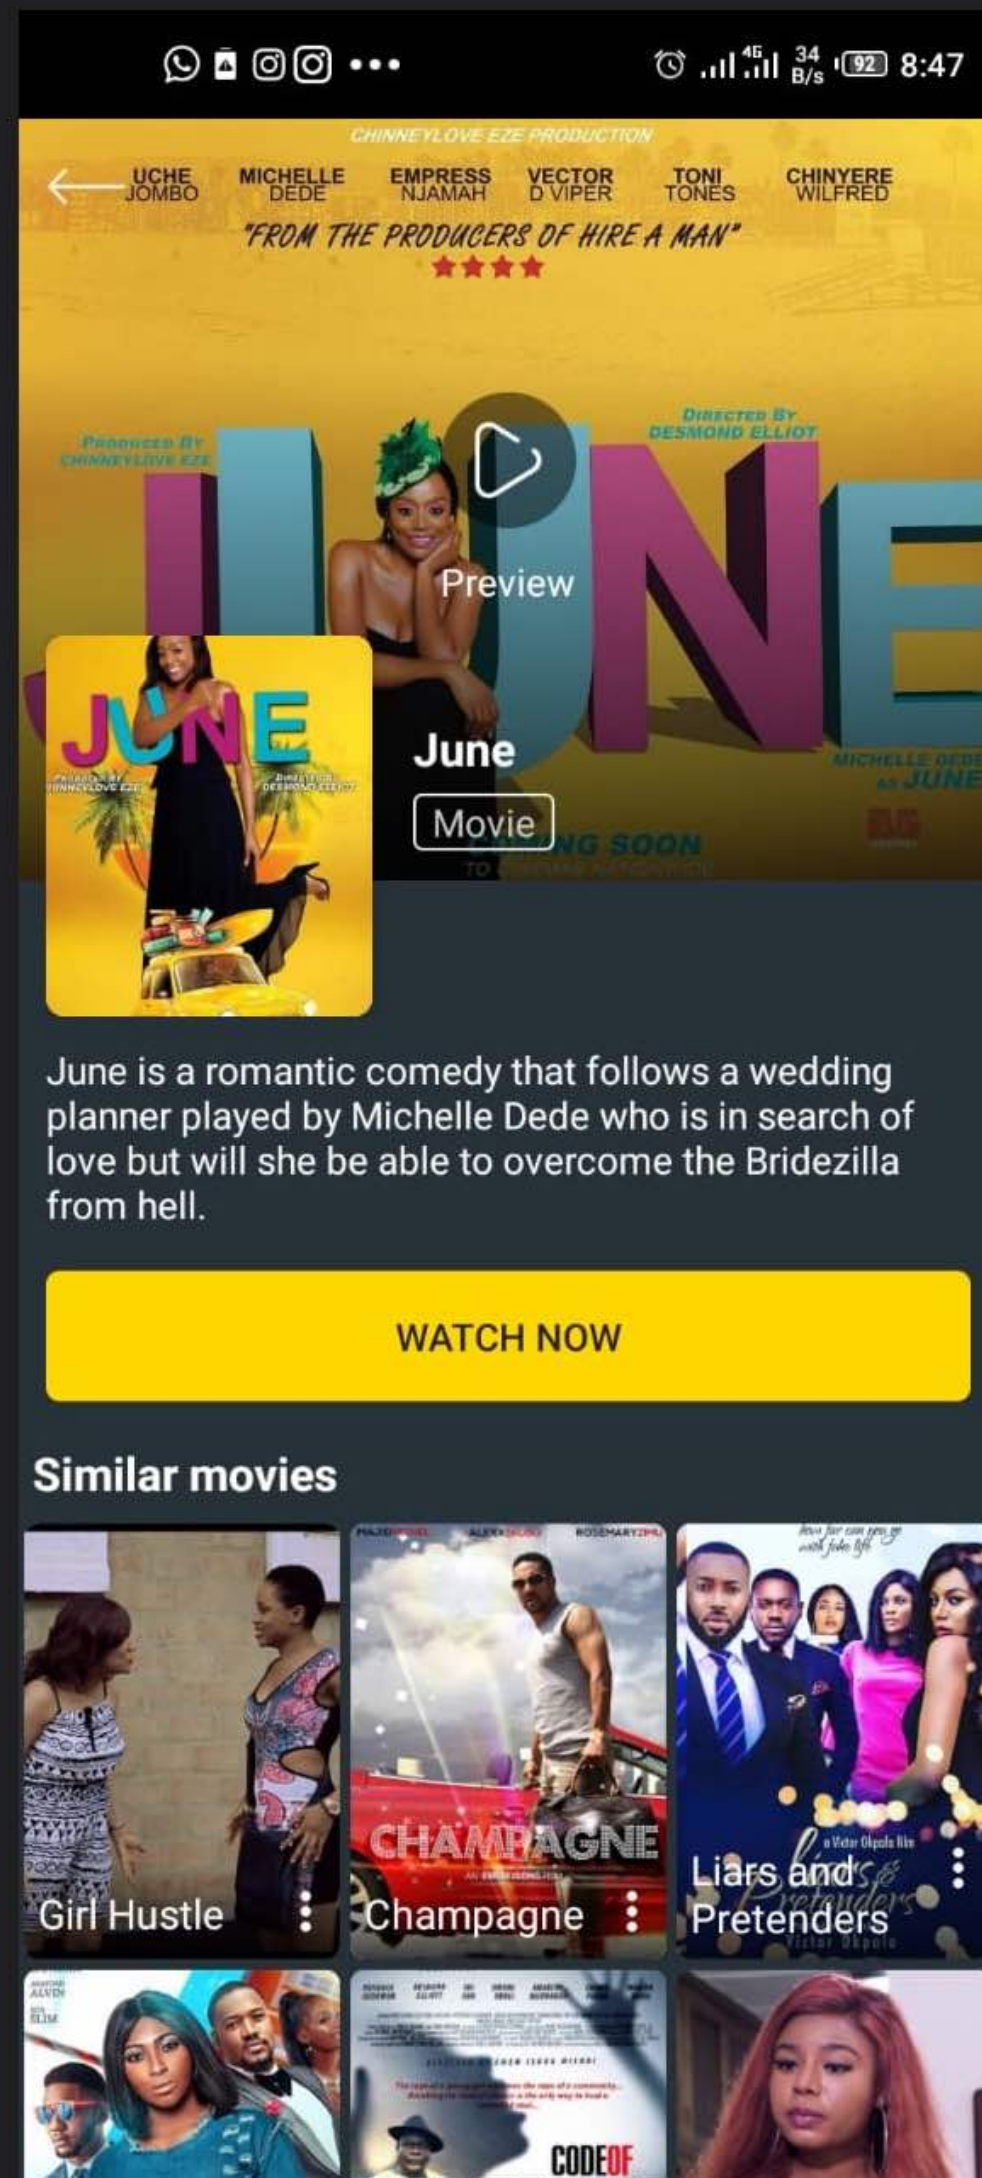

4.1.1 KINGSVIEW ANDROID

KingsView Android is suitable for all android phones and tables.

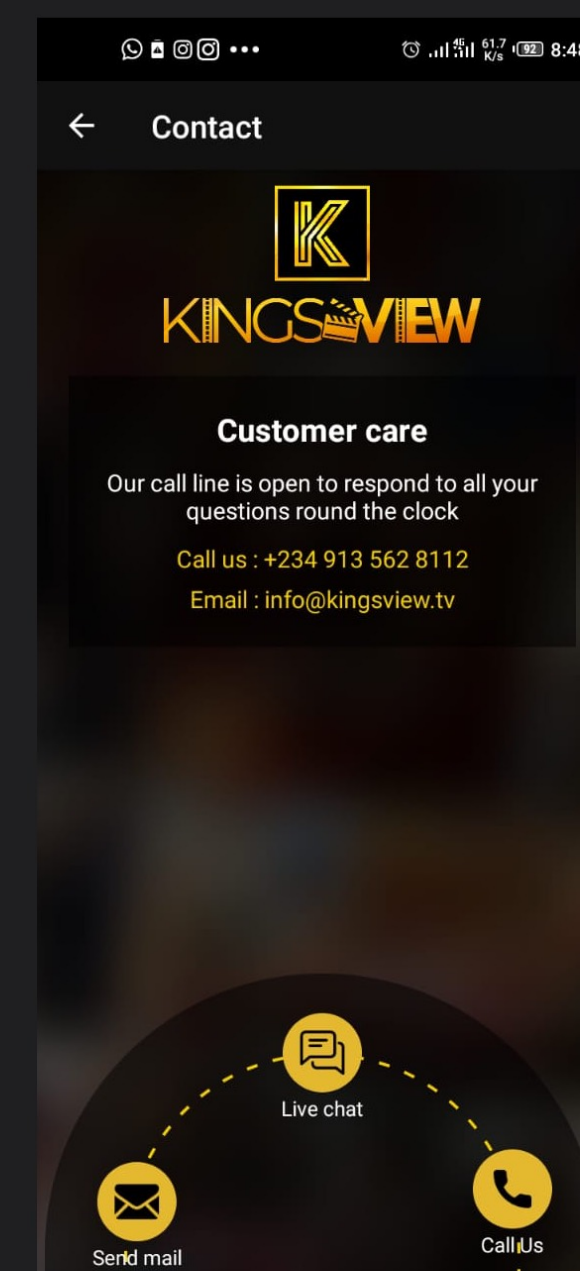

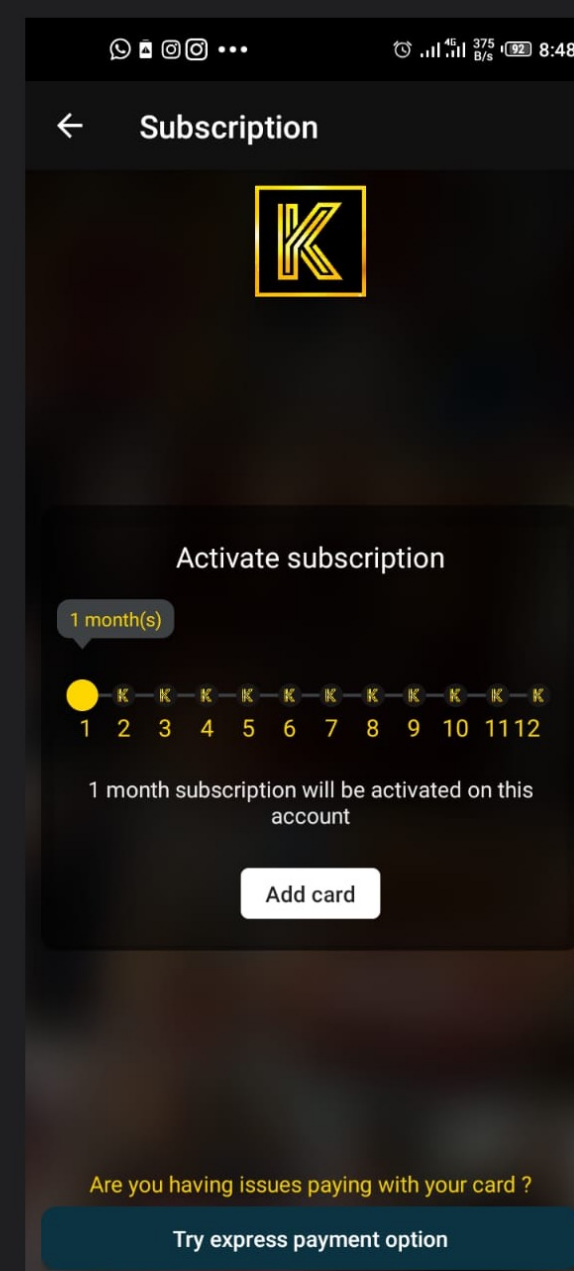

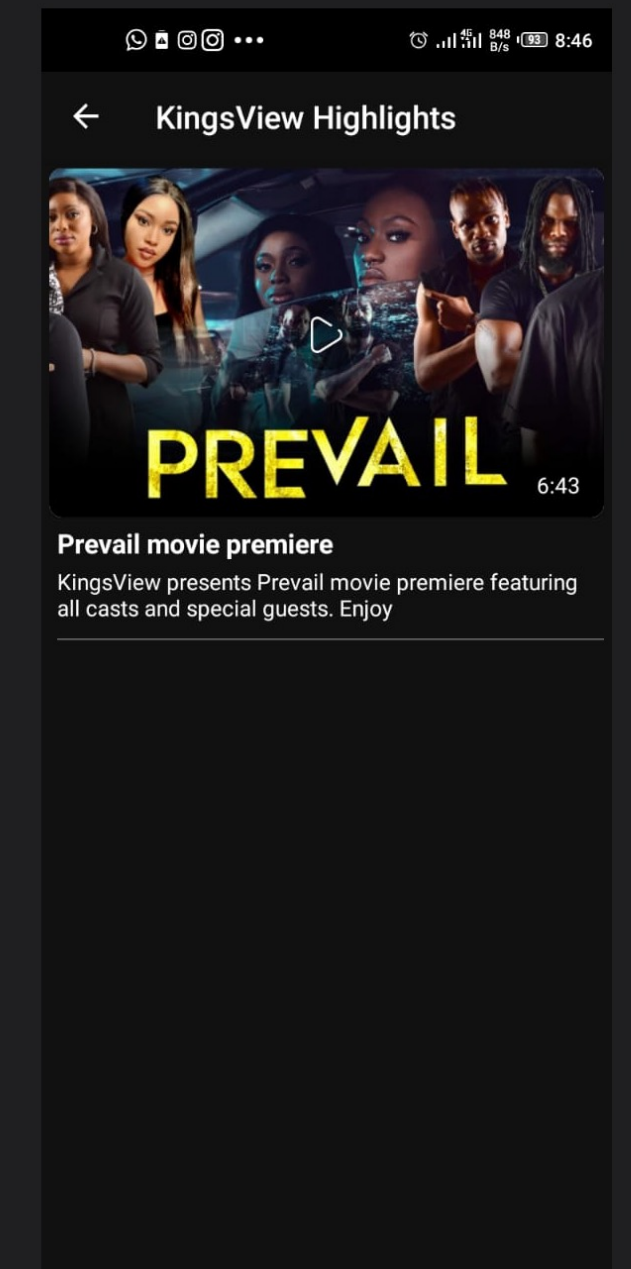

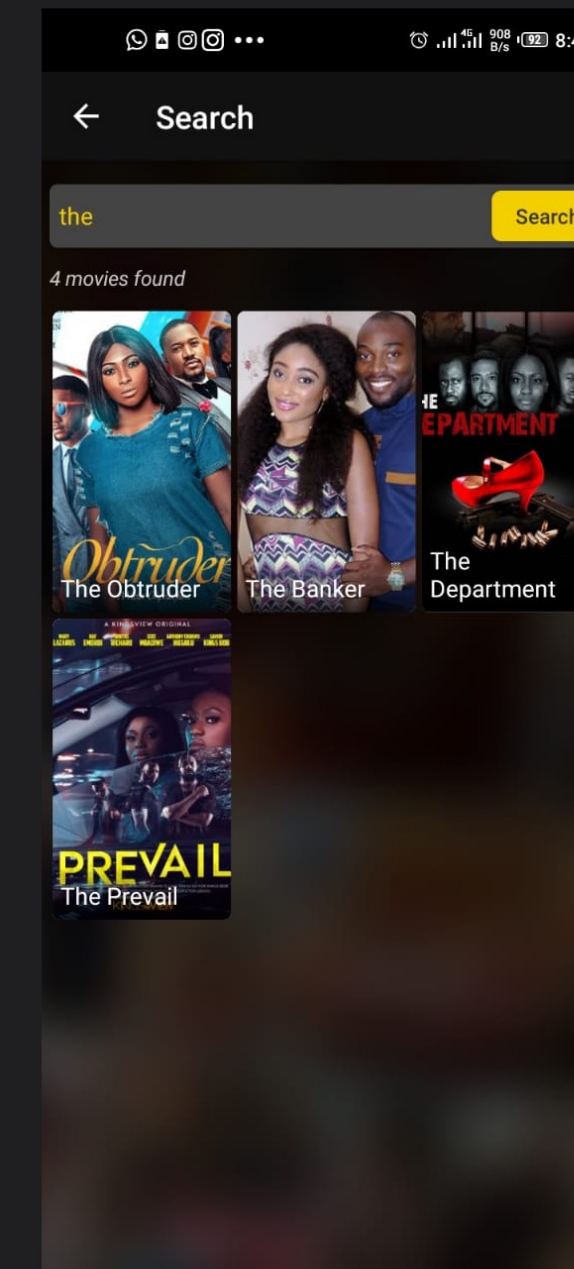

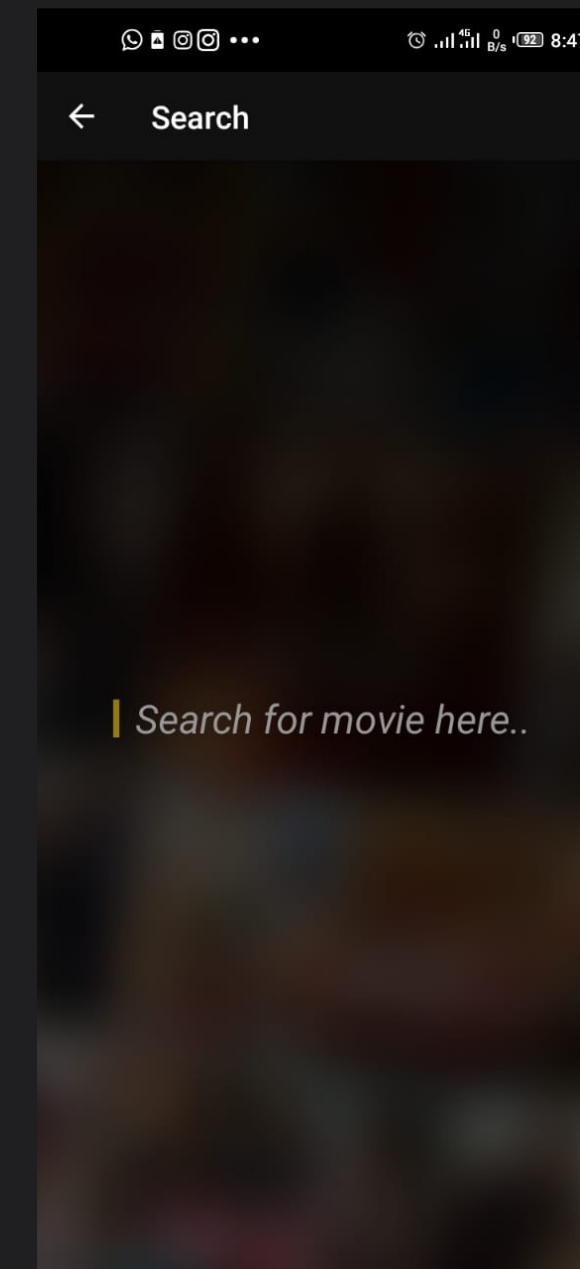

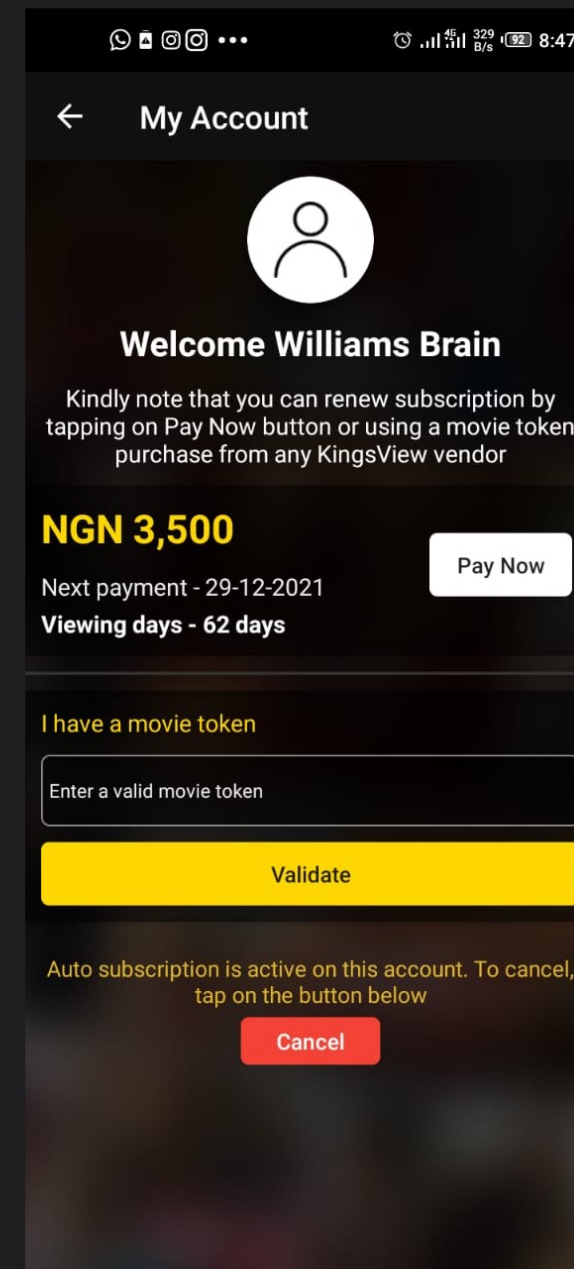

4.1.1 KINGSVIEW ANDROID

KingsView Android is suitable for all android phones and tables.

4.1.4 KINGSVIEW SMART TV

Intelligent movie player which supports both Full HD and HD streams

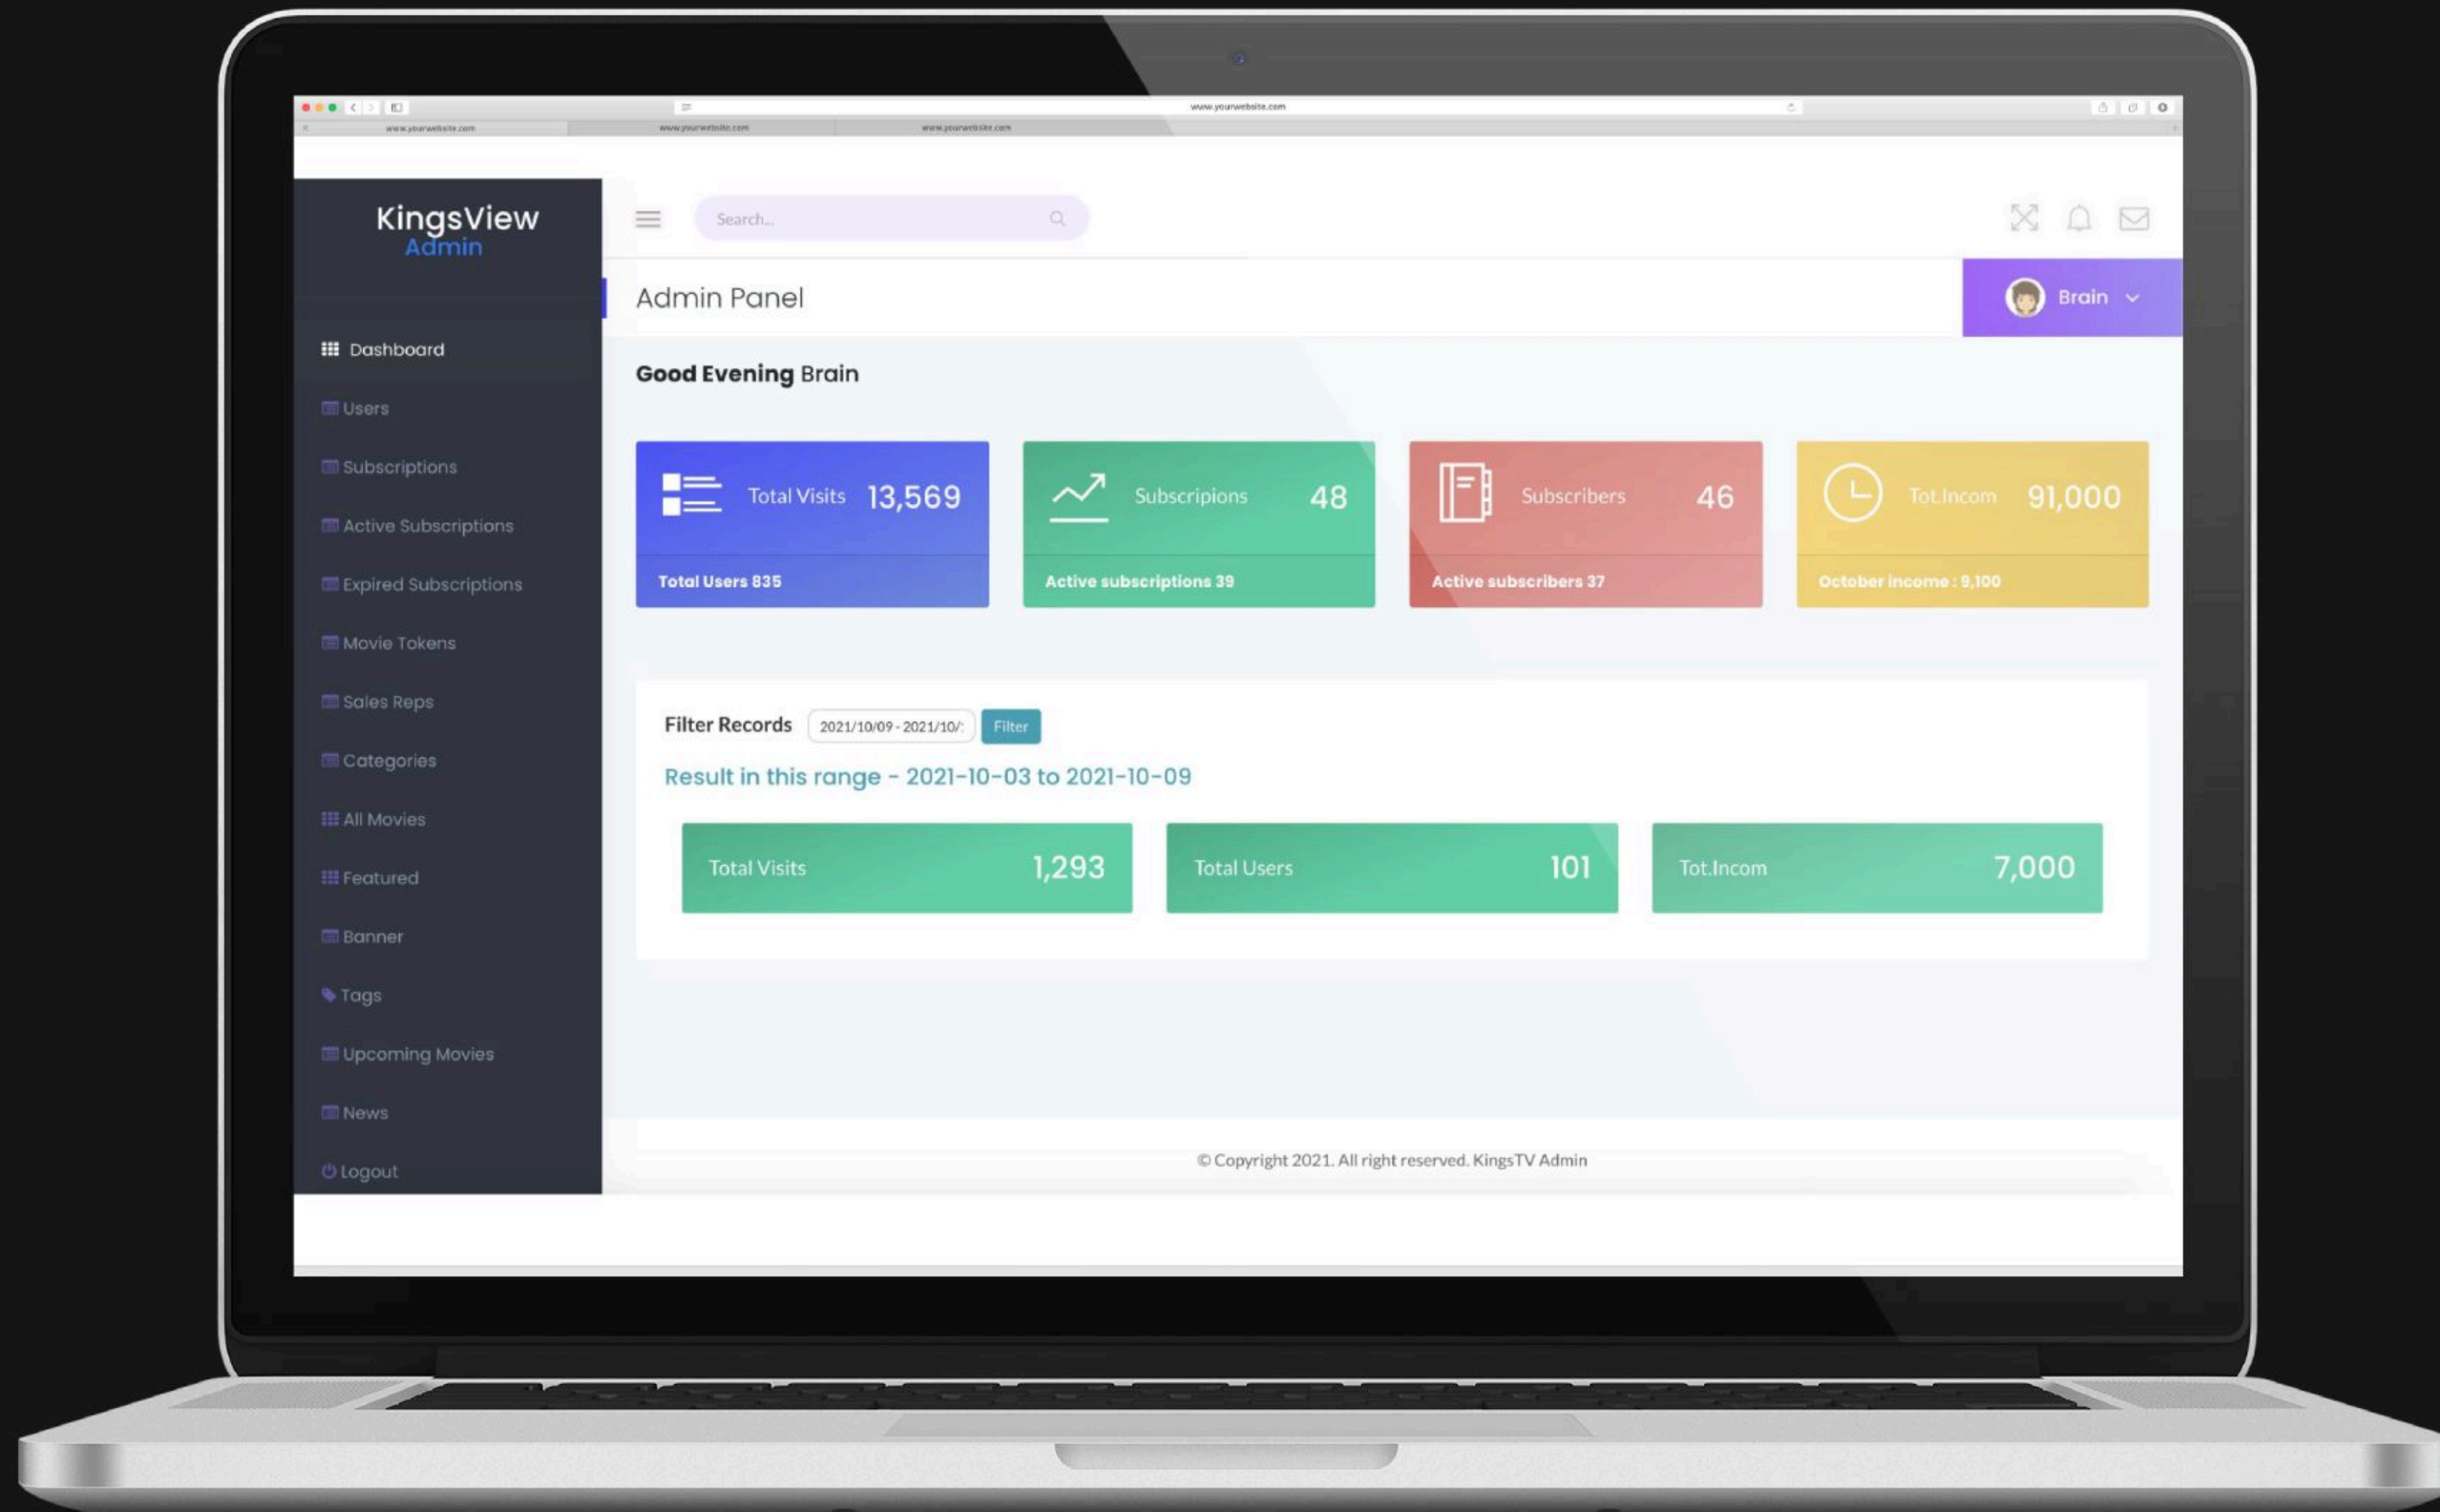

4.1 KINGSVIEW ADMIN PANEL

I deigned a custom admin panel that powers the entire KingsView Platform. The panel has the following menu.

1. **Dashboard** - This showcases the full analytics of the platform. It shows the hits, subscribers , income generated and many others.
2. **Subscriptions / Active , Expired subscriptions** - Accurate record of subscriptions can be accessed. Details in this menu includes date the subscription was activated , expiring date and the name and email of the subscriber. Active and expired subscriptions are outlined with green and red colours respectively.
3. **Movie token** - This is for generation and monitoring of activated vouchers.
4. **Movies** - This menu is for the upload and categorising of movies.
5. Upcoming movies
6. News
7. And lot more.

6 Live Stream

I successfully designed live participation site and streamed the following departmental programs in this year of The Gathering Clouds namely **LTM & Radio Vision Casting Conference in February, LoveWorld MENA Conference in March, Super FM Grand opening (Benin and Port-Harcourt) in November** on cLoveWorld and CeTunes platforms.

He also participated effectively in the live broadcast of ministry events such as **Your LoveWorld with Pastor Chris (all episodes), Global Service with Pastor Chris (All 11 months), Global Day of Prayer with Pastor Chris (all 4 editions)** on cLoveWorld and CeTunes platforms.

I successfully designed live participation site and streamed the following departmental programs in this year of The Gathering Clouds namely **LTM & Radio Vision Casting Conference in February, LoveWorld MENA Conference in March, Super FM Grand opening (Benin and Port-Harcourt) in November** on cLoveWorld and CeTunes platforms.

7 Data capture and avatar generation sub websites

In this year of The Gathering Clouds ,I developed the following sub websites.

1. LoveWorld MENA Conference registration and participation links
2. Vision Casting Conference registration and participation links
3. I Billion Yours on Radio Avatar
4. Joyful feast registration link
5. Response Center Influencers registration link
6. The Encounter Sub website
7. LoveWorld Asia Week registration link

The pictures in the next slide.

June Global Day of Prayer with Pastor Chris Avatar

This month of June, I designed customise avatar page for generation of GODP avatar

An isometric illustration featuring a central stack of server racks. Surrounding the servers are various digital and network-related icons: a laptop with a dashboard, a cloud with a server icon inside, a smartphone displaying a code editor, a magnifying glass, a smartwatch, and several small cubes. All elements are interconnected by a network of white lines on a light blue background. A dark blue horizontal band across the middle contains the title text in yellow.

Server Management and Security

6 Server Management

I successfully managed 6 **dedicated servers** for LTM & Radio department, this includes **Live radio server (MediaCP)**, **Live streaming server (Wowza engine)** and **three web hosting dedicated servers, VOD Cloud Server (5cent)** and ensured the smooth working of all through round the clock monitoring and resolution of issues on the spot.

Server administration & management

Here at LTM & Radio Ministry of Pastor Chris, our mobile app and website are powered by different servers ranging from dedicated hosting servers, live video streaming and transcoding servers to live radio streaming servers. This amounts to huge running cost yearly and periodic server malfunctioning due to increasing traffics.

As the personal in skill and knowledgeable in maintaining, managing and administrating this servers, I did a thorough review and was able to save unto \$ 7,000 off annual server bills while ensuring smooth and excellent operation of all our TV and Radio platforms. I also migrated our LTM Networks Live TV channels to a scalable pay-as-you go server. I also migrated our 200 live radio channels to Centova Cast server for better performance.

This has resulted to over 400% increase in listen and watch time on our TV and Radio platforms due smooth and buffer free streams.

I also developed an encryption system to secure all our digital asserts and admin login credentials.

Server / Site Security

I installed SSL certificate on all sites and servers to prevent hacking. I also added two way authentication to administrative panels on all our platform backend.
